

Pooled Saliva Specimens for SARS-CoV-2 Testing

Barat et al. Supplementary Data

Table S1: Summary of studies evaluating saliva as a specimen for SARS-CoV-2 testing

Reference, First Author	Characteristics	Collection Method	Total Subjects	Total Positive	Sensitivity/ PPA (%) SAL/ NP	Specificity / NPA (%) SAL/NP	Testing Platform and Notes
Jamal (1)	All known positive	Saliva NP swab	91	72	72 SAL 89 NP	-	Allplex™ 2019-nCoV Assay(100T) (Seegene Inc, Seoul, Korea) Saliva + PBS
Nagura-Ikeda (2)	15 asymptomatic, 88 symptomatic All known positive	Saliva OP/NP for diagnosis	103	103	SAL 82 LDT 81 COBAS 71 RT-LAMP	-	RT-qPCR LDT, cobas SARS-CoV-2 high-throughput system, RT-LAMP ¹ Saliva + PBS
Wyllie (3)	In-patient Asymptomatic health-care workers	Saliva upon waking prior to food/water intake NP swab Self- collected NP for asymptomatic ²	70 495	70 9	81 SAL 71 NP Only 9 positive samples for comparison	-	CDC Assay Viral load higher in saliva in patients

Migueres (4)	17 Asymptomatic 27 Symptomatic 9 Hospitalized	Saliva NP swab	123	44	88 SAL asymptomatic 95 SAL symptomatic 93 NP	-	Panther Fusion™ module (Hologic)
Skolimowska (5)	Symptomatic healthcare workers 5 pediatric patients (<18 years)	Saliva Combined OP/NP swab comparison	132	18	83 SAL	99 SAL	Roche, AusDiagnostics, ThermoFisher, Abbott cobas® PCR medium
Pasomsub (6)	Symptomatic	Saliva NP and throat swab	200	19	84 SAL	99 SAL	SARS-CoV-2 Nucleic Acid Diagnostic Kit (Sansure, Changsha, China) CFX96 Real-Time Detection System (Bio-Rad)
Williams (7)	Screening clinic	Saliva NP swab	522	39	85 SAL	98 SAL	Coronavirus Typing (8-well) assay, AusDiagnostics) Higher viral load in NP
Zhu (8)		Saliva Respiratory tract sample (NP /OP swab)	944	442	86 SAL	97 SAL	

Landry (9)	Symptomatic out-patient	Saliva NP swab	124	35	86 SAL 94 NP	98 SAL	CDC Assay 1/3 saliva samples were thick
Rao (10)	Asymptomatic adult male, 8-10 day after tested positive SAL from deep in throat upon waking prior to food/water intake	Saliva NP swab	217	160	93 SAL 53 NP	-	One-step RT-PCR , Real-Q 2019 nCoV detection kit (Biosewoom, Inc, South Korea) Higher viral load in saliva
Hanson (11)	Drive-thru test center	Saliva NP swab	354	81	94 SAL	98 SAL	Hologic Aptima SARS-CoV-2 transcription mediated amplification (TMA) assay Saliva + Universal transport media
McCormick-Baw (12)	Emergency department	Saliva NP swab	156	50	96 SAL	99 SAL	Cepheid Xpert Xpress SARS27 CoV-2 PCR test
Procop (13)	Screening Center	Elicited cough and saliva NP swab	216	38	100 SAL PPA	99 SAL NPA	Aptima™ SARS-CoV-2 transcription mediated amplification assay (Panther™ System, Hologic)

Azzi (14)	Confirmed COVID-19 patients with severe or very severe disease	Saliva (drooling technique) Or Endotracheal tube NP swab	25	25	100 SAL	-	Abi Prism 7000 sequence detection system (Applied Biosystems) QIAmp Viral RNA mini kit (Qiagen) Luna Universal qPCR Master Mix (New England BioLab)
Iwasaki (15)	Symptomatic	Saliva NP swab	76	9	97 Overall percent agreement	-	One-Step Real-Time RTPCR Master Mixes and tepOnePlus Real Time PCR System (Thermo Fisher Scientific)
Uwamino (16)	32 hospitalized patients 115 symptomatic staff	Saliva NP swab	147	32	87 Overall concordance (SAL & NP) 96 overall concordance within first 10 days	-	LightCycler96 (Roche, Basel, Switzerland) 2019 Novel Coronavirus Detection Kit (Shimaszu, Kyoto, Japan)
Byrne (17)	Emergency Department In-patient symptomatic	Saliva Nasal and throat swab	110	14	86 SAL	-	QIAmp Viral RNA Mini Kit (QIAGEN) Genesig Real-time Coronavirus COVID-19 PCR Similar viral load

¹RT-LAMP : Reverse transcription-loop-mediated isothermal amplification

²All NP/OP healthcare collected except when noted

Table S2: Study Participant Characteristics

	ED	Drive- Through	Total
Number of Participants	69	380	449
Gender, Male N (%)	23 (33%)	159 (42%)	182 (41%)
Age, Range (median)	21-88 (46)	21-75 (42)	21-88 (42)

Figure S1.

