SUPPLEMENTARY MATERIAL

The use of machine learning methods in neurodegenerative disease research: a scoping review

Antonio Ciampi, Julie Rouette, Fabio Pellegrini, Gabrielle Simoneau, Bastien Caba, Arie Gafson, Carl de Moor, Shibeshih Belachew

S1 Method	MEDLINE (PubMed) search strategy
S1 Table	Study sample size of included articles using machine learning methods in neurodegenerative diseases
S2 Table	Machine learning methods extracted from the scoping review
S3 Table	Frequency of machine learning subthemes
S1 Figure	Frequency of data type used in articles using machine learning methods for disease diagnosis, by neurodegenerative disease
S2 Figure	Proportion of data type used in articles using machine learning methods for disease diagnosis, by neurodegenerative disease
S3 Figure	Frequency of data type used in articles using machine learning methods for disease prognosis, by neurodegenerative disease
S4 Figure	Proportion of data type used in articles using machine learning methods for disease prognosis, by neurodegenerative disease
S5 Figure	Proportion of data type used in articles using machine learning methods for prediction of treatment effect, by neurodegenerative disease
S6 Figure	Proportion of data type used in articles using machine learning methods for prediction of treatment effect, by neurodegenerative disease
