

Supplementary 1

**Table 1.** Oocyst counts and whether they were processed by heating or DNA extraction.

<b>Number of oocyst/mosquito</b>	<b>Number of Mosquitoes</b>	<b>Heating / DNA extraction</b>
1	17	Heating
2	5	Heating
3	6	Heating
4	4	Heating
5	2	Heating
6	1	Heating
7	1	Heating
10	1	Heating
Pools	36	Heating
1	17	DNA extraction
2	4	DNA extraction
3	4	DNA extraction
4	5	DNA extraction
6	1	DNA extraction
8	1	DNA extraction
13	1	DNA extraction
14	1	DNA extraction
46	1	DNA extraction
Pools	36	DNA extraction

**Table 2.** Sporozoites classification and whether they were processed by heating or DNA extraction.

<b>Sporozoite classification*</b>	<b>Number of Mosquitoes</b>	<b>Heating / DNA extraction</b>
High	17	Heating
Moderate	9	Heating
Low	4	Heating
Negative	8	Heating
High	17	DNA extraction
Moderate	9	DNA extraction

Low	4	DNA extraction
Negative	8	DNA extraction

---

\* High >100 sporozoites, Moderate 20 -100, Low 1-20 sporozoites

## Supplementary 2

**Table 1.** Primer sequences of for the qPCR assay to detect *P. falciparum* and *P. vivax* parasites

Species	Primer <sup>1</sup>	Sequence (5' - 3')
<i>P. falciparum</i>	<b>Pf_fwd</b>	TATTGCTTTTGAGAGGTTTTGTTACTTTG
	<b>Pf_rev</b>	ACCTCTGACATCTGAATACGAATGC
<i>P. vivax</i>	<b>Pv_fwd</b>	GCTTTGTAATTGGAATGATGGGAAT
	<b>Pv_rev</b>	ATGCGCACAAAGTCGATACGAAG

**Table 2.** Probe sequences for the qPCR assay to detect *P. falciparum* and *P. vivax* parasites.

Species	Probe <sup>2</sup>	Sequence (5' - 3')
<i>P. falciparum</i>	<b>Pf probe</b>	<b>6FAM-ACGGGTAGTCATGATTGAGTT-MGBNFQ</b>
<i>P. vivax</i>	<b>Pv probe</b>	<b>VIC-AGCAACGCTTCTAGCTTA -MGBNFQ</b>

**Table 3.** The reaction mix for the qPCR

qPCR Reaction mix
<b>Total volume</b> 14μL
2X Roche Master mix <sup>3</sup>
350nM per primer ( forward and reverse)
350nM per probe ( forward and reverse)
4μL of DNA

**Table 4.** The cycling conditions for the qPCR.

Thermo profile			
<b>Hold</b>	50°C	2min	
<b>Hold</b>	95°C	15min	
<b>Denaturation</b>	95°C	15sec	X 45
<b>Annealing</b>	60°C	1min