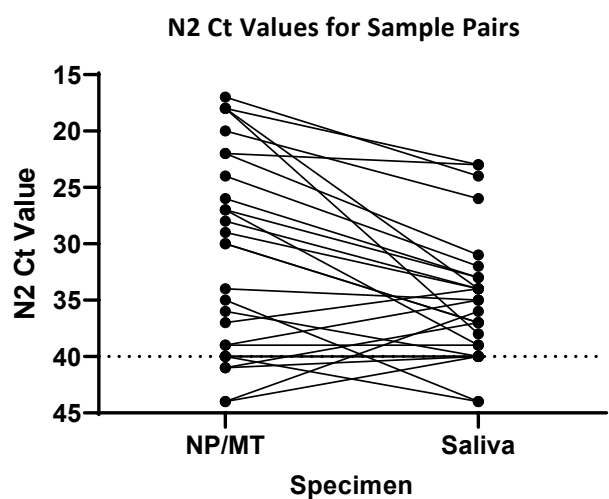

Figure S1. N2 Cycle threshold (Ct) values for paired NP/MT and SAL samples (29 pairs). Pairs are connected by a line. The N2 Ct was set to 40 for samples in which N2 was not detected, indicating a negative result for SARS-CoV-2 RNA. Horizontal dashed line is at Ct=40, the assay cut off. P-value <0.05 calculated by Wilcoxon matched- pair signed rank test.

Figure S2.

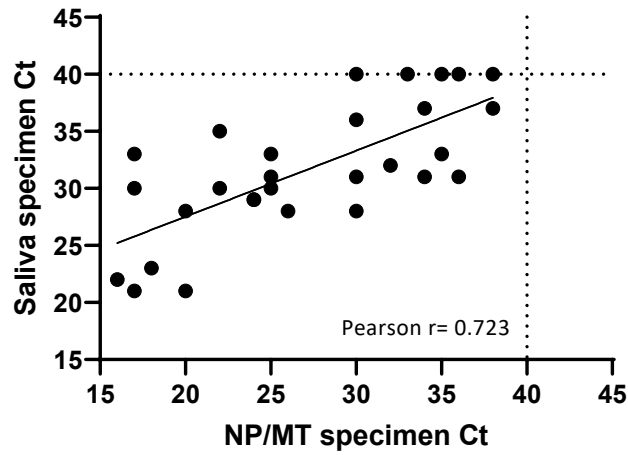

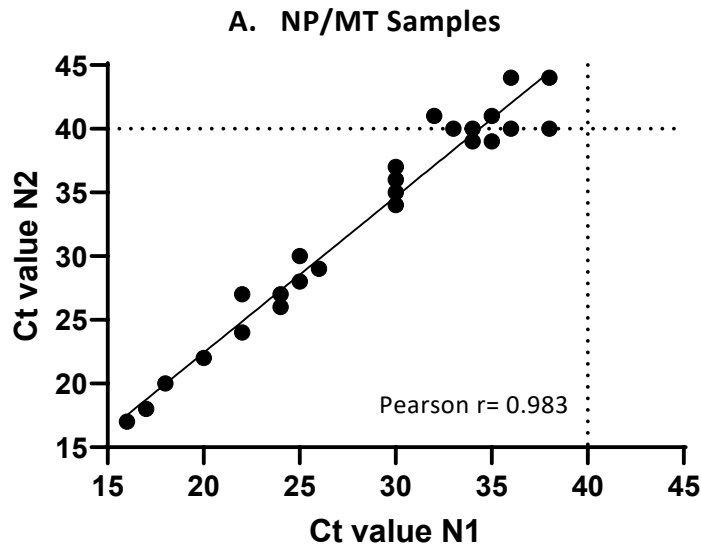

Figure S2. Comparison of Cycle Threshold (Ct) values for N1 for NP versus SAL specimens (29 pairs). Analysis demonstrates moderately good correlation between NP Ct values and Ct values for matched SAL samples. R and p values determined by Pearson correlation and graphically represented by linear regression. Dotted line indicates the limit of detection. P-value <0.001.

