

## **Supplementary Materials**

**Emotional symptoms, mental fatigue and behavioral adherence after 72 continuous days of strict lockdown during the COVID-19 pandemic in Argentina**

Torrente F, Yoris A, Low DM, Lopez PL, Bekinschtein P, Vázquez G, Manes F,  
Cetkovich M

## 1. Contextual analysis

### 1.1. Stringency

**Table S1. Countries with most prolonged strict quarantines (continuous days with a quarantine stringency index above 85).**

<b>Rank</b>	<b>Country</b>	<b>Days</b>
1	Kosovo	75
2	Honduras	74
2	Peru	74
2	Puerto Rico	74
3	Ecuador	73
4	Philippines	72
5	Argentina	70
5	Dominican Republic	70
5	Morocco	70
6	Bolivia	69
6	El Salvador	69
7	Guatemala	68
8	Saudi Arabia	67
9	Nepal	66
9	Libya	66
9	Bahamas	66
10	Paraguay	65
10	Palestine	65
10	Ukraine	65
11	Kenya	63

**Figure S1. Stringency Index over time.** Shown are top five ranked countries by mean stringency index, Argentina, ten largest countries in population and bottom three ranked countries. Note Argentina did not lower its stringency index below 85/100 once the lockdown began, placing it in the top ten countries with longest stringent quarantine (see Supplementary Table S1).

## 1.2. Mobility

Mobility trends are measured across six broad categories: (1) Residential: places of residence.

(2) Grocery & Pharmacy stores: places like grocery markets, food warehouses, farmers

markets, specialty food shops, drug stores, and pharmacies. (3) Workplaces: places of work.

(4) Parks: places like local parks, national parks, public beaches, marinas, dog parks, plazas,

and public gardens. (5) Transit stations: places like public transport hubs such as subway,

bus, and train stations. (6) Retail & Recreation: places like restaurants, cafes, shopping

centers, theme parks, museums, libraries, and movie theaters.

See Supplementary Figure S1 to observe how mobility decreased by 20% to almost 100%

during the quarantine while time at home increased to up to 40% as compared to baseline

(02/15/2020). The order of largest decreases where: parks, retail and recreation, transit stations, workplaces, and grocery and pharmacy.

**Figure S2. Decrease in mobility during the quarantine in Argentina and increase in the time spent at home.**
