

**Supplemental Table 1:** Search terms and keywords used to identify relevant studies for GCK-related hyperglycemia, HNF1A-diabetes, HNF4A-diabetes

Diabetes phenotypes	Genes*	Treatment Class**	Glycemic measure	Microvascular Outcomes	Macrovascular Outcomes
Monogenic diabetes MODY Maturity onset diabetes of the young Maturity-onset diabetes of the young Mature onset diabetes of the young	HNF1A HNF4A GCK	Metformin Sulphonylureas Glinides Thiazolidinediones Alpha glucosidase inhibitors DPP-4 inhibitors SGLT2 inhibitors GLP-1 R Agonists Insulin	HbA1c Hemoglobin A1c Glycated hemoglobin Glycemia Treatment response	Nephropathy Proteinuria Macroalbuminuria Renal impairment Chronic kidney disease Microalbuminuria End-stage renal disease ESRD Kidney failure	Cardiovascular disease Myocardial infarction Revascularization Acute coronary syndrome Coronary heart disease Heart failure Cardiac Failure Angioplasty Percutaneous Coronary Intervention Cardiovascular Mortality MACE Stroke TIA
Neonatal diabetes PNDM Infancy-onset diabetes NDM TNDM Permanent neonatal diabetes Transient neonatal diabetes	KCNJ11 ABCC8			Retinopathy	
				Neuropathy	

Genes*				
HNF1A	HNF4A	GCK	KCNJ11	ABCC8
Hepatocyte Nuclear Factor 1 Alpha	Hepatocyte Nuclear Factor 4 Alpha	Glucokinase	Potassium Inwardly Rectifying Channel Subfamily J Member 11	ATP Binding Cassette Subfamily C Member 8
HNF1	HNF4	HK4	ATP-Sensitive Inward Rectifier Potassium Channel 11	SUR1
Hepatocyte Nuclear Factor 1-Alpha	Hepatocyte Nuclear Factor 4-Alpha	Glucokinase (Hexokinase 4)	BIR	ABC36
Transcription Factor HNF-1	Transcription Factor HNF-4	Hexokinase Type IV	Potassium Channel, Inwardly Rectifying Subfamily J Member 11	TNDM2
Hepatic Nuclear Factor 1 Alpha	Hepatic Nuclear Factor 4 Alpha	Hexokinase-4	Inward Rectifier K(+) Channel Kir6.2	HRINS
HNF1alpha	HNF4alpha	HK IV	Kir6.2	PHHI
HNF-1-Alpha	HNF-4-Alpha	Hexokinase D, Pancreatic Isozyme	IKATP	MRP8
HNF1alpha	HNF4alpha	Hexokinase 4	Potassium Inwardly-Rectifying Channel, Subfamily J, Member 11	HHF1
HNF1a	HNF4a	Hexokinase-D	Inwardly-Rectifying Potassium Channel Subfamily J Member 11	SUR
MODY3	MODY1	MODY2	Inwardly Rectifying Potassium Channel Subfamily J Member 11	HI
HNF1A	HNF4A	GCK	Potassium Channel Inwardly Rectifying Subfamily J Member 11	ATP-Binding Cassette, Sub-Family C (CFTR/MRP), Member 8
TCF-1	TCF-14	MODY-2	Potassium Voltage-Gated Channel Subfamily J Member 11	ATP-Binding Cassette Sub-Family C Member 8
TCF1	TCF14		Inwardly Rectifying Potassium Channel KIR6.2	Sulfonylurea Receptor (Hyperinsulinemia)

MODY-3	MODY-1				Beta-Cell Inward Rectifier Subunit			Sulfonylurea Receptor 1
					Beta-Cell Inward Rectifier			ATP-Binding Cassette Transporter Sub-Family C Member 8
					KIR6.2			SUR1delta2
					PNDM2			PNDM3
					HHF2			Sulphonylurea Receptor 1
					PHHI			SUR1delta2KATP
					TNDM3			ATP binding cassette subfamily C member 8
					Katp-channel			
					Katp			
					KATP			
<b>Treatment Class**</b>								
Metformin	Sulphonylureas	Glinides	Thiazolidinediones	Alpha glucosidase inhibitors	DPP-4 inhibitors	SGLT2 inhibitors	GLP-1 R Agonists	Insulin
Metformin Biguanide	Sulphonylurea Sulfonylurea Gliclazide Glipizide Glibenclamide Glyburide Glimepiride Tolbutamide Chlorpropamide	Repaglinide Nateglinide	Thiazolidinedione PPARg Agonist Rosiglitazone Pioglitazone Troglitazone	Alphagluco- sidase inhibitor Acarbose	DPP4 inhibitor DPP-4 inhibitor Dipeptidyl- peptidase 4 inhibitor Dipeptidyl- peptidase-4 inhibitor Sitagliptin Vildagliptin Saxagliptin Linagliptin Alogliptin	SGLT2 inhibitor SGLT2i SGLT-2 inhibitor SGLT-2i Sodium Glucose Transporter 2 inhibitor Dapagliflozin Empagliflozin Ertagliflozin Canagliflozin	GLP1RA GLP1 Receptor Agonists GLP-1 Receptor Agonists GLP-1RA Exenatide Liraglutide Lixisenatide Semaglutide Dulaglutide Albiglutide	Isophane NPH insulin Basal Insulin Long acting insulin Glargine Detemir Degludec Insulin
