Supplementary Table 1. Diagnostic codes for Parkinson's disease.

The following SNOMED-CT codes indicate the presence of a PD diagnosis and were used in the search for PD patients. Some patients might have multiple of these codes in their EHR records. The number of patients identified using each code only gives a rough estimate of their frequency of use. They do not represent the actual number of patients engaged because the database searched contained only anonymised data which means patients who had deceased or were deregistered from GP practices in the uMed's network were not excluded. Furthermore, as of March 2023, only 51 practices within uMed's network participated in the recruitment.

Question
Q1: Do you prefer to answer the questionnaires that we send to you on your mobile, tablet, laptop or speaking over the phone ?
Mobile
Tablet
Laptop
Over the phone
Letter
Other (please specify)
Q2: Have you been offered the chance to participate in Parkinson's research before or is Access-PD the first opportunity?
ACCESS-PD is the first
1-5 studies
>5 studies
other
Q3: If you have participated in Parkinson's research before, what type of research was this (you can select multiple options)?
Questionnaire-based
Involved a medical device or testing kit
Clinical trial completed at home only
Clinical trial completed involving travel (to a hospital or GP surgery)
I've never participated in Parkinson's research before AccessPD
Q4: Are you satisfied with your current medication / therapy for Parkinson's?
Yes
No
Other (please specify)
Q5: What would be your preferred method of taking your Parkinson's medication?
Pill once a day
Pill multiple times per day
Multiple pills multiple times per day
Skin patches
Injections
Infusions
Other (Please specify)
Q6: Which of your symptoms do you feel most negatively impacts your quality of life (you can select multiple options)?

Supplementary Table 6. Comparison between self-reported date of diagnosis with the first appearance of PD diagnosis in the EHR. Patients without a coded diagnosis of PD were excluded from this analysis. To compare self-reported date of diagnosis in the baseline questionnaire with EHR record of PD diagnosis, observations (including records of symptoms, diagnoses, laboratory results and vital signs) and medication records of the first 200 participants were extracted. 7 participants were identified using their prescription records and had no coded diagnosis of PD in EHR. 1 participant was excluded due to their MSA-P diagnosis. The total number of participants included in the analysis was 192.

Lapse between self-reported date of diagnosis and first appearance of PD diagnosis in EHR	No. of patients (%)
Within 1 year	161 (83.9%)
Between 1-2 years	14 (7.3%)
Between 2-3 years	4 (2.1%)
Between 3-4 years	5 (2.6%)
Between 4-5 years	2 (1.0%)
More than 5 years	6 (3.1%)
Self-reported date earlier than first appearance of PD diagnosis in EHR	154 (80.2%)
First appearance of PD diagnosis in EHR earlier than self-reported date of diagnosis	37 (19.3%)
