

Supplemental Table 9a. Correlations between aging constructs and chronological age (CA) in the overlap of participants who were included in both Sample A and Sample B^a (N = 2,413)

	CA	KDM-BA	PhenoAge	SA	Hannum EC	Horvath EC	Levine EC	GrimAge	POA
CA	1								
KDM-BA	0.91	1							
PhenoAge	0.80	0.84	1						
SA	0.61	0.57	0.53	1					
Hannum EC	0.81	0.76	0.70	0.52	1				
Horvath EC	0.72	0.66	0.61	0.44	0.76	1			
Levine's EC	0.72	0.68	0.66	0.45	0.75	0.64	1		
GrimAge	0.82	0.79	0.77	0.52	0.76	0.63	0.72	1	
POA	0.05	0.09	0.22	0.06	0.14	0.12	0.21	0.40	1

^aParticipants who were in both Sample A and Sample B had data on all aging constructs.

Supplemental Table 9b. Correlations between age acceleration (abbreviated as Accel) for aging constructs and chronological age (CA) in participants who were included in both Sample A and Sample B^a (N = 2,413)

	CA	KDM-BA-Accel	PhenoAgeAccel	SA-Accel	HannumAccel	HorvathAccel	LevineAccel	GrimAgeAccel	POA
CA	1								
KDM-BA-Accel	0.002	1							
PhenoAgeAccel	0.007	0.43	1						
SA-Accel	0.017	0.03	0.09	1					
HannumAccel	0.018	0.06	0.16	0.04	1				
HorvathAccel	0.001	0.02	0.08	0.004	0.43	1			
LevineAccel	0.003	0.09	0.20	0.03	0.42	0.26	1		
GrimAgeAccel	0.002	0.15	0.33	0.03	0.26	0.11	0.33	1	
POA	0.05	0.11	0.29	0.04	0.17	0.12	0.25	0.63	1

^aParticipants who were in both Sample A and Sample B had data on all aging constructs.
