Tab. S1 Cause-of-death Classification

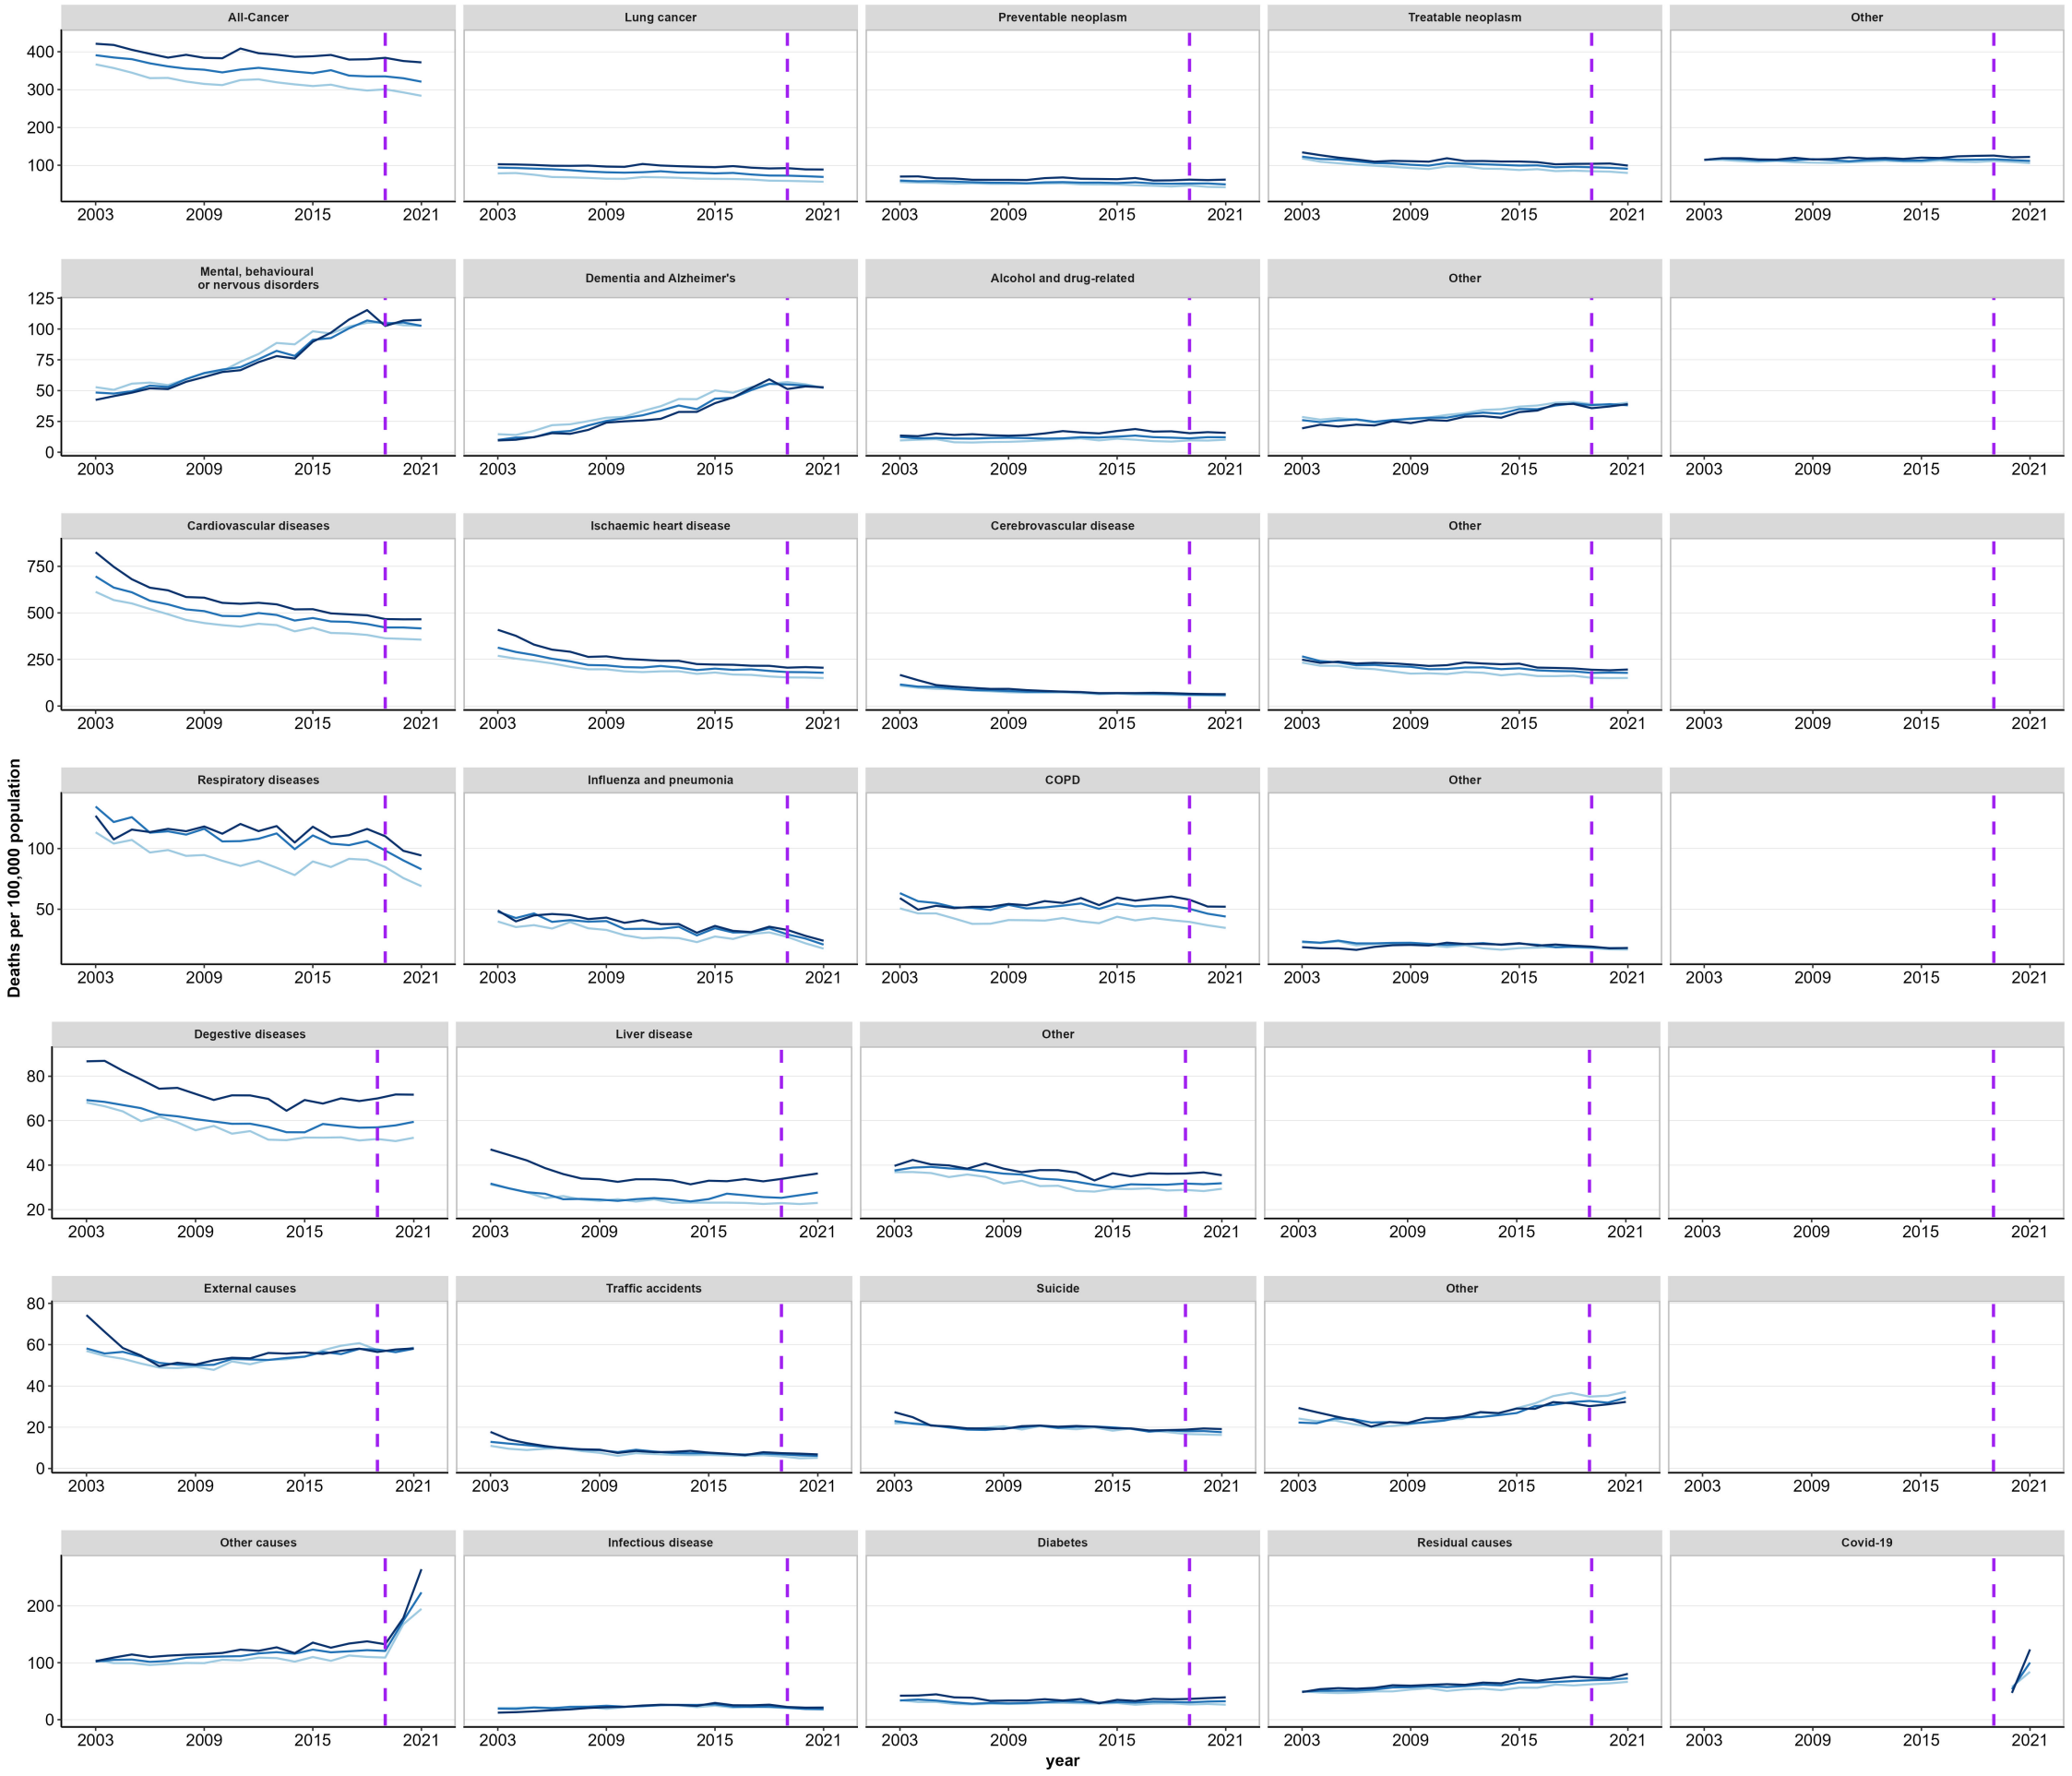

#	Detailed category	ICD-10	Grouped category
1	Infectious disease	A00-B99	Other causes (7)
2	Lung cancer*	C33-C34	Cancer (1)
3	Preventable neoplasm	C00-C14, C15-C16, C22, C32	Cancer (1)
4	Treatable neoplasm**	C18-C21, C40-C41, C43-C44, C50, C53-C55, C61-C62, C67, C69, C73, C81, D10-D36	Cancer (1)
5	Other neoplasm	Residual C codes, D00-D09, D37-D48	Cancer (1)
6	Diabetes	E10-E14	Other causes (7)
7	Dementia and Alzheimer's	F01, F03, G30	Mental, behavioural or nervous disorder (2)
8	Alcohol and drug-related	F10-F19	Mental, behavioural or nervous disorder (2)
