

#### Supplementary Table 4:

Skin capacitance as a function of skin hydration was measured on day 1 (baseline, before application of the test product), as well as after 2 weeks, 4 weeks and 8 weeks of product application.

Skin capacitance was measured by Corneometer [a.u.] An increase in Corneometer values correspond to a skin-moisturizing effect.

Mean values, standard deviations, treatment comparison on differences to baseline, and time comparison on raw data for **day-cream, night-cream and serum** containing 1% UA

#### A) Day-Cream containing 1% UA
