

Multi-Resistant Organism Genome Sequencing Report

Date:

<Report TITLE>

Executive Summary:

1. Isolates:

Table1: Sample information

Sample ID	URN	Lab No.	sample date	site	Species	MLST (ST)	Hospital	Admission date	Ward

MLST = Multi-Locus Sequence Typing; NF =Not found;

2. Cluster detection:

See *cathai* for clustering information (<https://cathai.beatsonlab.com>)

This reporting period:

QGHA survey period:

Public databases: not tested.

Clustered isolates share 5 core genome SNPs per Mb. Other hospitals include RBWH, PAH, QCH (LCCH). QGHA survey period began 01/11/18

Multi-Resistant Organism Genome Sequencing Report

Date:

3. Resistance gene profiling:

Table 2: Resistance gene profiles

Name	Species	MLST (ST)	Hospital	Gene ¹	Gene ²	...	Gene ^N