9	Other mental, behavioural or nervous disorder	Residual F-G codes	Mental, behavioural or nervous disorder (2)
10	Ischaemic heart disease	I20-I25	Cardiovascular diseases (3)
11	Cerebrovascular disease	I60-I69	Cardiovascular diseases (3)
12	Other circulatory disease	Residual I codes	Cardiovascular diseases (3)
13	Influenza and pneumonia	J09-J22	Respiratory diseases (4)
14	COPD	J41-J44	Respiratory diseases (4)
15	Other respiratory disease	Residual J codes	Respiratory diseases (4)
16	Liver disease	K70-K77	Digestive diseases (5)
17	Other digestive disease	K00-K69, K80-K99	Digestive diseases (5)
18	Covid-19	U07	Other causes (7)
19	Traffic accidents	V01-V99	External causes (6)
20	Suicide	X60-X84	External causes (6)
21	Other accidents	W00-W99, X00-X59, Y35-Y98	External causes (6)
22	Residual causes***	Residual D-E codes; all H, L, M, N, O, P, Q codes	Other causes (7)

* Lung cancer is also preventable but due to its significance and divergent trends among men and women, it should be studied separately.

** Sex-specific cancers (breast, uterus, cervix uteri, prostate, testis) included; leukaemia (C91-C95) not included because widely amenable only at ages below 45

