

**Mapping of *cis*-regulatory variants by differential allelic expression analysis identifies candidate risk variants and target genes of 27 breast cancer risk loci**

Joana M. Xavier *et al.*

**Table S1: SNPs associated with BC risk retrieved from GWAS Catalog using a significance threshold for association signals of p-value  $\leq 1.0E-05$ .**

**Access Link:** [Xavier etal 2022 TableS1](#)

**Table S2: Previously reported target genes of *cis*-acting regulatory variation in post-GWAS studies for breast cancer.** Information includes whether daeSNPs were identified for each gene (daeGene) and whether they were reported by GTEx (v7) as having significant association with eQTLs variants (eGenes) in breast mammary tissue.

**Access Link:** [Xavier etal 2022 TableS2](#)

**Table S3: Genomic annotation of aeSNPs.** Annotations were retrieved according to the Ensembl database (GRCh38.p13). daeSNP TRUE corresponds to aeSNPs displaying DAE in at least 3 and 10% of the number\_het\_samples and FALSE to non-daeSNPs.

**Access Link:** [Xavier etal 2022 TableS3](#)

**Table S4: Summary statistics on the bi-allelic differential expression for each aeSNP analysed.** Legend: Number\_samples - total number of samples analysed; number\_het\_samples - number of heterozygous samples; number\_het\_dae\_samples - number of heterozygous samples displaying DAE; proportion\_het\_samples - proportion of heterozygous samples amongst total number of samples; proportion\_het\_dae\_samples - proportion of heterozygous samples showing DAE amongst total number of samples; proportion\_het\_dae\_het\_samples - proportion of heterozygous samples showing DAE amongst heterozygous samples; daeSNP - TRUE corresponds to a daeSNP and FALSE to a non-daeSNP.

**Access Link:** [Xavier etal 2022 TableS4](#)

**Table S5: Mean of the absolute values of AE ratios and genomic location, for each aeSNP analysed.** Legend: daeSNP - TRUE corresponds to a daeSNP and FALSE to a non-daeSNP.

**Access Link:** [Xavier\\_etal\\_2022\\_TableS5](#)

**Table S6: List of identified maeSNPs (SNPs displaying mono-allelic expression) in normal breast tissue.** Local gene(s) corresponds to the gene(s) annotated within 5Kb of the maeSNP.

#Information retrieved from the Geneimprint database: (<https://www.geneimprint.com/site/genes-by-species.Homo+sapiens>) and from Goovaerts et al. 2018.

**Access Link:** [Xavier\\_etal\\_2022\\_TableS6](#)

**Table S7: Annotation of significant daeQTLs.** Mapping Approach corresponds to the approach used in the daeQTL analysis.

**Access Link:** [Xavier\\_etal\\_2022\\_TableS7](#)

**Table S8: Genomic annotation and classification of genes harbouring aeSNPs as daeGenes, eGenes, maeGenes, daeQTLs genes, GWAS risk genes and risk daeQTLs genes. Legend:** daeGene\_Breast - genes which harbour daeSNPs; eGene\_Breast\_Mammary - genes associated with an eQTL variant (GTEx v7); maeGenes\_Breast - genes which harbour maeSNPs; daeQTL\_Gene - genes which harbour daeQTLs variants; gwasGene - genes which harbour GWAS hit variants and their proxies (using an LD  $r^2 \geq 0.4$ ); risk\_daeQTL\_Gene - genes which harbour daeQTLs.

**Access Link:** [Xavier\\_etal\\_2022\\_TableS8](#)

**Table S9: List of candidate risk-rSNPs identified. Legend:** Candidate risk-rSNPs were defined as daeQTLs with an  $r^2 \geq 0.4$  with a BC GWAS hit variant; Mapping Approach

corresponds to the approach used in the daeQTL analysis; Pubmed ID - GWAS\_SNP original publication; R\_squared - LD between the daeQTL and the GWAS\_SNP.

**Access Link:** [Xavier etal 2022 TableS9](#)

**Table S10: List of daeQTLs identified with an  $0.2 \leq r^2 < 0.4$  with a BC GWAS hit variant.**

Legend: daeGene\_hgnc\_symbol - daeSNP gene name; daeQTL\_gene\_hgnc\_symbol - daeQTL gene name; Mapping Approach - approach used in the daeQTL analysis; R\_squared - LD between the daeQTL and the GWAS\_SNP.

**Access Link:** [Xavier etal 2022 TableS10](#)

**Table S11: Ninety-two candidate risk-SNPs identified for the *ATG10* gene.** Genomic location, gene symbol and consequence type are indicated.

**Access Link:** [Xavier etal 2022 TableS11](#)

**Table S12: Allelic miRNA binding predictions for candidate risk SNPs located in the 3'UTR of the *RPS23* gene.** Legend: Mirbase.ID - miRNA ID; Site.Type: type of miRNA binding; UTR.start - start position at the UTR where miRNA is predicted to bind; UTR.end - end position at the UTR where miRNA is predicted to bind; context...score - context++ score for a specific allele given by TargetScan; miRNA.family - family of miRNAs predicted to bind to allele site; Prediction\_allele - SNP allele for which the prediction was obtained; snp\_id - SNP ID; hgnc\_symbol - HGNC gene name; transcript\_id - gene transcript ID; chr\_name - chromosome number of the gene; alleles - alleles of the SNP; minor\_allele - SNP's minor allele; position\_in\_sequence - Position of the SNP allele in the queried UTR sequence; chr\_strand - chromosome strand of the predicted site.

**Access Link:** [Xavier etal 2022 TableS12](#)

**Table S13: sQTL analysis for the ATG10 gene using data from GTEx\_MammaryTissue, TCGA-BRCA\_Primary-Solid-Tumour and TCGA-BRCA\_Solid-Tissue-Normal and carried out with sQTLseeker.** Legend: snplid - SNP name; genelid - gene name; F - F score; nb.groups - the number of genotype groups (2 or 3); md - the maximum difference in relative expression between genotype groups; tr.first/tr.second - the transcript IDs of the two transcripts that change the most (and symmetrically); nb.perms - the number of permutation used for the P-value computation; pvalue - P-values for each pair of gene/SNP testing the association between the genotype and transcript relative expression; R\_squared - LD between the SNP and the GWAS lead SNP rs7707921.

**Access Link:** [Xavier etal 2022 TableS13](#)

**Table S14: CLIP data of bound RBPs at two candidate risk-rSNPs for the *ATG10* gene.**

SNP id	Ref allele	Alt allele	SNP position	RBP	Tissue type	RBP occupancy Position	Strand	CLIP-seq technology and peak calling method	Score	Phast Cons score	Phylo P score	Data accession
rs111549985	C	G	chr5:81972250-81972251	RBP_occupancy	HeLa	chr5:81972249-81972269	+	PIP-seq	443.53	0.354	0.267	GSE49309
