Supplementary Table 4: Number of lives saved by vaccinating 1,000 individuals, either allocating doses to 65-74 year olds (policy S), or to front line workers (policy F). The ratio $\frac{LS_j}{LF_j}$ shows the relative number of lives saved comparing the two policies. Results shown for each US state per race/ethnicity categories.

"NH" stands for "Non-Hispanic", "2+ races" stands for "Two or more races", "Native" stands for "American Indian or Alaska Native", "NHPI" stands for "Native Hawaiian or Other Pacific Islander"

Supplementary Table 5: Number of years of life saved by vaccinating 1,000 individuals, either allocating doses to 65-74 year olds (policy S), or to front line workers (policy F). The ratio $\frac{YS_j}{YF_j}$ shows the relative number of lives saved comparing the two policies. Results shown for each US state per race/ethnicity categories.

"NH" stands for "Non-Hispanic", "2+ races" stands for "Two or more races", "Native" stands for "American Indian or Alaska Native", "NHPI" stands for "Native Hawaiian or Other Pacific Islander"
