

**Supplemental Figure 1: Graphical abstract.**

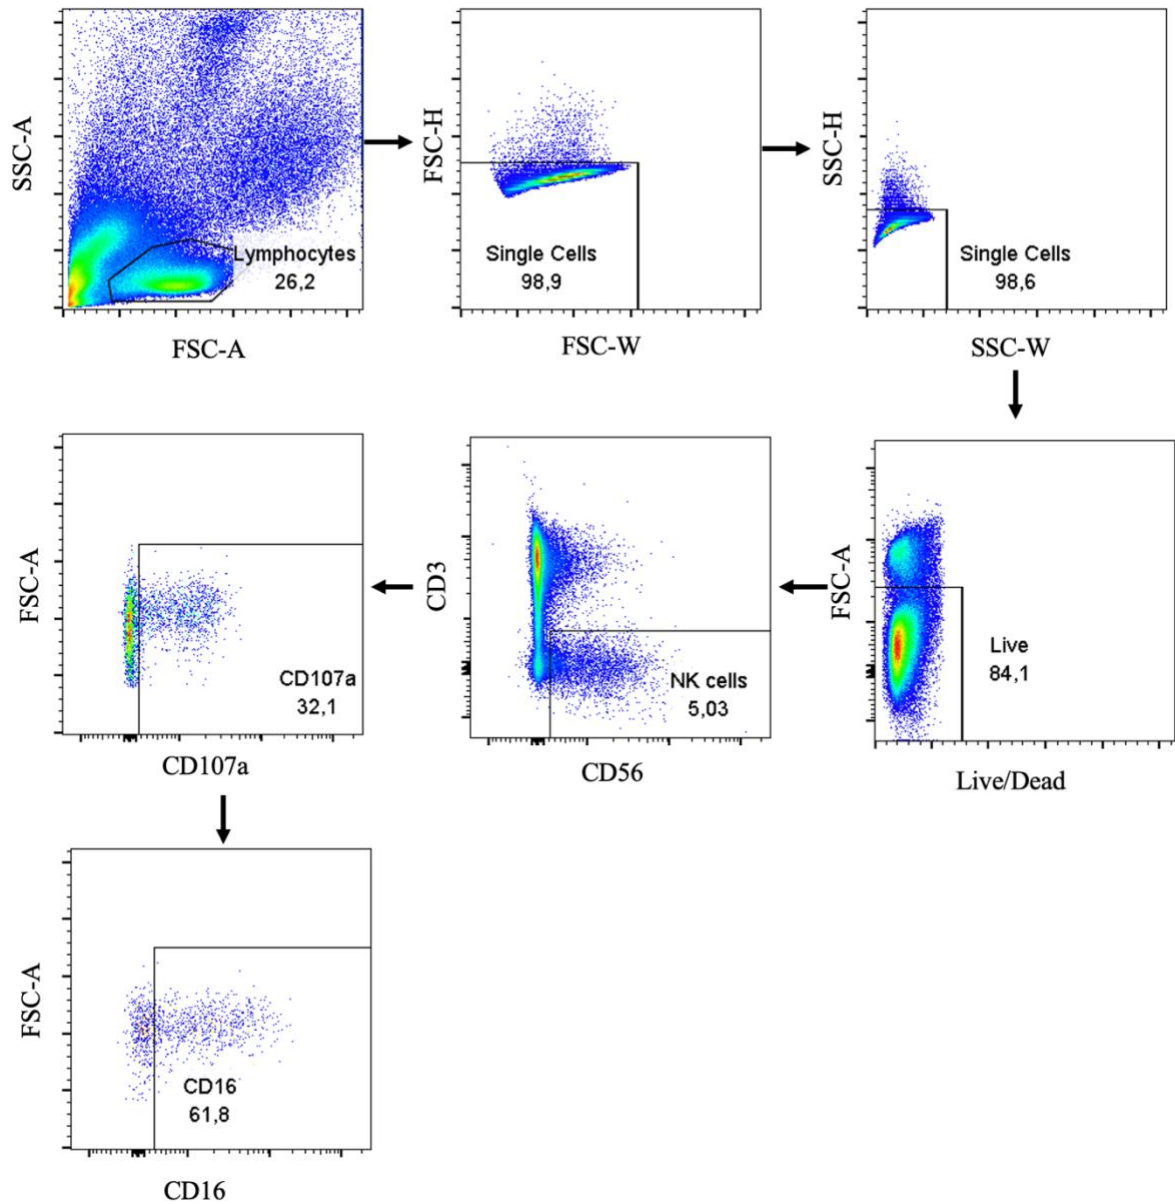

**Supplemental Figure 2: Antibody and staining validation.** A) NK and T cell pellets for positive/ negative validation. B) Antibody dilutions on tonsil tissue. Green boxes indicate the concentration used for multiplex. C) Monoplex/Multiplex staining on HGSC optimization tissue. Image captured on the Mantra (Akoya Biosciences) at a magnification of 20x.

Tissue	PanCk Pathology Views	InForm Segmentation	Pathologist Segmentation	DAPI Pathology Views	InForm Cell Segmentation	InForm Count	Pathologist Count	InForms accuracy in %
1 (C56)						119	175	68%
2 (F76)						130	147	88%
3 (E171)						143	156	92%
4 (C12)						135	142	95%
5 (C221)						143	190	75%
6 (C196)						105	113	93%
7 (C104)						116	105	110%
8 (C230)						71	60	118%
9 (C162)						70	67	104%
10 (E272)						83	73	113%

**Supplemental Figure 3: Representative digital and manual pathology segmentation and scoring.** Tissue segmentation was assigned to each core after training of the machine learning algorithm in InForm digital pathology software. Pathologist TA segmented the same cores, blinded to the InForm outcomes. Pathology views, InForm segmentation and the pathologist's segmentation are shown. Cell segmentation was trained to recognize individual cell nuclei and InForm or pathologist TA independently counted individual cells. The range and variation between counts is shown.

**Supplemental Figure 4: Pearson correlation between cell density quantified in duplicate cores (Core A vs. Core B) isolated from the same patient tumours.**

Supplementary Figure 5. Gating strategy.

**Supplementary Table 1: Aggregate clinical data.**

Characteristics	Category	N (%)
Patients	Number of patients represented in TMA	1,145 (100%)
Age	Median (range)	62 (26-91)
Diagnosis Year	1992-1995	14 (1.2%)
	1996-2000	104 (9.1%)
	2001-2005	302 (26.4%)
	2006-2010	482 (42.1%)
	2011-2012	169 (14.8%)
	2013-2014	49 (4.3%)
Tumour Grade	Grade 2	132 (11.5%)
	Grade 3	850 (74.2%)
FIGO Tumour Stage	I	76 (6.6%)
	II	120 (10.5%)
	III	789 (68.9%)
	IV	107 (9.3%)
BRCA Status	BRCA WT	330 (28.8%)
	BRCA1 mutated	52 (4.5%)
	BRCA2 mutated	19 (1.7%)
	BRCA1/2 mutated	2 (0.2%)
Debulking Status	No residual disease	277 (24.2%)
	Residual disease	584 (51%)
