Supplementary Figure 3 (con't). LocusZoom plots around lead genetic variant for analyses listed in Table 1.

Supplemental Figure 4. Artery imaging and *CXCL12* expression in fetal hearts. (A) Anterior view of a three dimensional (3D) reconstruction of a gestational week (GW) 14 heart subjected to whole-organ immunolabeling for alpha-smooth muscle actin (α -SMA). (B and C) 3D reconstruction of representative tracings of α -SMA+ arteries. Traces highlight branches of the main arteries (B) or main with lower order arteries (C) that originated from the right (RCA, orange) or left (LCA, blue) coronary ostia where they meet the aorta. (D-F) Example of a co-dominant fetal heart as indicated by the presence of both RCA and LCA branches within the IVG. (E) and inferior septum (arrow in F). (G) *CXCL12* fluorescence *in situ* hybridization (FISH) and α SMA immunolabeling on transverse sections through hearts at the indicated ages showed expression in coronary arteries (CA) and other unlabeled cells within the myocardium. LAD, left anterior descending; LCA, left coronary artery; lv, left ventricle; RCA, right coronary artery; rv, right ventricle. Scale bars: A and B 500 μ m; D, 2mm; F, 1mm; G, left panels, 1mm; middle panels 100 μ m.

Supplemental Figure 5. Investigating various forms of dominance in mouse hearts. (A) Adult mouse heart subjected to whole-organ immunolabeling of coronary artery smooth muscle (α -SMA) demonstrates an example of the invariable co-dominance on the posterior and inferior wall in this species. (B) Quantification of dominance on the posterior/inferior wall of adult mouse hearts from mixed strains. N=30. Human dominance rates in the MVP cohort is shown for comparison. (C) Quantification of septal artery (SpA) dominance in adult CD1 mouse hearts revealed that rates are like those observed in neonatal mice. N=10 hearts. (D-E) Example of the *in vivo* labeling method for identifying SpA dominance in mice. LCA, left coronary artery; lv, left ventricle; OT, outflow tract; RCA, right coronary artery; rv, right ventricle. Scale bars: A, 1mm; D, 300 μ m
