

**Table B 1. Results for phase locking values (PLVs) calculated using three additional sets of parameters.** PLV1, PLVs calculated using Parameter set I; PLV2, PLVs calculated using Parameter set II; PLV3, PLVs calculated using Parameter set III; STD, standard deviation; GDT, gap detection threshold.

	Range (mean, STD)	Electrode Effect	Level Effect	Effect on GDT
PLV1	0.13 – 1.0 (0.69, 0.25)	$\chi^2_{(3)} = 14.72; p < .01$	$t_{(101)} = 2.30; p = .02$	$t_{(42)} = -3.20; p < .01$
PLV2	0.11 – 0.93 (0.55, 0.23)	$\chi^2_{(3)} = 15.58; p < .01$	$t_{(101)} = 3.07; p < .01$	$t_{(42)} = -3.25; p < .01$
PLV3	0.10 – 0.84 (0.44, 0.20)	$\chi^2_{(3)} = 15.07; p < .01$	$t_{(101)} = 3.49; p < .01$	$t_{(42)} = -3.60; p < .01$
