

Figure S1 – Correlation Between the Reception of Informed Consents, indicative of Participation Acceptance, and the Subsequent Return of Self-Collected Samples.

Table S1 – Reasons for Women's Ineligibility to Participate in the Study: Responses from the Invitation Letter and Reminder Phone Calls.

Factors Contributing to Women's Ineligibility for Participation in the Study	n(%)
Did not fulfil the study criteria	
Recent participation in CC screening program	43(37.7)
Hysterectomised	32(28.0)
Pregnant	5(4.4)
Other Reasons	
Unable to perform self-sampling due to underlying health conditions	5(4.4)
Deceased	2(1.8)
Absence from the country	19(16.7)
Insufficient address/contacts	8(7)
Total	114(100)
