

S1 Appendix: Racial/ethnic distributions within each occupational subset displayed in Main Text Figures

Updated April 5, 2021

Table S1.1: Racial/ethnic distribution of all recent workers by sex

Race/Ethnicity	Male		Female	
	N	Percent (%)	N	Percent (%)
White	675,542	63.1	632,421	62.4
Black	76,649	10.6	87,168	12.7
Latino	133,868	17.7	120,853	15.8
Chinese	13,095	1.3	14,265	1.5
Filipino	7,798	0.8	10,403	1.1
Vietnamese	5,150	0.6	5,519	0.6
Korean	4,303	0.5	4,684	0.5
Other Asian	22,072	2.5	18,654	2.2
Native American	7,018	0.6	7,059	0.6
Pacific Islander	1,402	0.2	1,353	0.2
Mixed Race	17,555	2.0	17,857	2.1
Other Race	1,695	0.2	1,778	0.2
Total	966,147	100	922,014	100

Note: Data are from the 2018 American Community Survey (ACS). Percentages are calculated using weights provided by the ACS; sample sizes (N) are unweighted. The percentages in this table correspond to those displayed in panel 1 in Figs 1-2.

Table S1.2: Racial/ethnic distribution of male frontline workers by quartile of occupational standing

Race/Ethnicity	Quartile of occupational standing					Total N
	1st Quartile	2nd Quartile	3rd Quartile	4th Quartile	All frontline workers	
White	53.6	62.1	71.2	69.6	59.0	399,608
Black	13.5	12.4	8.4	6.6	12.2	55,605
Latino	26.6	17.8	12.9	8.5	21.6	101,260
Chinese	0.7	0.9	1.0	2.5	0.9	5,257
Filipino	0.6	0.9	0.8	2.8	0.8	4,751
Vietnamese	0.5	0.8	0.4	1.0	0.6	3,236
Korean	0.2	0.4	0.5	1.1	0.3	1,881
Other Asian	1.3	1.7	2.1	5.3	1.7	9,240
Native American	0.8	0.6	0.5	0.3	0.7	5,329
Pacific Islander	0.2	0.2	0.1	0.1	0.2	1,009
Mixed Race	1.9	2.0	2.0	2.1	1.9	11,022
Other Race	0.2	0.2	0.2	0.3	0.2	1,077
Total Percent	100	100	100	100	100	
Total N	327,280	154,040	91,625	26,330	599,275	

Note: Data are from the 2018 American Community Survey (ACS). Percentages are calculated using weights provided by the ACS; sample sizes (N) are unweighted. Occupational standing is defined as the percentage of ACS respondents reporting this occupation title who completed at least one year of college education. Occupational standing is then divided into quartiles. The 1st quartile represents the lowest quartile of occupational standing and the 4th quartile the highest quartile of occupational standing. The percentages in this table correspond to those displayed in panel 2 of Figs 1 and 3.

Table S1.3: Racial/ethnic distribution of female frontline workers by quartile of occupational standing

Race/Ethnicity	Quartile of occupational standing					Total N
	1st Quartile	2nd Quartile	3rd Quartile	4th Quartile	All frontline workers	
White	47.6	55.2	65.8	71.7	57.0	285,517
Black	15.7	17.0	11.8	9.4	14.5	48,456
Latino	28.3	18.1	14.3	7.2	19.3	70,995
Chinese	1.1	1.3	1.2	1.5	1.2	5,765
Filipino	1.0	1.3	1.1	3.0	1.4	6,232
Vietnamese	0.7	1.3	0.4	0.7	0.8	3,542
Korean	0.4	0.5	0.5	0.8	0.5	2,189
Other Asian	1.9	1.8	1.6	3.3	2.0	8,247
Native American	0.9	0.6	0.6	0.3	0.7	3,989
Pacific Islander	0.2	0.2	0.2	0.1	0.2	719
Mixed Race	2.1	2.3	2.2	1.9	2.2	8,948
Other Race	0.3	0.3	0.2	0.2	0.3	963
Total Percent	100	100	100	100	100	
Total N	146,643	140,283	92,265	66,371	445,562	

Note: Data are from the 2018 American Community Survey (ACS). Percentages are calculated using weights provided by the ACS; sample sizes (N) are unweighted. Occupational standing is defined as the percentage of ACS respondents reporting this occupation title who completed at least one year of college education. Occupational standing is then divided into quartiles. The 1st quartile represents the lowest quartile of occupational standing and the 4th quartile the highest quartile of occupational standing. The percentages in this table correspond to those displayed in panel 2 of Figs 2 and 4.

