

## Appendix A: Interview Questions for Stakeholders

### Interview for Stakeholders

#### ***Does Total Triage (TT) in primary care disproportionately impact those from vulnerable groups?***

This interview has been designed to identify the impact of the TT model of primary care on access to care for vulnerable patients in South East London. Your answers are anonymous but the organisation you represent will be quoted. We will be recording and transcribing the interview, so we can analyse what was talked about.

As a key stakeholder working with vulnerable groups we are interested in hearing your assessment of how the move to TT in primary care has affected your client's access to primary healthcare.

Please try to answer as fully as possible. We are especially interested in any innovative ideas you may have for improving access for vulnerable patients at this time.

For further information or any questions about the project please contact [Aaminah.verity@nhs.net](mailto:Aaminah.verity@nhs.net)

### **Interviews for focus groups/informants**

- TT
  - What do you understand by the TT model of primary care?
  - How do you think this has impacted your clients?
- Access to care
  - Have you heard any reports of problems accessing primary care since surgeries moved to this model?
  - Can you think of any specific examples where TT has provided an insurmountable obstacle?
  - What type of care is being impacted most? E.g. urgent primary care, medication requests, admin support like sick notes
  - Which elements of primary care are actively reaching out to your clients?
- Continuity of care
  - Have clients been able to continue contacting their GP for routine management of long term conditions?
  - Have any clients faced interruption to medication supply?
- Registration
  - Are you aware of any clients who have been unable to register since we've moved to TT?
  - Are you aware of any practices that are deregistering patients who are temporarily out of borough due to lockdown?
- Digital exclusion
  - How is your organisation overcoming issues with patients who don't have phones or internet access?
- Proposed solutions
  - Any examples of practices where care is still going well?
  - What model of primary care would work for your clients in a post covid world?
  - Do you think clients need walk in centres without triage?

## Appendix B: Questions for GP Survey

Impact of Total Triage on access to Primary Care for Vulnerable patients

Exploring the impact of new triage systems post covid on provision of care for vulnerable patients

\*Required

1. Practice Name \*

2. Job Role \* Mark only one .

Gp Partner, Salaried Gp, Practice Manager, Gp Registrar, Practice Nurse, Admin Staff

3. Are you currently operating under a total triage model i.e. No patient can make an appointment without first being triaged? \*

Yes, No

4. When did you implement your total triage system?

Prior to Covid-19 pandemic, During the pandemic, Have not moved to total triage model, Other:

5. Even if you don't have a total triage model, most practices use some type of triage for GP appointments. Which one from the below best describes the one at your practice? \*

Reception triage (receptionist books a phone appointment or face to face GP appointment after triaging)

GP triage (GP triages the patient and advises on need for further appointments)

Digital triage first (Patients are asked to complete an online triage form to access a clinician)

Nurse or Advanced Practitioner triage (Non Doctor clinician triages patients and advises on need for further appointments)

No triage (patients can book only a phone appointment without being triaged e.g. online booking)

Combination of the above

Other:

6. If your practice uses GP triage, does it differentiate between triage (i.e. quick assessment of the problem so that the patient is given the right consultation appointment) and consultation (i.e. full assessment and management of the problem with shared decision making as appropriately)

Yes, we have separate triage and consultation slots. When triaging clinicians are not expected to deal with the problem there and then unless this is a very quick administrative task.

No, triage is conflated with consultation and clinicians are expected to deal with the problem there and then most of the time rather than making another appointment.

Not relevant as my practice does not have GP triage

Other:

7. What is the maximum number of patient contacts in a clinical session (4 hours and 10 minutes) that a salaried doctor is expected to have? (This includes all patient contacts e.g. face to face, telephone, e-consultations, video).

1-15, 16-20, 21-25, 26-30, 31-35, 36-40, 41-50, >50, Other:

8. Are you using a method of online consulting? \*

Yes, No

9. If yes, what proportion of your consultations are only online?

<5%, 5-19%, 20-49%, 50-79%, >80%

### Provision of Care

10. How do you think the shift to more remote working (remote consultations) has affected relational continuity of care at your practice? \*

Improved continuity, Reduced continuity, Has not influenced continuity, Other:

11. Do you have the flexibility to tailor the length of patient appointments to their needs (e.g. book a double appointment for patients with complex needs or if there is a need for an interpreter)?

Yes, for the vast majority of cases (>90%)

Yes, for 50-90% of cases

Only for 20-49% of cases

Rarely, for <10 % of cases

12. Does your practice have a system of using different methods of contacting patients who don't respond/miss appointments and need to be seen? (e.g. writing letters to those who do not answer their phones). \*

Yes, No, Don't Know, Other:

13. If yes, what is the system?

14. How is your practice managing new patient registrations? Check all that apply

Online only, In person with form, Don't know, Other:

### Proposed Solutions

15. Do you have any ideas how access to primary care would look in Lewisham in a post covid world, for patients who cannot go online or have difficulty using phones?

Appendix C: Anonymised Mystery Shopper Data Set

Practice	Website Message	Registration info on website	Message on door	Physical Entry	ID check	Phone message	Appt booking	Registration attempt
1	We are currently welcoming new patients	"You should come along to reception with your medical card and fill in the registration form. If you do not have a medical card, we can still accept you with a proof of address."
