

**Supplementary Table 2.** Log Hazard ratios obtained for the drugs tested, along with standard deviations (SDs), upper and lower coefficient intervals (CI), nominal and FDR-adjusted p-values. Also, Lymphocyte proliferation values (see Methods) along with standard deviations (SDs), upper and lower coefficient intervals (CI), nominal and FDR-adjusted p-values. The two last columns indicate the drugs used in the machine learning drug repurposing prediction study and the significance of the prediction.

Drugbank ID	Name	N	LHR estimate	LHR SD	LHR CI 5%	LHR CI 95%	LHR p-value	LHR FDR p-value	Lymphocyte proliferation	Lymphocyte Prol. CI 5%	Lymphocyte Prol. CI 95%	Lymphocyte Prol. p-value	Lymphocyte Prol. FDR p-value	Target	ML Prediction tested	ML Prediction significant
