

**Supplementary Figure S1** Diagram explaining the follow up time for PCR positive cases and their matched PCR negative control

**Supplementary table S1** Individuals that had symptoms at their second test within population that had a positive PCR test (post hoc population) during the follow up period and results of univariable and multivariable logistical regression

	Number asymptomatic at positive test	Number with symptoms at positive test (% of total with symptom information)	Number with missing symptom information at second test (%)	Univariable odds ratio logistic regression for symptoms at second test	Multivariable odds ratio logistic regression for symptoms at second test * adjusted for all variables reported
<b>First test</b>					
Negative (Control)	2,983	5860 (66.3)	2875 (24.5)	1	1
Positive (Case)	1,163	499 (30)	599 (26.5)	0.22 (0.19 0.24)	0.23 (0.2 0.26)
