

Hypertension, cardiometabolic traits and cardiovascular events in women with uterine fibroids: a genetic correlation and Mendelian randomization study—Supplementary material

Henry et al.,

Supplementary tables

| Phenotype | Trait | N (Cohort or Cases / Controls) | Study reference (PMID) |
|--|-------|--------------------------------|--|
| Systolic blood pressure | SBP | [637578 – 745820] | 30224653 |
| Diastolic blood pressure | DBP | [647307 – 757601] | 30224653 |
| Body mass index | BMI | 359983 | UKBB (https://broad-ukb-sumstats-us-east-1.s3.amazonaws.com/round2/additive-tsvs/21001_raw.gwas.imputed_v3.both_sexes.tsv.bgz) |
| Waist-to-hip ratio (adjusted on BMI) | WHR | 697734 | 30239722 |
| High-density lipoprotein | HDL | 315133 | UKBB (https://broad-ukb-sumstats-us-east-1.s3.amazonaws.com/round2/additive-tsvs/30760_raw.gwas.imputed_v3.both_sexes.varorder.tsv.bgz) |
| Low-density lipoprotein | LDL | 343621 | UKBB (https://broad-ukb-sumstats-us-east-1.s3.amazonaws.com/round2/additive-tsvs/30780_raw.gwas.imputed_v3.both_sexes.varorder.tsv.bgz) |
| Triglycerides | TG | 343992 | UKBB (https://broad-ukb-sumstats-us-east-1.s3.amazonaws.com/round2/additive-tsvs/30870_raw.gwas.imputed_v3.both_sexes.varorder.tsv.bgz) |
| Cigarettes per day | CPD | 337334 | 30643251 |
| Smoking initiation | SI | 1232091 | 30643251 |
| Sex hormone-binding globulin | SHBG | 312215 | UKBB (https://broad-ukb-sumstats-us-east-1.s3.amazonaws.com/round2/additive-tsvs/30830_raw.gwas.imputed_v3.both_sexes.varorder.tsv.bgz) |
| Coronary artery disease | CAD | 60801 / 123504 | Cardiogram |
| Myocardial infarction | MI | 42561 / 123504 | Cardiogram |
| Stroke | AS | 40585 / 406111 | 29531354 |
| Intracranial aneurysm | IA | 7495 / 71934 | 33199917 |
| Migraine | MIG | 30465 / 143147 | 36939796 |
| Type 2 diabetes | T2D | 74125 / 824006 | 30297969 |
| Spontaneous coronary artery dissection | SCAD | 1917 / 9292 | 37248441 |
| Fibromuscular dysplasia | FMD | [1111 - 1578] / [5049 - 7100] | 34654805 |
| Uterine Fibroids | UF | 35474/ [190825 – 208850] | 31649266 |

Supp. Table 1: List of summary statistics leveraged in the study.

| Exposure | Outcome | N SNP | BETA (ivw) | SE (ivw) | P (ivw) | BETA (egger) | SE (egger) | P (egger) | BETA (weighted median) | SE (weighted median) | P (weighted median) | Directionality | Directionality P value |
|--|--|-------|------------|----------|-----------------------|--------------|------------|-----------------------|------------------------|----------------------|-----------------------|----------------|------------------------|
| Migraine | UFs | 23 | -0,002 | 0,001 | $2,7 \times 10^{-01}$ | 0,004 | 0,003 | $2,1 \times 10^{-01}$ | -0,0004 | 0,002 | $8,3 \times 10^{-01}$ | TRUE | $1,4 \times 10^{-39}$ |

Supp. Table 2: Bi-directional Mendelian randomization (MR) analyses between UFs vs migraine and cardiovascular diseases.

N SNP: count of SNP used as instrumental variables in the MR analyses, BETA: effect size obtained from inverse variance weighted (IVW), Egger and weighted median MR analyses, SE: standard error of effect size, P: P-value for the association.

Supplementary figures

Figure supp 1: Schematic diagram of the different settings of Mendelian Randomization. **(A)** represents the univariate Mendelian Randomization analysis, used to estimate the causal effect of potential cardiometabolic risk factors. **(B)** represents the bi-directional Mendelian randomization analysis, used to estimate the reverse causality between uterine fibroids and cardiovascular diseases. The genetic variants used were selected with the GWAS significant threshold of $P < 5 \times 10^{-8}$.

Figure supp 2: Forest plot of the bi-directional Mendelian Randomization between uterine fibroids and some cardiovascular diseases. Beta coefficient of Mendelian Randomization (β) is represented on the x-axis and range represents the 95 % CI. P-value of association for 8 tests adjusted using Bonferroni method is indicated as: * $P.adj < 0.05$. **(A)** represents the MR from UF to cardiovascular diseases. **(B)** represents the MR from cardiovascular diseases to UF.
