

*Additional file 2. Inclusion and exclusion criteria*

Inclusion criteria:

- Date of publication: up to 10 years ago
- Language: English
- Study design: ALL
- Population: primarily focused on key populations (e.g., young individuals, migrants, sex workers, MSM, transgender people, gender diverse people, bisexual and homosexual men, swingers, PWID, PLWHIV)
- Intervention: home-based comprehensive sexual health care with (online) self-sampling for HIV and/or STI testing and AT LEAST one of these care elements:
  - Results provision
  - Treatment
  - Partner notification
  - Health promotion/prevention
  - Retesting/repeat testing
- Studies should report AT LEAST one of these **outcomes** and/or **constructs\*** (Following RE-AIM)

Exclusion criteria:

- Non-human studies
- Validation studies with only test related results (sensitivity, specificity)
- Intervention has no HIV testing component
  - Unless key population is HIV positive

\*Table of constructs related to reach, effectiveness, adoption, implementation, and maintenance.

<b>RE-AIM</b>	<b>Answer to...</b>	<b>Signal words</b>
<b>Reach</b>	“How do I reach the targeted population?”	Reach Target Number of ... Proportion of ... Represent
<b>Effectiveness</b>	“How do I know my intervention is effective?”	Efficacy Impact Effects /Affect Effective(ness) Influence Outcome Factors Predictors
<b>Adoption</b>	“How do I develop organizational support to deliver my intervention?”	Adoption Setting Deliver Support Barriers Facilitators

---

<b>Implementation</b>	“How do I ensure the intervention is delivered properly?”	Implementation Fidelity Protocols
<b>Maintenance</b>	“How do I incorporate the intervention so that it is delivered over the long term?”	Maintenance Policy Incorporation Long term Follow-up

---
