

Characteristics of the primary antibodies used for IHC

Antibody	Source	Host/Isotype	Dilution FFPE	Dilution FF	Secondary	Tertiary
Pepsinogen	Abcam	Mouse/IgG1	1:700	N/A	Goat anti mouse	AP/Blue
H+K+ATPase	DAKO	Mouse/IgG1	1:1000	1:4000	Goat anti mouse	HRP/DAB
MUC5AC	Abcam	Mouse/IgG1	1:500	1:50/ 1:100	Goat anti mouse	HRP/DAB
MUC2	ThermoFisher Scientific	Mouse/IgG1	1:500	1:200	Goat anti mouse	AP/Blue
Defensin6 α	Sigma	Rabbit/ Polyclonal	1:5000	N/A	Swine anti rabbit	AP/Blue
Defensin5 α	Abcam	Mouse/IgG1	N/A	1:100	Rabbit anti mouse	HRP/DAB

Supplemental table 1. Antibody sources, dilutions and processing used within this manuscript. FFPE= formalin fixed paraffin embedded, FF= fresh frozen and N/A = not applicable; antibody not used for this purpose. AP= alkaline phosphatase and HRP= horseradish peroxidase.
