All data in table is as a % of Total population in greater capital cities (data in first row)

\* Numbers of people self-reporting in Greater Adelaide Area are higher than the aggregate values of Southern +Central +Northern due to a small number of PHAs that are captured in the Greater Adelaide region that fall outside the catchment PHAs for the three metropolitan Local Health Networks within Adelaide.

**Supplementary Figure 1: Younger population within the Northern Adelaide region.**

Broad age distribution for the A) Greater capital cities (grey bars) (percentage of Total persons) and B) Northern region (green bars) and Central and Southern regions combined (blue bars) (Total persons). Increasing age indicated by the size of the arrows. The proportions of younger persons (under 44 years) and older persons (above 45 years) are indicated above the individual bars in graph B. Data from 2020 Estimated resident population released in 2021.
