

S1 Prompts used for large language models

Prompt 1:

Give me the sentiment regarding vaccination in tweet text delimited by triple backticks. \

Use one of the following words: neutral, negative, positive. \

```\${TWEET\_TEXT\_HERE}```

## Prompt 2:

Give me the sentiment regarding vaccination expressed by the user in the tweet text delimited by triple backticks. \

Use one of the following words: neutral, negative, positive. Include an explanation for the selection of the sentiment. \

```\${TWEET\_TEXT\_HERE}```

Prompt 3:

Give me the sentiment regarding vaccination expressed by the user in the tweet text delimited by triple backticks. \

Use one of the following words: neutral, negative, positive. Include an explanation for the selection of the sentiment. \

\

News, factual or objective tweets as well as generally ambiguous examples should be classified as neutral.\

\

Examples of positive tweets: \

* Some news of hope. Hopefully this vaccine becomes success and India becomes leader again. \

* This has been a horrendous year for so many people who have lost loved ones. It would be wonderful if the #vaccine was effective and could be administered world-wide to prevent further loss. My fingers and toes are crossed. \

\

Examples of neutral tweets: \

* AstraZeneca Pauses Vaccine Trial After Test Subject Gets Ill <url> \

* The federal government outlined a sweeping plan Wednesday to make vaccines for COVID-19 available for free to all Americans. <url>

\

\

Examples of negative tweets: \

* There's a reason these vaccines can take up to 20 years to reach market. Say no to the vaccine. \

* Vaccines may not be good for kids like the Dengue Fever vaccine. You're playing with fire. <url> \
