

### Supplementary Table 1

Examples of patient responses to the symptom pictograms and recommendations for improvement.

Intended Symptom	Examples of Participant Feedback to Pictogram
Belching	"...belching kind of thing"  "It's a difficult one to actually image without changing the person's shape"
Excessive Fullness	"stomach heaviness"  "maybe the feeling full, the stomach full and, maybe, you know, arrows pushing out to be like, you know, it's full"
Heartburn	"heartburn and acid going up through the back of your throat"  "Bad fit"
Nausea	"... that 'yuck' flushing feeling that you get when you're feeling nauseous"  "I'd probably do a squiggly line as opposed to a circle-y line, that is probably more like hypnosis"
Reflux	"Vomiting slash maybe kind of reflux-y again"  "Maybe change the colour? Of the stomach?"
Upper Abdominal Pain	"I suppose that is abdo[minal] pain or yeah, a bit of a burning sensation in your stomach maybe"
Vomiting	"Definitely vomiting" "vomiting. That is kind of obvious"
Bloating	"There's a balloon, so it's obviously bloating" "... [the balloon should be] inside [the stomach]. I think that would be better yeah"

(Supplementary Table 1 continued)

(Supplementary Table 1 continued)

Intended Symptom	Examples of Participant Feedback to Pictogram
Early Satiety	<p data-bbox="512 271 890 304">“Restricted or tight stomach”</p> <p data-bbox="512 344 1358 450">“The picture is a little harder than the other ones.... wording is a little harder than the other ones...and the combination of the two might miss some people”</p> <p data-bbox="512 479 1310 584">“I don’t know how you would make a picture better than that one...maybe changing the wording might help people understand the picture better?”</p>
