To whom it may concern:

Title: Combining faecal Immunochemical testing with blood test results to identify patients with symptoms at risk of colon cancer: a consecutive cohort of 15,504 patients tested in primary care

This letter is to confirm that the work referenced above was conducted as a service evaluation with registration, review and approval process within the OUH Datix governance structure (Service evaluation registration identifier: CSS-BIO-3-4730).

As service evaluation, this work is not subject to the Department of Health's *UK Policy Framework for Health and Social Care Research* (2017). It requires neither sponsorship nor research ethics review.

This opinion can be reviewed by reference to the HRA's algorithm, available at <http://www.hra-decisiontools.org.uk/research/> and attendant leaflet, *Defining Research*, or by reference to The Health Care Quality Improvement Partnership (HQIP)'s *Guide for Clinical Audit, Research and Service review*.

Should you require further information, please do not hesitate to contact me.

Sincerely,

Dr Karen Melham
Sponsorship and Ethics Lead
