

Supplementary Material

Supplementary Table 1. Detailed descriptions and characteristics of investigations included in the systematic review.

Author (ref)	Country	WHO Region	Income Status	HRP Status	No. Index Cases	No. Households	No. Household Contacts, Included/Total	No. Secondary Cases	Timing of Recruitment	Household Study Design	Secondary Case Ascertainment Methods(s)	Data Collection Method	Duration of Follow Up
Angulo-Bazan, Y. et al. ¹	Peru	AMR	Upper-Middle	Yes	52	52	236	125 [serology]; 162 [symptoms]	23 April 2020 - 2 May 2020	Yes	Serology [hSAR]; symptoms only [hSCAR]	Retrospective	Unclear
Areekal, B. et al. ²	India	SEAR	Lower-Middle	No	212	212	849	221 [lab diagnosis]; 132 [symptoms]	June 2020 - July 2020	No	Unclear [hSAR]; symptoms only [hSCAR]	Prospective	14 days or less
Bi, Q. et al. ³	China	WPR	Upper-Middle	No	244	Unknown	686	77	14 January 2020 - 12 February 2020	No	RT-PCR	Retrospective	14 days or less
Boscolo-Rizzo, P. et al. ⁴	Italy	EUR	High	No	179	179	121 [hSAR]; 296 [hSCAR]	54 [RT-PCR]; 233 [symptoms]	March 2020 - April 2020	Yes	RT-PCR [hSAR]; symptoms only [hSCAR]	Retrospective	Unclear
Buchan, S.A. et al. ⁵	Canada	AMR	High	No	5617	5617	15597	3397	7 February 2021 - 27 February 2021	Yes	Unclear	Prospective	14 days or less
Burke, R.M. et al. (A) ⁶	United States of America	AMR	High	No	69	69	193/201	18 [RT-PCR]; 62 [symptoms]	January 2020 - April 2020	Yes	RT-PCR [hSAR]; symptoms only [hSCAR]	Prospective	14 days or less
Burke, R.M. et al. (B) ⁷	United States of America	AMR	High	No	9	9	15	2 [RT-PCR]; 8 [symptoms]	January 2020	No	RT-PCR [hSAR]; symptoms only [hSCAR]	Prospective	14 days or less
Carazo, S. et al. ⁸	Canada	AMR	High	No	3823	3823	9096	2718	1 March 2020 - 14 June 2020	No	Symptoms	Retrospective	14 days or less
Cerami, C. et al. ⁹	United States of America	AMR	High	No	100	100	176/182	106 [RT-PCR or serology]; 91 [symptoms]	April 2020 - October 2020	Yes	RT-PCR or serology [hSAR]; symptoms only [hSCAR]	Prospective	Greater than 14 days
Chaw, L. et al. ¹⁰	Brunei Darussalam	WPR	High	No	19	19	123	16	March 2020	No	RT-PCR	Prospective	14 days or less
Cheng, H.Y. et al. ¹¹	Taiwan, China	WPR	High	No	100	100	151	10 [RT-PCR]; 7 [symptoms]	15 January 2020 - 18 March 2020	No	RT-PCR [hSAR]; symptoms only [hSCAR]	Prospective	14 days or less
Dambadarjaa, D. et al. ¹²	Mongolia	WPR	Lower-Middle	No	97	97	325	60	November 2020	No	RT-PCR	Prospective	14 days or less
Dattner, I. et al. ¹³	Israel	EUR	High	No	637	637	3353	1510 [RT-PCR]; 1243 [symptoms]	17 March 2020 - 3 May 2020	Yes	RT-PCR [hSAR]; symptoms only [hSCAR]	Retrospective	Unclear
Gomaa, M.R. et al. ¹⁴	Egypt	EMR	Lower-Middle	Yes	23	23	98	88 [RT-PCR or serology]; 52 [symptoms]	April 2020 - October 2020	Yes	RT-PCR or serology [hSAR]; symptoms only [hSCAR]	Prospective	14 days or less
Grijalva, C.G. et al. ¹⁵	United States of America	AMR	High	No	101	101	137/191	48	April 2020 - September 2020	Yes	RT-PCR	Prospective	14 days or less
Heredia-Melo, D.C. et al. ¹⁶	Colombia	AMR	Upper-Middle	Yes	99	99	315/334	140	September 2020 - January 2021	No	RT-PCR and symptoms	Prospective	14 days or less
Hsu, C.Y. et al. ¹⁷	Taiwan, China	WPR	High	No	18	26	102	47	28 January 2020 - 28 February 2021	Yes	RT-PCR	Retrospective	14 days or less
Hu, P. et al. ¹⁸	China	WPR	Upper-Middle	No	82	82	267	46	Before 5 March 2020	No	RT-PCR	Retrospective	14 days or less
Hu, S.X. et al. ¹⁹	China	WPR	Upper-Middle	No	284	115	1021	99	23 January 2020 - 2 April 2020	No	RT-PCR	Prospective	14 days or less
Islam, F. et al. ²⁰	India	SEAR	Lower-Middle	No	99	99	254/318	141	15 December 2020 - 16 June 2021	Yes	RT-PCR	Prospective	Greater than 14 days
Jashaninejad, R. et al. ²¹	Iran (Islamic Republic of)	EMR	Lower-Middle	Yes	323	323	989	314	May 2020 - July 2020	No	RT-PCR	Prospective	14 days or less
Jeewandara, C. et al. ²²	Sri Lanka	SEAR	Lower-Middle	No	39	39	1093	85	15 April 2020 - 19 May 2020	No	RT-PCR	Prospective	14 days or less

