

Reference	Outcomes included in meta-analysis	Input used („esc“ function used)	Hedges' g and SE
Banks et al. (2018)	Chronic self-perceived stress	means and sds (esc_mean_sd)	Chronic self-perceived stress: g= -0.411, SE= 0.27
	Acute anxiety		Acute anxiety: g= -0.52, SE= 0.272
	Positive affect		Positive affect: g= -0.104, SE= 0.268
	Negative affect		Negative affect: g= -0.011, SE= 0.267
Binfet et al. (2017)	Chronic self-perceived stress	means and sds (esc_mean_sd)	g= -0.326, SE= 0.162
Crossman et al. (2015)	Acute anxiety	means and sds (esc_mean_sd)	Acute anxiety: g= -1.245, SE= 0.331
	Positive affect		Negative affect: g= -1.391, SE=0.337
	Negative affect		Positive affect: g= 0.564, SE= 0.308
Crump et al. (2015) - Study I	Systolic blood pressure	f-test (esc_f)	Systolic blood pressure: g= 0.814, SE= 0.402
McDonald et al. (2017)	Systolic blood pressure	means and sds (esc_mean_sd)	g= -2.501, SE= 0.389
Shearer et al. (2015)	Acute anxiety	means and sds at time point 4 (esc_mean_sd)	Acute anxiety: g= -0.811, SE= 0.328
	Negative affect		Negative affect: g= -0.612, SE= 0.322
Ward-Griffin et al. (2018) - RCT	Positive affect	means and sds (esc_mean_sd)	Positive affect: g= -0.088, SE= 0.128
	Negative affect		Negative affect: g= -0.081, SE= 0.127
	Chronic self-perceived stress		Chronic self-perceived stress: g= -0.128, SE= 0.128
Wilson (1987)	Systolic blood pressure	means and sds (esc_mean_sd) (intervention vs. reading quietly)	Systolic blood pressure: g= 0.21, SE= 0.21
	Acute anxiety		Acute anxiety: g= 0.0413, SE= 0.209
