Supplementary Table 2 shows the results of stratified analyses by sex and race. The analyses were conducted in the main analytical dataset, and in a restricted dataset including only ZIP codes in which PM<sub>2.5</sub> and NO<sub>2</sub> did not exceed the NAAQS during the study period.

IRR= incidence rate ratio; 95% CI= 95% confidence intervals.

**Supplementary Table 3.** Baseline characteristics of person years by status of enrollment in the fee for service, part A, and part B programs.
