

Supplemental Table 2a. Correlations across KDM-BA, PhenoAge, SA, and chronological age (CA) in Sample A^a

	CA	KDM-BA	PhenoAge	SA
CA	1			
KDM-BA	0.92	1		
PhenoAge	0.80	0.84	1	
SA	0.60	0.56	0.53	1

^aSample A includes 5,501 participants who had reported their SA and had biomarker measures used to calculate KDM-BA and PhenoAge.

Supplemental Table 2b. Correlations between age acceleration (abbreviated as Accel) for KDM-BA, PhenoAge, and SA and chronological age (CA) in Sample A^a

	CA	KDM-BA-Accel	PhenoAgeAccel	SA-Accel
CA	1			
KDM-BA-Accel	0	1		
PhenoAgeAccel	0	0.42	1	
SA-Accel	0	0.04	0.09	1

^aSample A includes 5,501 participants who had reported their SA and had biomarker measures used to calculate KDM-BA and PhenoAge.