Author (ref)	Country	WHO Region	Income Status	HRP Status	No. Index Cases	No. Households	No. Household Contacts, Included/Total	No. Secondary Cases	Timing of Recruitment	Household Study Design	Secondary Case Ascertainment Methods(s)	Data Collection Method	Duration of Follow Up
Jeong, E.K. et al. ²³	Republic of Korea	WPR	High	No	30	30	119	9	24 January 2020 - 10 March 2020	No	Symptoms	Retrospective	14 days or less
Jing, Q.L. et al. ²⁴	China	WPR	Upper-Middle	No	159	159	529	93	7 January 2020 - 18 February 2020	Yes	RT-PCR	Retrospective	14 days or less
Korean CDC ²⁵	Republic of Korea	WPR	High	No	9	9	119	9	24 January 2020 - 10 March 2020	No	Unclear	Prospective	14 days or less
Koureas, M. et al. ²⁶	Greece	EUR	High	No	30	30	164	62	8 April 2020 - 4 June 2020	No	RT-PCR	Prospective	14 days or less
Kuba, Y. et al. ²⁷	Japan	WPR	High	No	78	78	174	21 [RT-PCR]; 21 [symptoms]	14 February 2020 - 31 May 2020	Yes	RT-PCR and symptoms [hSAR]; symptoms only [hSCAR]	Prospective	14 days or less
Kuwelker, K. et al. ²⁸	Norway	EUR	High	No	112	112	179/245	85 [RT-PCR or serology], 130 [symptoms]	28 February 2020 - 4 April 2020	Yes	RT-PCR or serology [hSAR]; symptoms only [hSCAR]	Prospective	Greater than 14 days
Laxminarayan, R. et al. ²⁹	India	SEAR	Lower-Middle	No	998	998	4065	380	5 March 2020 - 1 August 2020	No	RT-PCR	Retrospective	14 days or less
Layan, M. et al. ³⁰	Israel	EUR	High	No	215	210	687	269	December 2020 - April 2021	Yes	RT-PCR	Prospective	14 days or less
Lewis, N.M. et al. ³¹	United States of America	AMR	High	No	58	58	188/197	52 [RT-PCR or serology]; 136 [symptoms]	22 March 2020 - 25 April 2020	Yes	RT-PCR or serology [hSAR]; symptoms only [hSCAR]	Prospective	14 days or less
Li, F. et al. ³²	China	WPR	Upper-Middle	No	24985	24985	52822	8447	2 December 2019 - 18 April 2020	Yes	Unclear	Retrospective	14 days or less
Li, W. et al. ³³	China	WPR	Upper-Middle	No	105	105	392	64 [RT-PCR]; 55 [symptoms]	1 January 2020 - 20 February 2020	Yes	RT-PCR [hSAR]; symptoms only [hSCAR]	Prospective	14 days or less
Liu, T. et al. ³⁴	China	WPR	Upper-Middle	No	1206	1206	4707	410	10 January 2020 - 15 March 2020	No	RT-PCR	Retrospective	14 days or less
Loenenbach, A. et al. ³⁵	Germany	EUR	High	No	38	38	92	34	January 2021 - February 2021	No	RT-PCR and symptoms	Prospective	14 days or less
Luo, L. et al. ³⁶	China	WPR	Upper-Middle	No	197	197	1015	105	13 January 2020 - 6 March 2020	No	RT-PCR	Prospective	14 days or less
Maltezou, H.C. et al. ³⁷	Greece	EUR	High	No	133	133	846	295	26 February 2020 - 30 June 2020	No	RT-PCR and symptoms	Retrospective	14 days or less
Marcato, A.J. et al. ³⁸	Australia	WPR	High	No	101	96	286/300	40	April 2020 - October 2020	Yes	RT-PCR	Prospective	14 days or less
Marks, M. et al. ³⁹	Spain	EUR	High	No	282	282	382	91	17 March 2020 - 28 April 2020	No	RT-PCR	Prospective	14 days or less
Miller, E. et al. ⁴⁰	United Kingdom	EUR	High	No	117	117	248	75	30 March 2020 - 17 November 2020	Yes	RT-PCR or serology	Prospective	14 days or less
Miyahara, R. et al. ⁴¹	Japan	WPR	High	No	306	306	775	147	22 February 2020 - 31 May 2020	Yes	RT-PCR	Retrospective	Greater than 14 days
Mize, V. et al. ⁴²	South Sudan	AFR	Low	Yes	29	29	13089	1	8 June 2020 - 3 December 2020	No	RT-PCR or serology	Prospective	Greater than 14 days
Musa, S. et al. ⁴³	Bosnia and Herzegovina	EUR	Upper-Middle	No	383	360	747	119 [RT-PCR and symptoms]; 103 [symptoms]	3 August 2020 - 23 December 2020	Yes	RT-PCR and symptoms [hSAR]; symptoms only [hSCAR]	Prospective	14 days or less
Ng, O.T. et al. ⁴⁴	Singapore	WPR	High	No	581	578	1779/1863	134 [RT-PCR or serology]; 468 [symptoms]	23 January 2020 - 3 April 2020	Yes	RT-PCR or serology [hSAR]; symptoms only [hSCAR]	Retrospective	14 days or less
Nohynek, H. et al. ⁴⁵	Finland	EUR	High	No	37	37	87/90	42	Mar-20	Yes	RT-PCR or serology	Prospective	Unclear
Park, S.Y., et al. ⁴⁶	Republic of Korea	WPR	High	No	97	Unknown	225	34	21 February 2020 - 8 March 2020	No	RT-PCR	Prospective	14 days or less
Pett, J. et al. ⁴⁷	United Kingdom	EUR	High	No	27	27	44	7 [RT-PCR]; 7 [symptoms]	26 February 2020 - 26 April 2020	No	RT-PCR and symptoms [hSAR]; symptoms only [hSCAR]	Prospective	14 days or less

