

## Supplementary Material Captions

### **Table S1: SARS-CoV-2 Antigen Diagnostic Tests with Emergency Use Authorization.**

List of diagnostic tests for the detection of SARS-CoV-2 with FDA Emergency Use Authorizations as of 31May22. Organized first by target antigen, then by company name in alphabetical order. A majority of the tests target the N-protein and are designed as lateral flow assays.

### **Table S2: SARS-CoV-2 Variants and Current SARS-CoV-2 Interagency Group (SIG) Classification.**

List of SARS-CoV-2 Variants of Concern/Variants Being Monitored (both WHO label and PANGO lineage) with SIG classification as of 31May22. Includes location and time each variant was first detected.

### **Table S3: Cross-Reactivity of High-Priority Pathogens Commonly Found in the Respiratory Tract Flora.**

High-priority pathogens that are commonly found in the respiratory tract flora were tested for cross-reactivity with the Q-LAAD assay for detection of SARS-CoV-2.

### **Table S4: Interference of High-Priority Pathogens Commonly Found in the Respiratory Tract Flora.**

High-priority pathogens that are commonly found in the respiratory tract flora were tested for interference with the Q-LAAD assay for detection of SARS-CoV-2.

### **Table S5: Interference of Endogenous Substances.**

Endogenous substances commonly present in clinical samples from the respiratory tract were tested for interference with the Q-LAAD assay for detection of SARS-CoV-2.
