

Supplemental Table 1. Autoantibody profiles from unexposed pre-pandemic, acute COVID-19 hospitalized, SARS-CoV-2 infected convalescent, and unexposed SLE subjects. The Mean Fluorescence Intensity (MFI) of each result is shown. All colored boxes indicate the presence of AAB with positivity and magnitude determined individually for each readout as follows : yellow = MFI > the average of all non-SLE pre-pandemic subjects (group 1, n=29) +3 standard deviations (SD) of that value, orange = MFI > avg of non-SLE pre-pandemics +5 SD, red => avg of non-SLE pre-pandemics +8 SD. Individual subjects with at least one AAB have labels in bold. Autoantibody abbreviations: SSA/Ro60= Anti-Sjögren's Syndrome-related antigen A/Ro60 kDa; SSA/Ro52=Anti-Sjögren's Syndrome-related antigen A/Ro52 kDa; SSB/La= Anti-Sjögren's Syndrome-related antigen B/La; RNP/Sm= Anti-RNP/Smith; Sm= anti-Sm; Prot 3= Anti-Proteinase 3; Myeloper= Anti-Myeloperoxidase; Beta 2-G= Anti-β 2-Glycoprotein; CENP-A= Anti-Centromere Protein A; CENP-B= Anti-Centromere Protein B; Scl-70= Anti-Scl-70; Jo-1= Anti-Jo-1; C1q= Anti-C1q; PM/Scl-100=Anti-PM/Scl-100; Ku= Anti-Ku; Mi2= Anti-Mi-2; PL-12= Anti-Alanyl-tRNA synthetase
