\* eFI is an electronic frailty index containing 36 deficits. We considered each deficit individually, instead of as a composite score. “Memory and cognitive problems” was not considered as a predictor, so 35 of the 36 deficits were included.

**Table S3: Regular expression coding of brain MRI reports**

| Variable                | Regular Expression Terms  |
|-------------------------|---|
| White matter disease    | <p>Notes of "T2/Flair hyperintensity", "T2/Flair hyperintensities", "T2 hyperintensity", "T2 hyperintensities" followed by a mention of any of the following words within the next 100 characters: "periventricular", "deep white matter" "subcortical white matter".</p> <p><u>Negation</u>: "no evidence of significant white matter disease", "no evidence of white matter disease", "no evidence of significant periventricular deep white matter disease", "no evidence of periventricular deep white matter disease", "no evidence of periventricular white matter disease", "minimal white matter disease".</p>  |
| White matter infarcts   | <p>Notes of "DEEP WHITE", "WHITE MATTER LESION", "WHITE MATTER INFARCTION", "WHITE MATTER INFARCT", or "WHITE MATTER DISEASE" followed by the word "INFARCT"</p> <p><u>Negation</u>: 'no evidence of acute infarction', 'no acute infarct', 'no evidence of intracranial mass or acute infarction', 'no evidence of territorial infarct', 'there is no restricted diffusion to suggest acute infarction', 'no infarction is identified', 'no infarct', 'no restricted diffusion to suggest acute infarction', 'no evidence of areas of restricted diffusion to suggest an acute infarct'. Also, any occurrence of the words "no evidence of", "without evidence of", "minimal" within 200 characters of the main White Matter Infarct flag is also considered a negation.</p> |
| Ventricular enlargement | <p>"ventricular enlargement", "the size of the ventricles is enlarged", "enlarged ventricles", "enlargement of ventricles", "enlargement of the ventricles".</p> <p><u>Negation</u>: any occurrence of the following expressions<br/>'no evidence of ventricular enlargement', 'no ventricular enlargement',<br/>'no evidence of ventricular enlargement'<br/>'no evidence of enlargement of the ventricles'<br/>'there is no enlargement of the ventricles'<br/>'without evidence of ventricular enlargement'<br/>'without evidence of enlargement of the ventricles'</p>  |
