

**Table S4.** The mean values and t-test and two-way ANOVA interaction p-values for all detected metabolites in CSF. P-values < 0.05 are colored red, p-values > 0.05 < 0.1 are colored orange.

Metabolite information				p-values			Mean [95%CI] Uning subjects with p of fasted >60%	
Metabolite name	Chemical class	Enzyme	Units	p-value AD vs Control	p-value Gender x Disease interaction	p-value Race x Disease interaction	Control mean [95%CI]	AD mean [95%CI]
