

TRIPOD Checklist: Prediction Model Development and Validation

Section/Topic	Item	Checklist Item	Page	
Title and abstract				
Title	1	D;V	Identify the study as developing and/or validating a multivariable prediction model, the target population, and the outcome to be predicted.	N/A
Abstract	2	D;V	Provide a summary of objectives, study design, setting, participants, sample size, predictors, outcome, statistical analysis, results, and conclusions.	p. 1
Introduction				
Background and objectives	3a	D;V	Explain the medical context (including whether diagnostic or prognostic) and rationale for developing or validating the multivariable prediction model, including references to existing models.	p. 2
	3b	D;V	Specify the objectives, including whether the study describes the development or validation of the model or both.	p. 2–3 Fig. 1a, 4a Suppl. Fig. 7a
Methods				
Source of data	4a	D;V	Describe the study design or source of data (e.g., randomized trial, cohort, or registry data), separately for the development and validation data sets, if applicable.	p. 12
	4b	D;V	Specify the key study dates, including start of accrual; end of accrual; and, if applicable, end of follow-up.	p. 12
Participants	5a	D;V	Specify key elements of the study setting (e.g., primary care, secondary care, general population) including number and location of centres.	p. 12 Suppl. Data 1
	5b	D;V	Describe eligibility criteria for participants.	p. 12
	5c	D;V	Give details of treatments received, if relevant.	p. 12
Outcome	6a	D;V	Clearly define the outcome that is predicted by the prediction model, including how and when assessed.	p. 15–17
	6b	D;V	Report any actions to blind assessment of the outcome to be predicted.	p. 15–17
Predictors	7a	D;V	Clearly define all predictors used in developing or validating the multivariable prediction model, including how and when they were measured.	p. 15–17 Suppl. Data 3, 8
	7b	D;V	Report any actions to blind assessment of predictors for the outcome and other predictors.	p. 15–17
Sample size	8	D;V	Explain how the study size was arrived at.	p. 12 Reporting Summary
Missing data	9	D;V	Describe how missing data were handled (e.g., complete-case analysis, single imputation, multiple imputation) with details of any imputation method.	p. 15–16
Statistical analysis methods	10a	D	Describe how predictors were handled in the analyses.	p. 15–17
	10b	D	Specify type of model, all model-building procedures (including any predictor selection), and method for internal validation.	p. 15–17
	10c	V	For validation, describe how the predictions were calculated.	p. 16–17
	10d	D;V	Specify all measures used to assess model performance and, if relevant, to compare multiple models.	p. 16–17
	10e	V	Describe any model updating (e.g., recalibration) arising from the validation, if done.	p. 16–17
Risk groups	11	D;V	Provide details on how risk groups were created, if done.	N/A
Development vs. validation	12	V	For validation, identify any differences from the development data in setting, eligibility criteria, outcome, and predictors.	p. 16–17
Results				
Participants	13a	D;V	Describe the flow of participants through the study, including the number of participants with and without the outcome and, if applicable, a summary of the follow-up time. A diagram may be helpful.	p. 3, 6–7 Fig. 1a, 4a Suppl. Fig. 7a
	13b	D;V	Describe the characteristics of the participants (basic demographics, clinical features, available predictors), including the number of participants with missing data for predictors and outcome.	p. 3 Suppl. Data 1, 2
	13c	V	For validation, show a comparison with the development data of the distribution of important variables (demographics, predictors and outcome).	p. 3–4 Suppl. Fig. 1a Suppl. Data 1, 2
Model development	14a	D	Specify the number of participants and outcome events in each analysis.	p. 3
	14b	D	If done, report the unadjusted association between each candidate predictor and outcome.	p. 5 Fig. 2b–d Suppl. Data 5
Model specification	15a	D	Present the full prediction model to allow predictions for individuals (i.e., all regression coefficients, and model intercept or baseline survival at a given time point).	Suppl. Data 3, 8
	15b	D	Explain how to use the prediction model.	Suppl. Data 3, 8
Model performance	16	D;V	Report performance measures (with CIs) for the prediction model.	p. 3–4, 7 Fig. 1b–d, 4c–f Suppl. Fig. 2d, 7d,e Suppl. Data 10
Model-updating	17	V	If done, report the results from any model updating (i.e., model specification, model performance).	p. 4 Suppl. Fig. 3
Discussion				
Limitations	18	D;V	Discuss any limitations of the study (such as nonrepresentative sample, few events per predictor, missing data).	p. 10–11
Interpretation	19a	V	For validation, discuss the results with reference to performance in the development data, and any other validation data.	p. 3–4, 7
	19b	D;V	Give an overall interpretation of the results, considering objectives, limitations, results from similar studies, and other relevant evidence.	p. 8–10
Implications	20	D;V	Discuss the potential clinical use of the model and implications for future research.	p. 8–11
Other information				
Supplementary information	21	D;V	Provide information about the availability of supplementary resources, such as study protocol, Web calculator, and data sets.	p. 19–20
Funding	22	D;V	Give the source of funding and the role of the funders for the present study.	p. 24

*Items relevant only to the development of a prediction model are denoted by D, items relating solely to a validation of a prediction model are denoted by V, and items relating to both are denoted D;V.