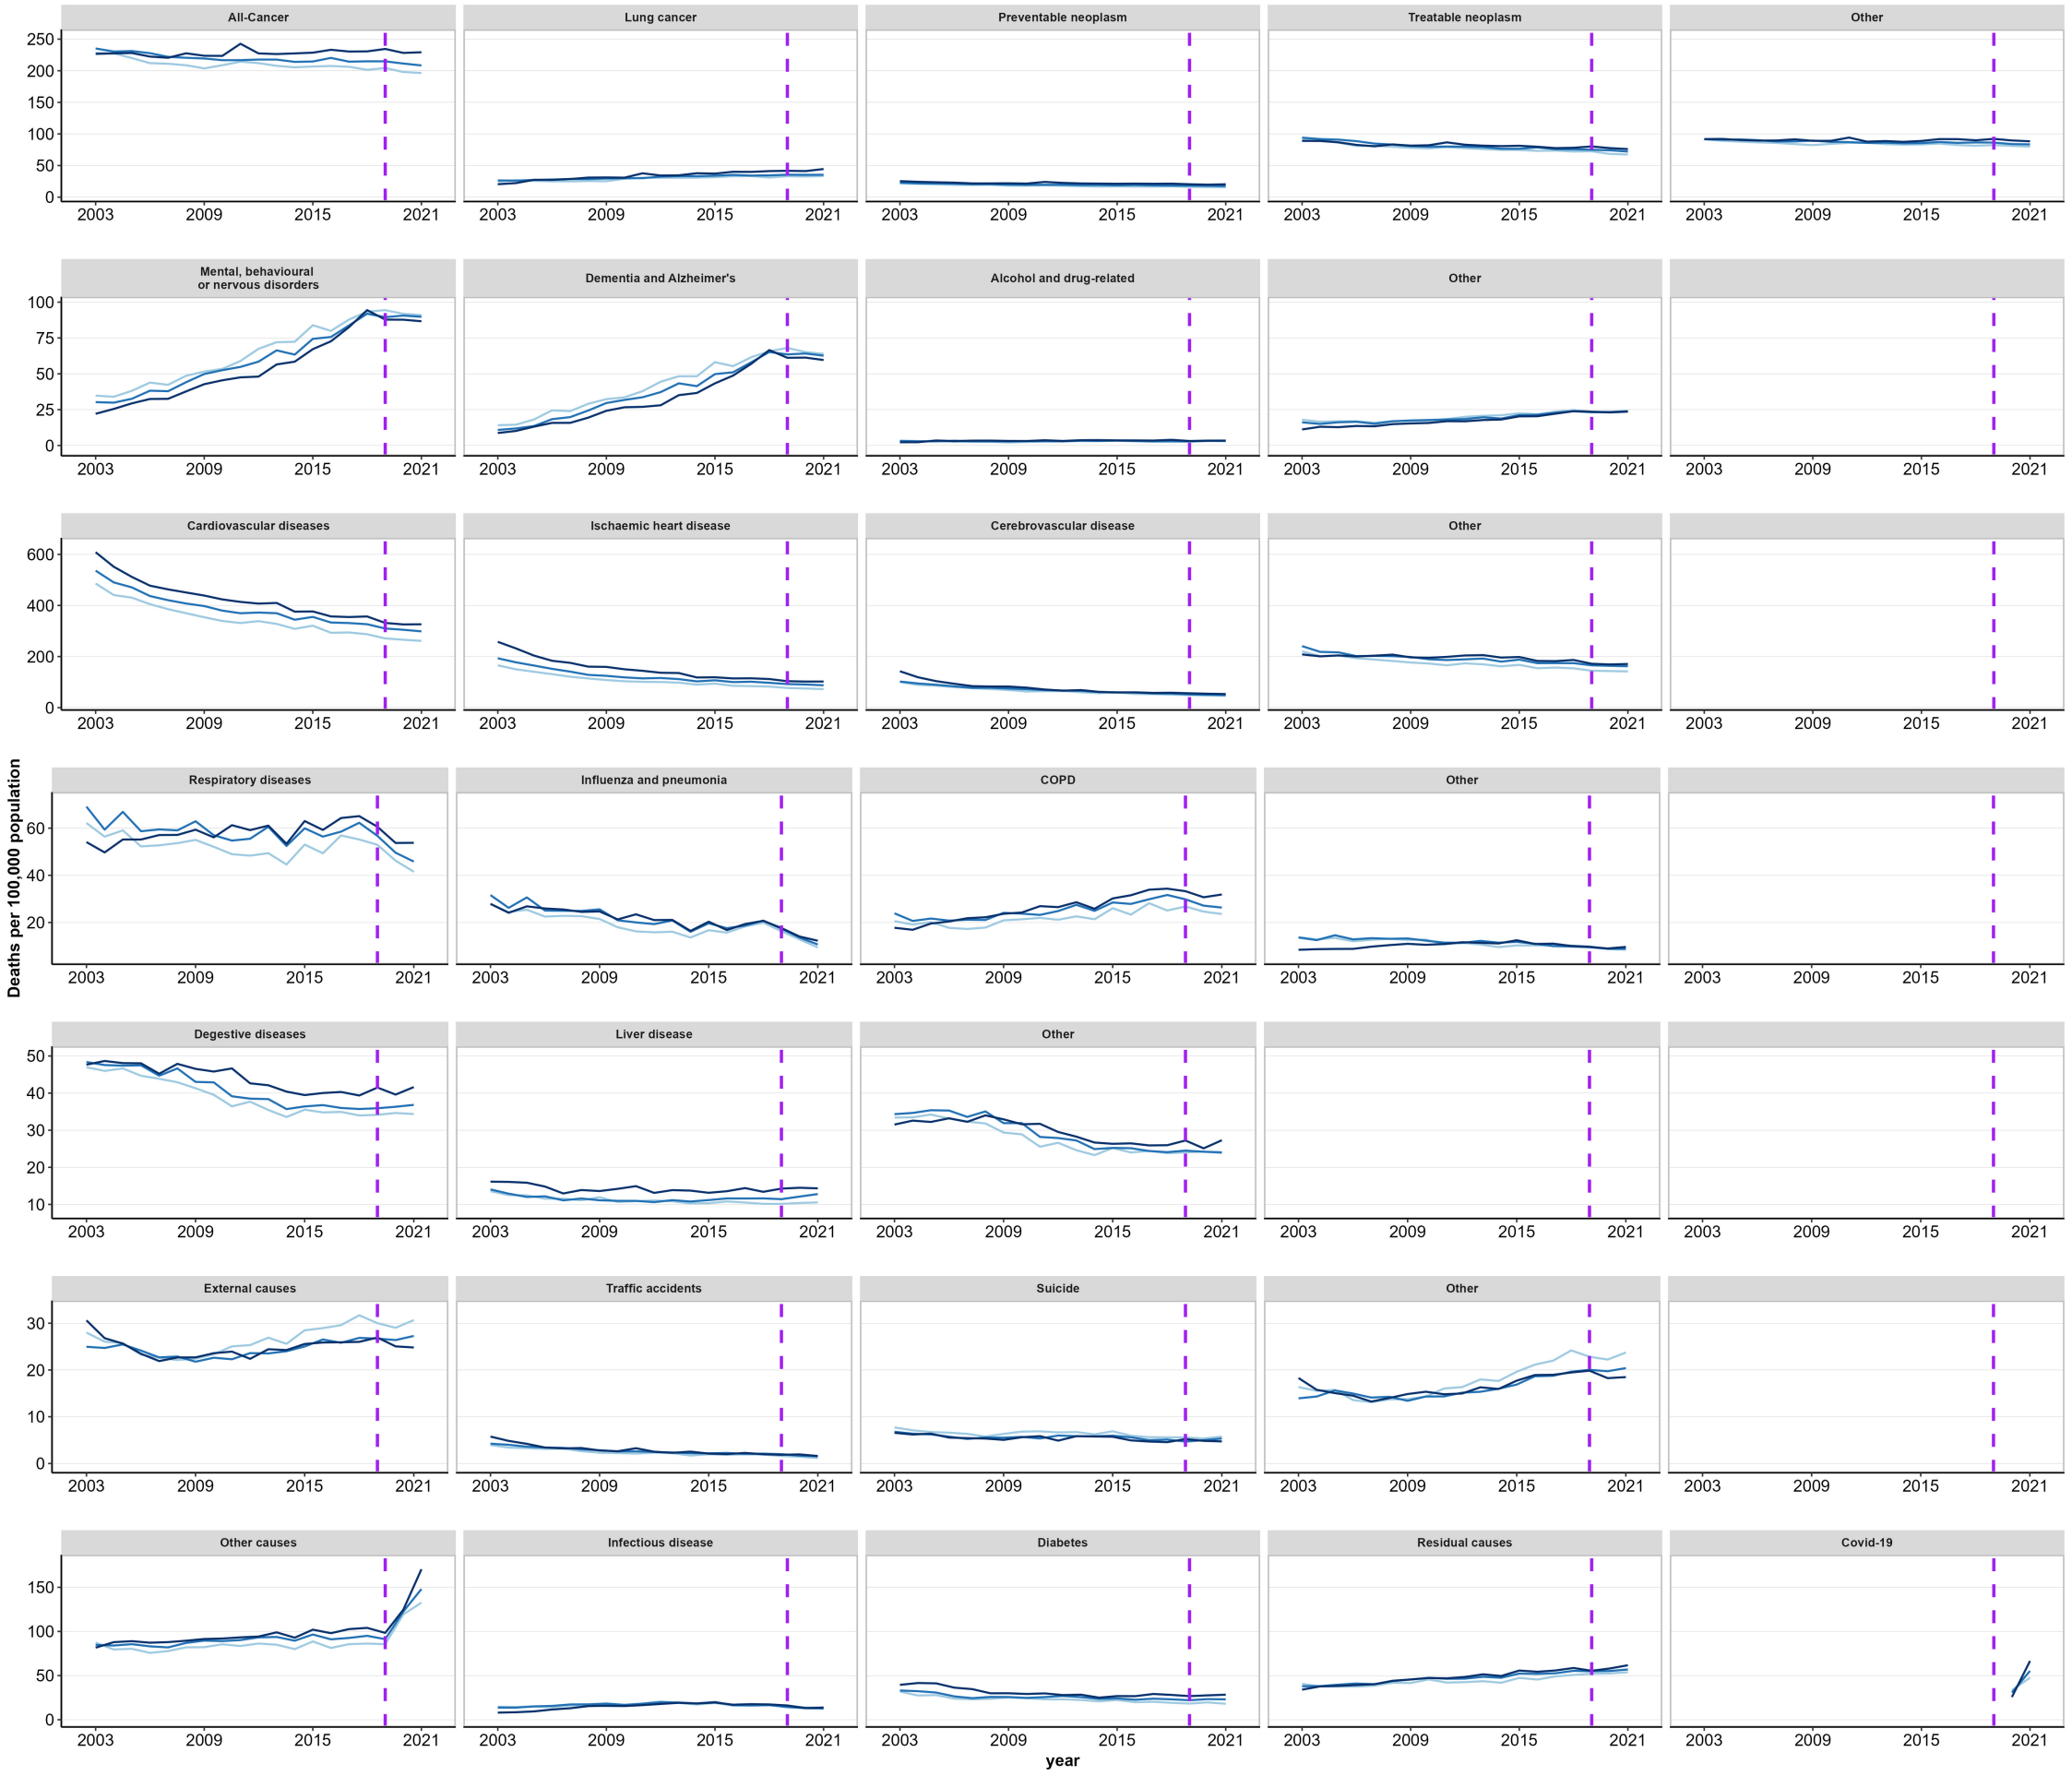

*** Many infant deaths (P00-P96, Q00-Q99) included in residual group, not separately. If we should ever consider analysing trends in infant mortality, it would probably make more sense to just look at mortality below age 1 instead of selected causes.

Fig.S1 Time trends in age-standardised mortality in men by regional socioeconomic deprivation, 2003-2021

Socioeconomic deprivation (GISD) — low (quintile 1) — middle (quintiles 2-4) — high (quintile 5)

Fig.S2 Time trends in age-standardised mortality in women by regional socioeconomic deprivation, 2003-2021

Socioeconomic deprivation (GSD) — low (quintile 1) — middle (quintiles 2-4) — high (quintile 5)

Fig. S4 Cause of death contribution to the development of life expectancy between 2003 and 2019 in least and most deprived quintile of area-based socioeconomic deprivation by sex

