

**Supplemental File 2.** Detailed view of mutations across all samples. Nucleotide mutation positions are represented as rows. Each mutation has its own color. Cluster 1 and cluster 2 specific-mutations are colored in black and burnt yellow, respectively. Mutations related to Rio de Janeiro's new lineage are colored in red.

| Sample    | 1     | 2     | 3     | 4     | 5     | 6     | 7     | 8     | 9     | 10    | 11    | 12    | 13    | 14    | 15    | 16    | 17    | 18    | 19    | 20    | 21    |       |
|-----------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