Author (ref)	Country	WHO Region	Income Status	HRP Status	No. Index Cases	No. Households	No. Household Contacts, Included/Total	No. Secondary Cases	Timing of Recruitment	Household Study Design	Secondary Case Ascertainment Methods(s)	Data Collection Method	Duration of Follow Up
Phucharoen, C. et al. ⁴⁸	Thailand	SEAR	Upper-Middle	No	77	63	171	82	20 March 2020 - 2 May 2020	No	RT-PCR	Prospective	Unclear

Abbreviations: ref, Reference; WHO, World Health Organization; HRP, Humanitarian Response Plan; AFR, Africa; AMR, Americas; EMR, Eastern Mediterranean; EUR, Europe; SEAR, South East Asia; WPR, Western Pacific; hSAR, household secondary infection attack rate; hSCAR, household secondary clinical attack rate; RT-PCR, reverse transcription polymerase chain reaction.

Supplementary Figure 1: Horizontal lines showing the approximate timing of investigations reporting a household secondary infection attack rate (hSAR) by month and year. Two of the 76 investigations reporting a hSAR are not plotted as the start date was not reported. Vertical lines represent the time at which variants Alpha and Delta were designated as Variants of Concern (VoC) by the WHO (18 December 2020, and 5 May 2021, respectively). Investigations are ordered by start dates. The hSAR and 95% confidence intervals are provided on the right-hand side.

Supplementary Figure 2. Results of the critical appraisal tool as applied to investigations that reported household secondary infection attack rate (hSAR). Colours for Questions 1–10 indicate whether each was addressed in the investigation (dark blue) or not (cream), or instances where there was insufficient detail available to assess (light blue). An overall rating of the risk of bias is provided in the far-right column, with investigations rated Low (light grey), Medium (medium grey) or High (dark grey).

