

1

Data Quality Control

- Assembly
 - Unicycler
- Annotation
 - Prokka
- ST Assignment
 - PubMLST
- Identify Species
 - Kraken2

2

Quality Control Criteria

- Expected organism
- Expected genome size
- ≤ 350 contigs
- $\geq 35\times$ depth

3

SNP Calling

- SKA
 - for isolates with different STs.
- Snippy
 - for isolates with the same STs.

4

Cluster Determination

- Interspecies SNPs ≤ 15
- *C. difficile* SNPs ≤ 2

5

Epidemiological Links

- EHR Review
- Infection Prevention and Control Team Intervention
