Abbreviation: ASD, autism spectrum; ADHD, attention deficit/hyperactivity disorder.

Supplementary Figures

Supplementary Figure 1. Polygenic score analyses. Shown are associations between polygenic score deciles and standardized observed birth weight in the iPSYCH study. Black dots show associations for the subset of the population representative sample used as controls in iPSYCH, and blue dots show associations for cases of the six different psychiatric disorders.

Abbreviations: CI, confidence interval; ASD, autism spectrum; ADHD, attention deficit/hyperactivity disorder.

Supplementary Figure 2. Logistic regression of psychiatric disorders in the iPSYCH study on observed birth weight and polygenic score (PGS) of birth weight. Analyses include maternal smoking during pregnancy, maternal mental health, and both maternal smoking during pregnancy and mental health as covariates.

Abbreviations: CI, confidence interval; ASD, autism spectrum; ADHD, attention deficit/hyperactivity disorder.