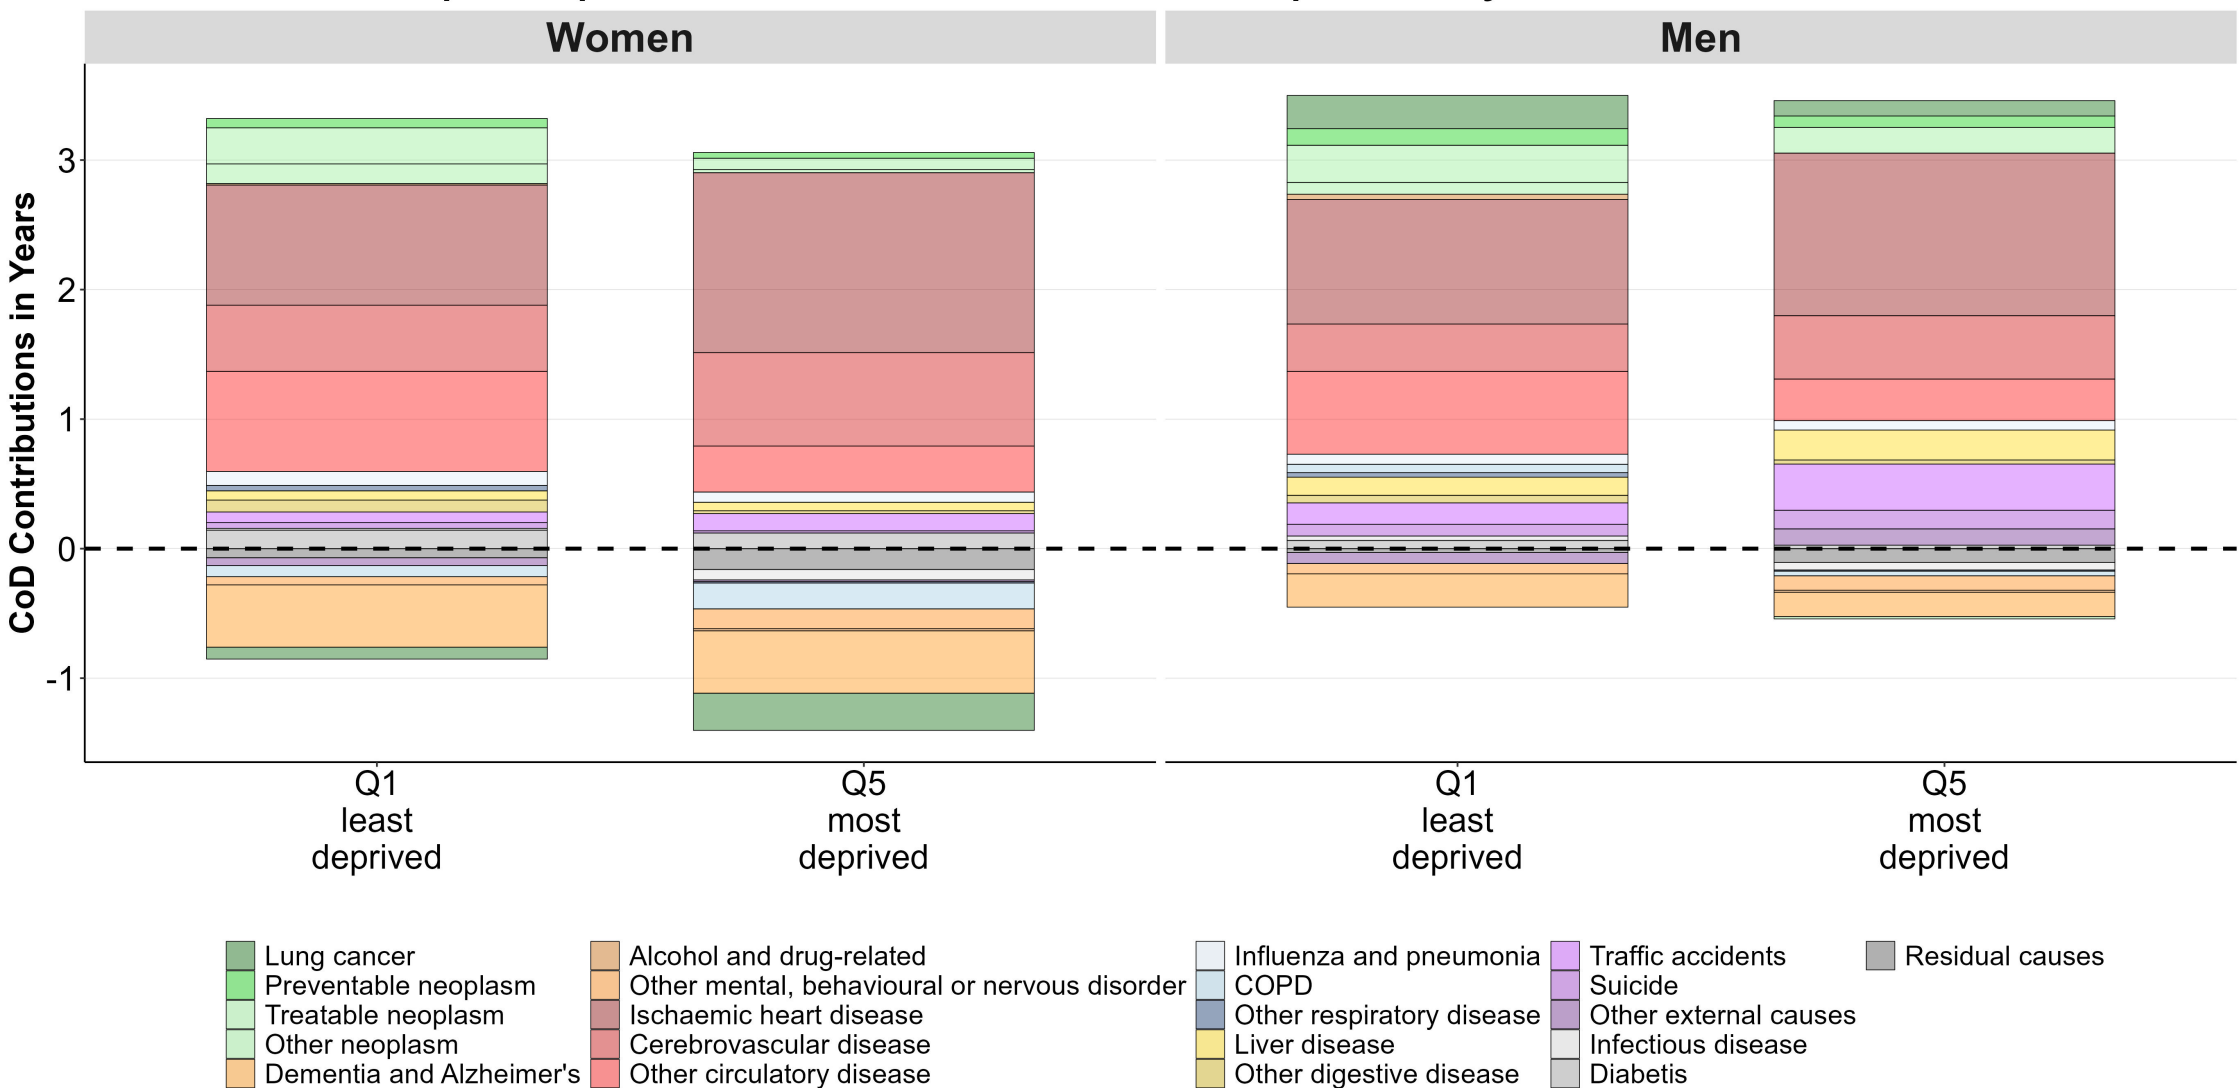

Fig.S5 Age contributions to the gap in life expectancy in men between least and most deprived quintile of area-based socioeconomic deprivation by cause of death in 2003 and 2019

