[^] Of 195 target pharmacies that had participated in the previous PHP study, 108 (55%) participated in the current survey. Of 87 that did not participate: 55 (63%) failed to complete the questionnaire after three reminders, 15 (17%) reported that the initial respondent had left and no one else was willing to participate, 8 (9%) were unreachable, 3 (3%) reported that the management did not approve participation, 2 (1%) were undergoing transition, 1 (1%) was closed, and 3 (3%) had other reasons (no access to smartphone or computer, preferred face-to-face interview, sold the pharmacy).

^{*} Indicates significant difference between counties (p<0.05), based on chi square test or analysis of variance for means

¹ An individual medical record is a document detailing the medications an individual patient is on, indications and drug allergies; may also include other clinical information.

² Chain network was defined as 6 or more branches nationwide, derived from chain size distribution pattern; 79 (73%) pharmacies were single branch, 16 (15%) were part of a 2-5 branch network, and 13 (12%) were part of a chain network

³ Green Cross is a professional network of pharmacies owned by pharmacists; Pharmnet is for pharmaceutical technologists

⁴ Excludes 18 pharmacies that responded "not applicable" since they have only one staff member

⁵Other screening services included; typhoid testing (n=4) and tuberculosis screening (n=2)

STI: Sexually transmitted infection

B. Characteristics of respondents