Figure S3 (A-B)

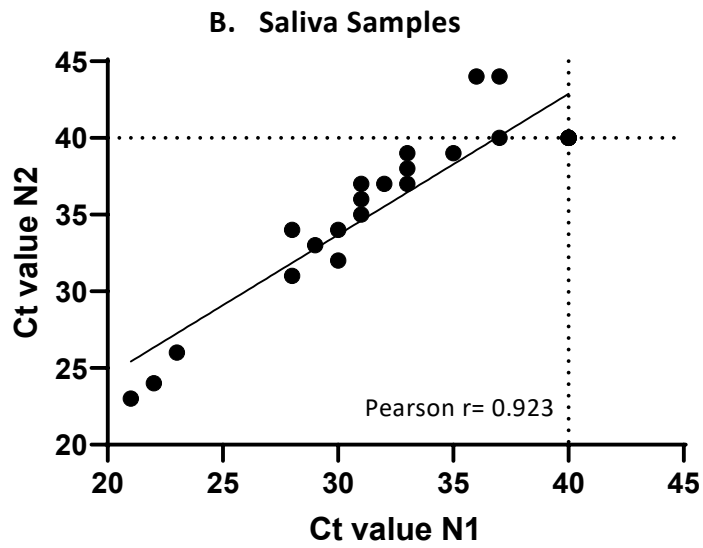

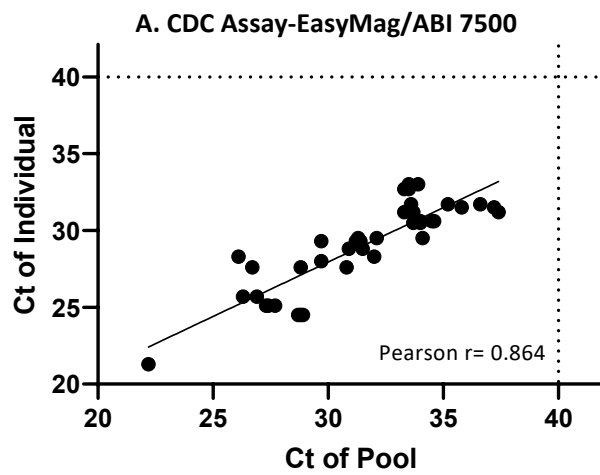

Figure S3 (A-B). Concordance between SARS-CoV-2 detection in 29 samples of each type using CDC N1 primer and probe sets. R and p values determined by Pearson correlation and graphically represented by linear regression. Dotted line indicates the limit of detection. P-value <0.001

Figure S4 (A-C)

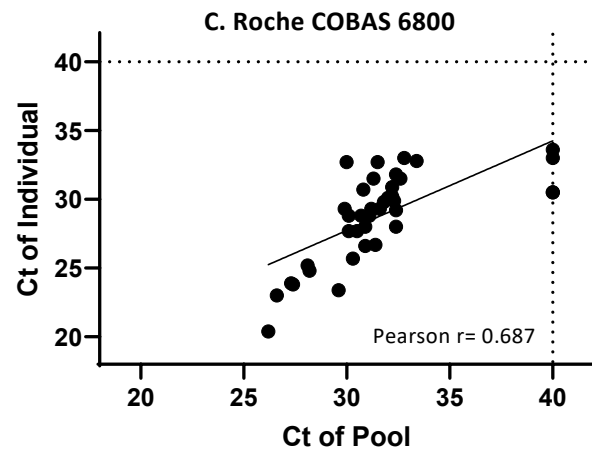

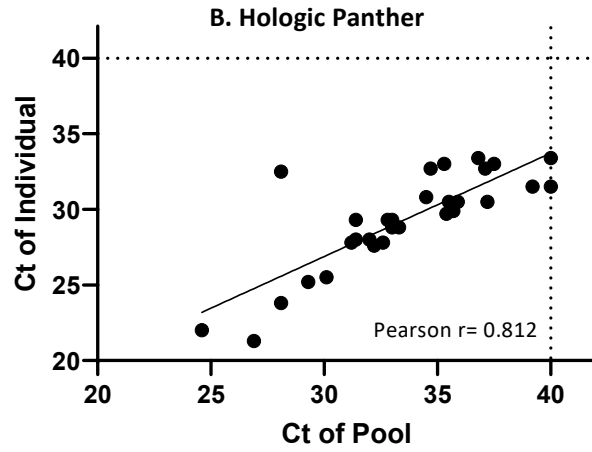

Figure S4 (A-C). Relationship between Ct values of individual and pooled SAL samples. R and p values determined by Pearson correlation and graphically represented by linear regression. Dotted line indicates the limit of detection. P-value<0.001