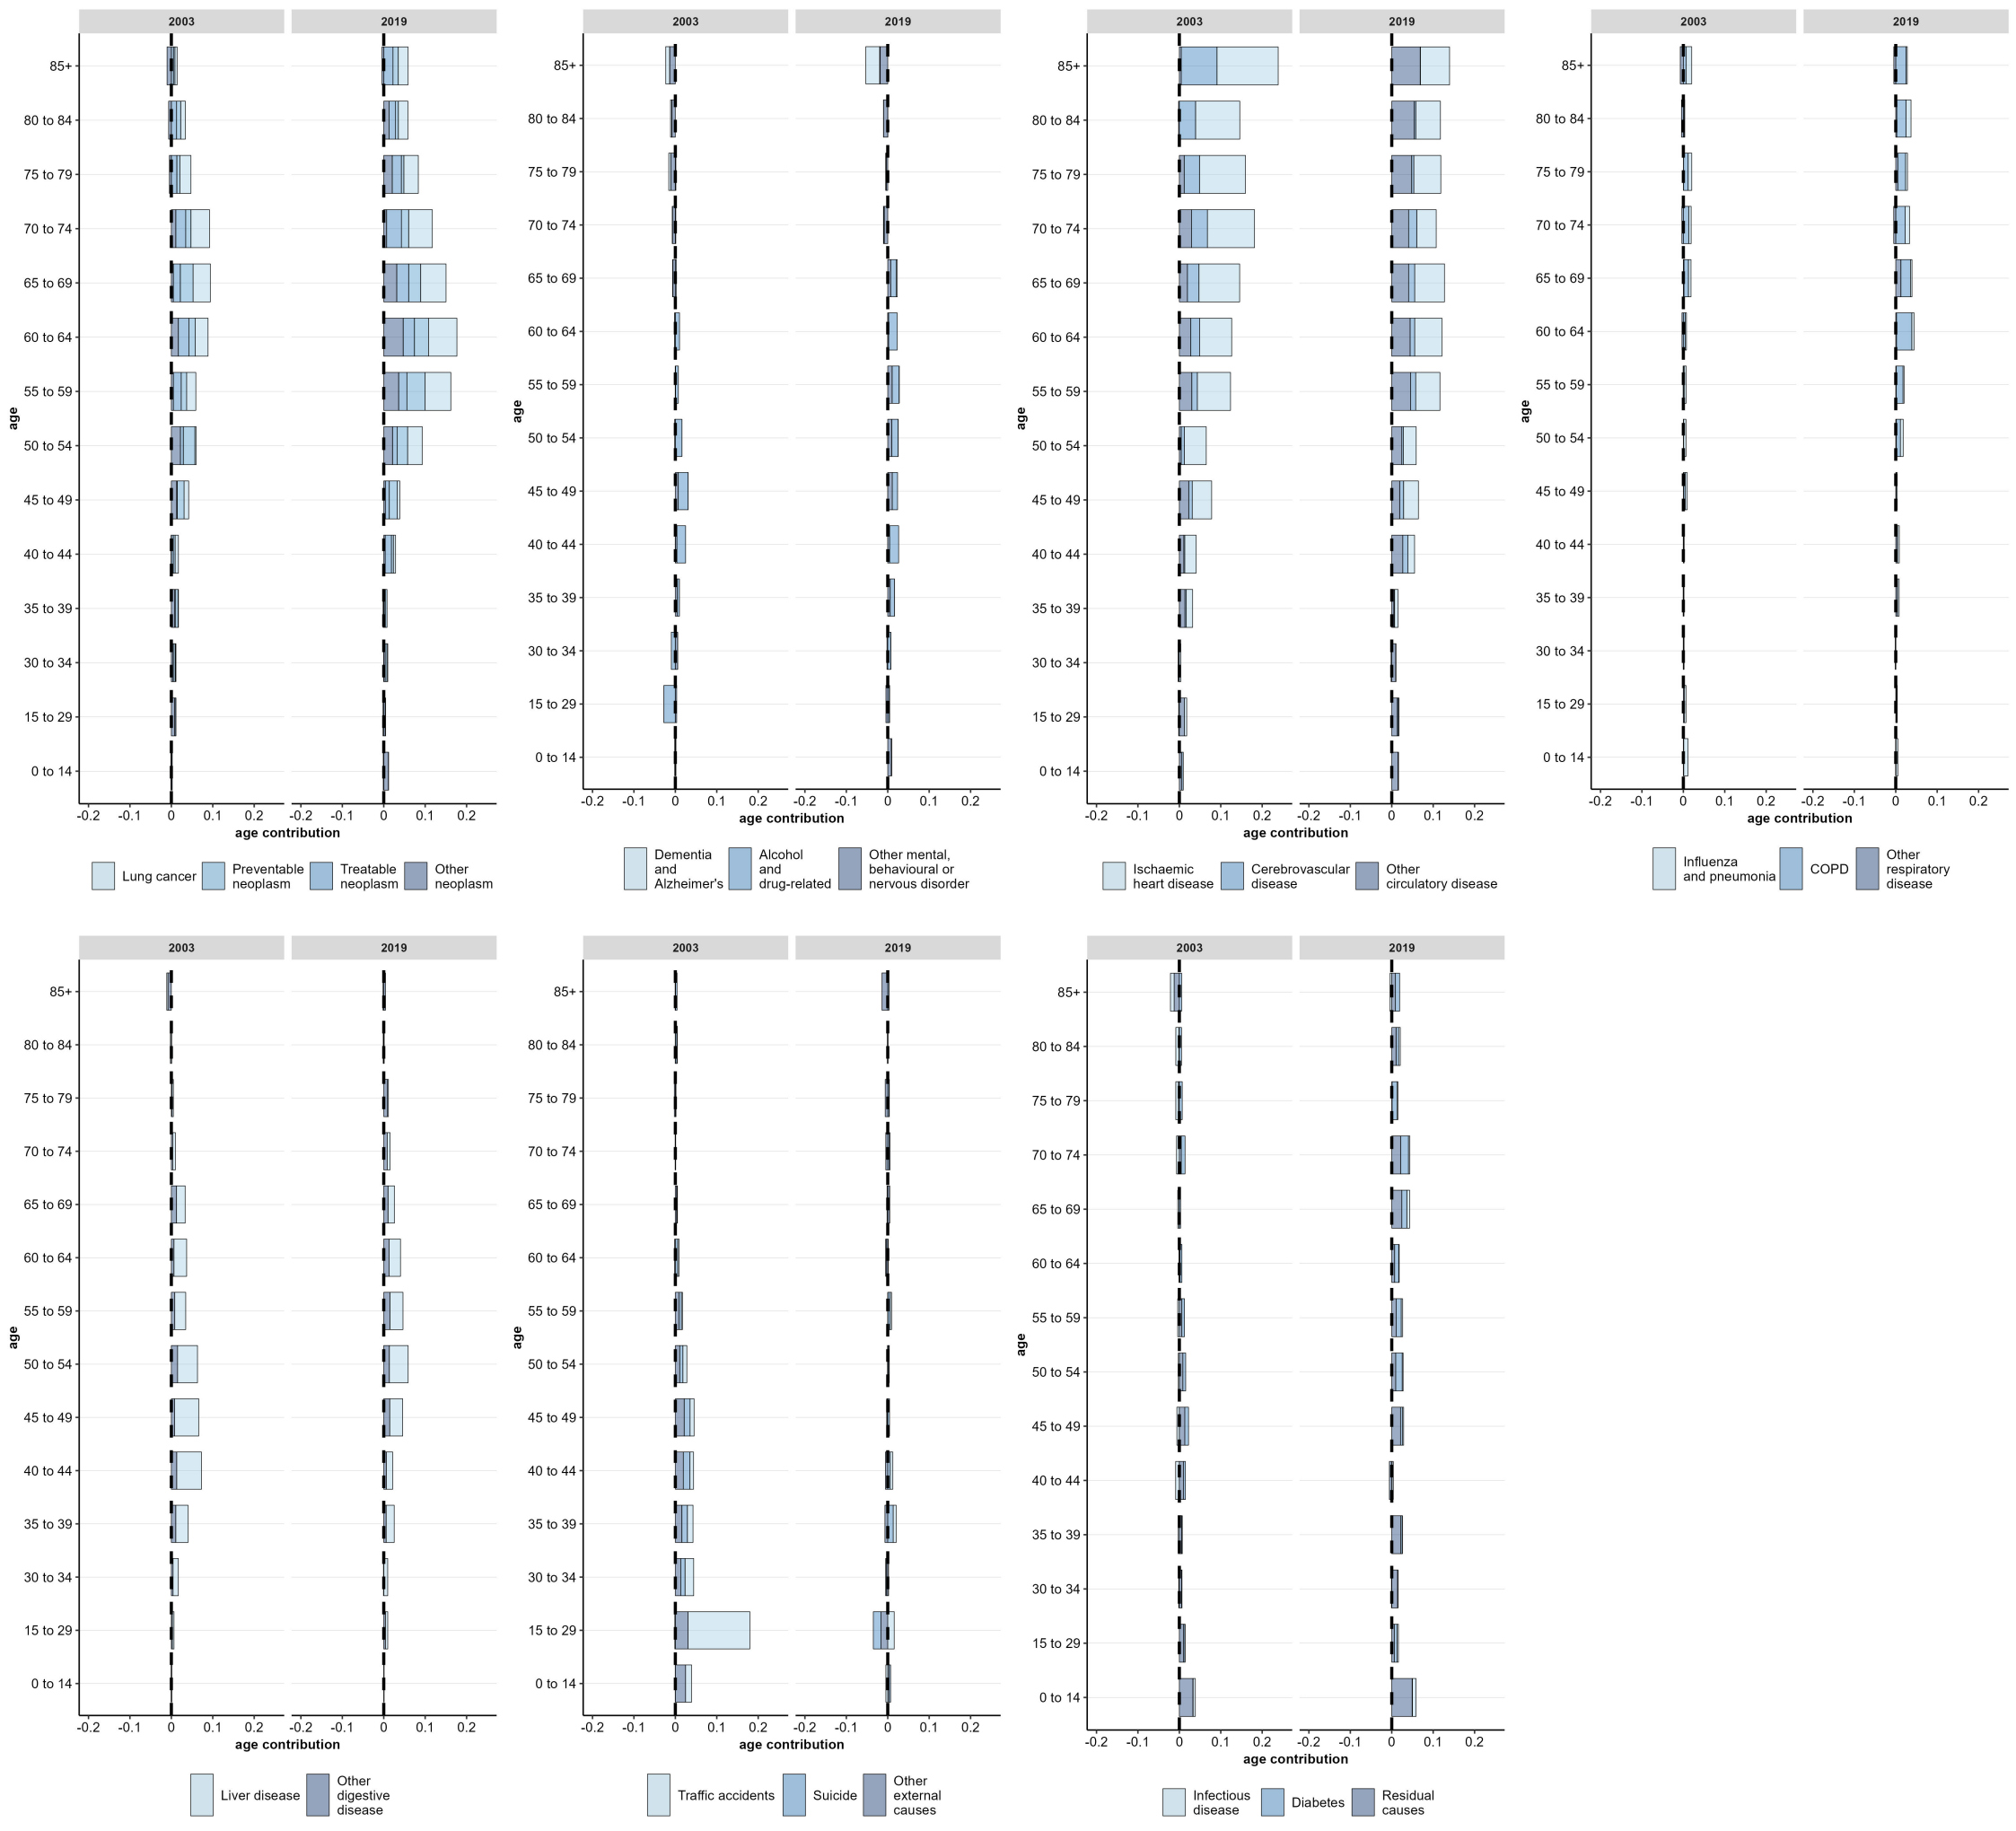

Fig.S6 Age contributions to the gap in life expectancy in women between least and most deprived quintile of area-based socioeconomic deprivation by cause of death in 2003 and 2019