Table S1.4: Racial/ethnic distribution of male frontline workers at highest risk of exposure to infection by quartile of occupational standing

Race/Ethnicity	Quartile of occupational standing					Total N
	1st Quartile	2nd Quartile	3rd Quartile	4th Quartile	All in risk quartile	
White	51.7	57.4	65.4	67.2	59.1	71,144
Black	17.1	17.7	12.5	7.3	14.4	11,717
Latino	24.8	16.9	14.4	8.5	17.4	15,040
Chinese	0.6	0.9	0.8	2.7	1.1	1,234

Other Race	0.2	0.3	0.3	0.3	0.2	200
Total Percent	100	100	100	100	100	
Total N	34,776	27,899	23,147	21,913	107,735	

Note: Data are from the 2018 American Community Survey (ACS). Percentages are calculated using weights provided by the ACS; sample sizes (N) are unweighted. Workers are considered to be at highest risk of exposure to infection if the average exposure to infection for their occupation in the O*NET data falls in the highest quartile of the occupations in the analysis. Occupational standing is defined as the percentage of ACS respondents reporting this occupation title who completed at least one year of college education. Occupational standing is then divided into quartiles. The 1st quartile represents the lowest quartile of occupational standing and the 4th quartile the highest quartile of occupational standing. The percentages in this table correspond to those displayed in panel 3 of Figs 1 and 3.

Table S1.5: Racial/ethnic distribution of male frontline workers at highest risk of physical proximity to others by quartile of occupational standing

Race/Ethnicity	Quartile of occupational standing					Total N
	1st Quartile	2nd Quartile	3rd Quartile	4th Quartile	All in risk quartile	
White	53.5	55.9	64.1	69.5	58.7	77,439
Black	9.0	14.9	12.3	6.5	11.6	10,374
Latino	31.9	19.1	14.5	8.4	20.0	18,645
Chinese	0.6	1.4	1.0	2.4	1.3	1,597

Vietnamese	1.1	2.0	0.6	1.2	1.2	373
Korean	0.4	1.2	0.3	1.2	1.0	328
Other Asian	1.1	3.3	2.1	6.1	4.5	1,409
Native American	0.7	1.0	0.6	0.3	0.5	185
Pacific Islander	0.1	0.5	0.2	0.1	0.2	44
Mixed Race	1.3	2.0	2.7	1.9	2.0	628
Other Race	0.2	0.3	0.4	0.3	0.3	67
Total Percent	100	100	100	100	100	
Total N	4,281	3,596	4,332	21,004	33,213	

Note: Data are from the 2018 American Community Survey (ACS). Percentages are calculated using weights provided by the ACS; sample sizes (N) are unweighted. Because working indoors rather than outdoors reflects high risk, we take a maximum of the O*NET values for two variables measuring working outdoors and designate workers whose occupations fall in the lowest quartile of this measure as having the highest risk of working indoors. Occupational standing is defined as the percentage of ACS respondents reporting this occupation title who completed at least one year of college education. Occupational standing is then divided into quartiles. The 1st quartile represents the lowest quartile of occupational standing and the 4th quartile the highest quartile of occupational standing. The percentages in this table correspond to those displayed in panel 7 of Figs 1 and 3.

Table S1.9: Racial/ethnic distribution of female frontline workers at highest risk of exposure to infection by quartile of occupational standing

Race/Ethnicity	Quartile of occupational standing					Total N
	1st Quartile	2nd Quartile	3rd Quartile	4th Quartile	All in risk quartile

Note: Data are from the 2018 American Community Survey (ACS). Percentages are calculated using weights provided by the ACS; sample sizes (N) are unweighted. Because working indoors rather than outdoors reflects high risk, we take a maximum of the O*NET values for two variables measuring working outdoors and designate workers whose occupations fall in the lowest quartile of this measure as having the highest risk of working indoors. Occupational standing is defined as the percentage of ACS respondents reporting this occupation title who completed at least one year of college education. Occupational standing is then divided into quartiles. The 1st quartile represents the lowest quartile of occupational standing and the 4th quartile the highest quartile of occupational standing. The percentages in this table correspond to those displayed in panel 7 of Figs 2 and 4.
