

## Development and comparison of a novel multiple cross displacement amplification (MCDA) assay with other nucleic acid amplification methods for SARS-CoV-2 detection

Laurence Don Wai Luu, Michael Payne, Xiaomei Zhang, Lijuan Luo and Ruiting Lan

**Supplementary Table 1:** List of MCDA, LAMP and rt-PCR primers used in this study. Bolded MCDA primer names are primers shared between 2 or more primer sets. \* indicate primers used in rt-PCR for confirmation of complete DNA removal from transcribed RNA. Red text indicates the final primer sets chosen for the MCDA SARS-CoV-2 assay.

| MCDA Primer name                    | Sequence 5' --> 3'                               | Reference  |