Supplementary Figure 3: Results of the critical appraisal tool as applied to investigations that reported household secondary clinical attack rate (hSCAR). Colours for Questions 1–10 indicate whether each was addressed in the investigation (dark blue) or not (cream), or instances where there was insufficient detail available to assess (light blue). An overall rating of the risk of bias is provided in the far-right column, with investigations rated Low (light grey), Medium (medium grey) or High (dark grey).

Supplementary Figure 4. Forest plot of estimated household secondary infection attack rates (hSAR) coloured by WHO Region. The estimated hSAR and 95% confidence interval are shown on the right margin.

Supplementary Figure 5. Forest plot of estimated household secondary infection attack rates (hSAR) coloured by income status as reported by the World Bank in 2021.⁸¹ The estimated hSAR and 95% confidence interval are shown on the right margin.

Supplementary Figure 6. Forest plot of estimated household secondary infection attack rates (hSAR) coloured by presumed dominant SARS-CoV-2 strain as determined by data available from CoVariants⁸² GISAID.⁸³ The estimated hSAR and 95% confidence interval are shown on the right margin.

Supplementary Figure 7. Forest plot of estimated household secondary infection attack rates (hSAR) coloured by household contact testing protocol implementation. The estimated hSAR and 95% confidence interval are shown on the right margin.

Supplementary Figure 8. Forest plot of estimated household secondary infection attack rates (hSAR) coloured by overall risk of bias assessment. The estimated hSAR and 95% confidence interval are shown on the right margin.

Supplementary Figure 9. Forest plot of estimated household secondary infection attack rates (hSAR) coloured by alignment to the UNITY protocol, as determined by household transmission study design, prospective data collection and routine testing of all household contacts. The estimated hSAR and 95% confidence interval are shown on the right margin.

Supplementary Figure 10. Forest plot of estimated household secondary infection attack rates (hSAR) coloured by duration of follow up of household contacts. The estimated hSAR and 95% confidence interval are shown on the right margin.

Supplementary Figure 11. Forest plot of estimated household secondary infection attack rates (hSAR) coloured by laboratory method of secondary case ascertainment. The estimated hSAR and 95% confidence interval are shown on the right margin.

Supplementary Table 2. Results comparing primary meta-analysis results to those from a risk of bias subgroup meta-analysis of household secondary infection attack rate (hSAR) after inclusion of studies at high risk of bias. I^2 and τ^2 are presented for each model to indicate the percentage of variation across studies attributable to heterogeneity and the estimated between-study variance, respectively. The p-value from the χ^2 test for heterogeneity is also presented.

	No. studies	I^2	$\hat{\tau}^2$	P-value
Infection household secondary attack rate	62	99.7	1.190	<0.0001
Pre-Specified Subgroup Analyses				
Risk of bias assessment	75	99.6	1.069	<0.0001
<i>Low or moderate risk of bias</i>	62			
<i>High risk of bias</i>	13			

Supplementary Table 3. Results from meta-analyses of household secondary clinical attack rate (hSCAR). I^2 and τ^2 are presented for each model to indicate the percentage of variation across studies attributable to heterogeneity and the estimated between-study variance, respectively. The p-value from the χ^2 test for heterogeneity is also presented.

	No. studies	I^2	$\hat{\tau}^2$	P-value
Clinical household secondary attack rate	33	99.7	1.344	<0.0001
Pre-Specified Subgroup Analyses				
Income Status	33	99.7	1.324	<0.0001
<i>High income</i>	19			
<i>Low- and middle- income</i>	14			
Predominant circulating strain	33	99.7	1.249	<0.0001
<i>Other strain</i>	30			
<i>Variant of concern</i>	3			

Supplementary Figure 12. Forest plot of the household secondary clinical attack rates (hSCAR) in included articles (n = 33), ordered from highest estimated hSCAR (top) to lowest estimated hSCAR (bottom). The hSAR and 95% confidence intervals (CI) are shown on the right margin.

Supplementary Figure 13. Forest plot of estimated household secondary clinical attack rates (hSCAR) coloured by income status as reported by the World Bank in 2021.⁸¹ The estimated hSCAR and 95% confidence interval are shown on the right margin.

Supplementary Figure 14. Forest plot of estimated household secondary clinical attack rates (hSCAR) coloured by presumed dominant SARS-CoV-2 strain as determined by data available from CoVariants⁸² and GISAID⁸³. The estimated hSCAR and 95% confidence interval are shown on the right margin.
