COVID-19 among bartenders and waiters before and after pub lockdown

By Methi et al., 2021

Supplementary Table A: Overview of local restrictions	p. 2-3
Supplementary Figure A: Estimated rates of confirmed COVID-19 for bartenders	p. 4
Supplementary Figure B: Estimated rates of confirmed COVID-19 for waiters	p. 4

Supplementary Table A: Overview of local restrictions by municipality, type of restriction (1 = no local restrictions; 2 = partial ban; 3 = full ban) and week of implementation. Municipalities with no ban (1) was randomly assigned a hypothetical week of implementation (in parentheses) to allow us to use them as a comparison group.

Municipality	Restriction type	Week
Aremark	1	(46)
Asker	3	46
Aurskog-Høland	2	46
Bergen	2	45
Bærum	3	46
Drammen	3	46

Vestby	1	(46)
Våler	1	(46)
Øvre Eiker	2	51
Ål	1	(46)
Ås	2	46

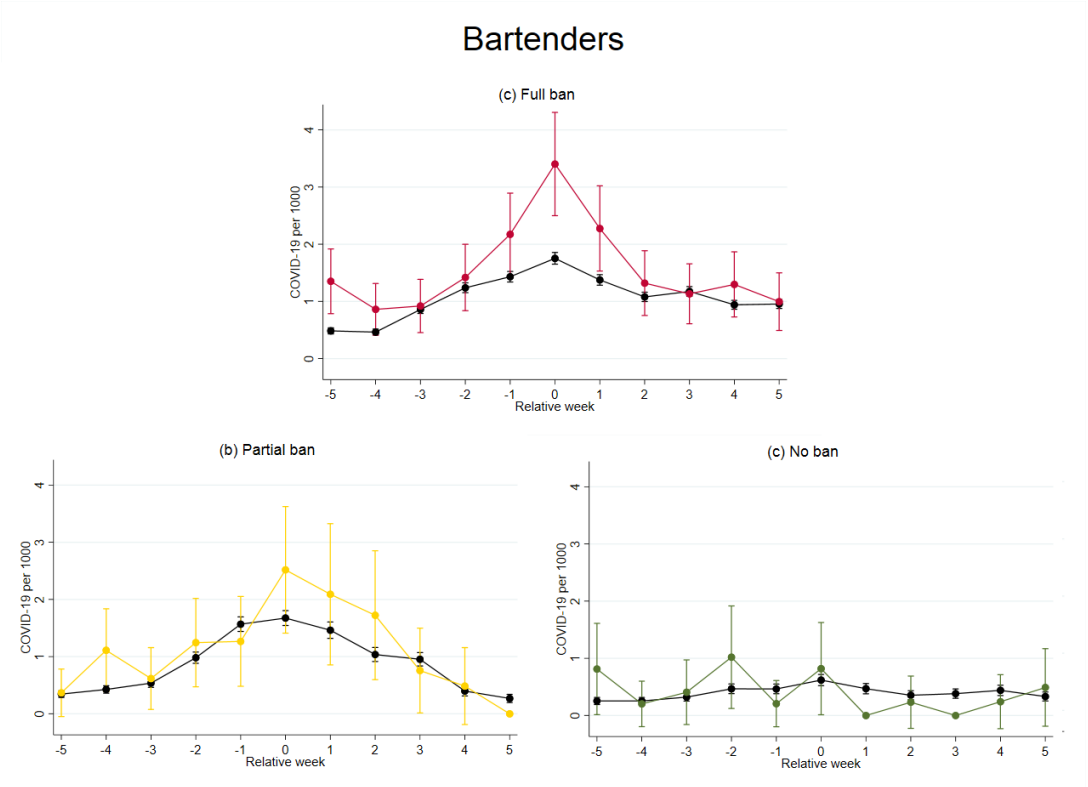

Note: The random assignment was conducted so that the share of municipalities with ban (2 and 3) within each implementation weeks was similar to the share of municipalities without ban (1) within the same (actual) implementation weeks. Thus, municipalities without ban are only attributed to hypothetical weeks that are also actual implementation weeks for the municipalities with ban.

¹Jevnaker removed their partial ban on alcohol in week 50.

²Nordre Follo changed from a full ban to a partial ban in week 51

³Sigdal removed their partial ban on alcohol in week 52

Supplementary Figure A: Estimated rates of confirmed COVID-19 for bartenders separately (colored lines) and all other occupation (black lines) per week.

Supplementary Figure B: Estimated rates of confirmed COVID-19 for waiters separately (colored lines) and all other occupation (black lines) per week.
