

Supplementary Materials 1.

Table A. Outcomes identified through synthesis with the reasons they are not unique concepts (n=25).

Unique Concept	Definition	Verbatim Outcomes from the Systematic Review	Reason not unique
Wellbeing	A state of positive feelings and meeting full potential in the world (being the best person you can be in society). It can be measured subjectively and objectively using a salutogenic (positive) approach. ¹	Overall wellbeing	Context adjective
		General wellbeing	Context adjective
		Self-perceived	Methodological adjective (how)
		Subjective wellbeing	Methodological adjective (how)
		Personal wellbeing	Context adjective
		Individual wellbeing	Context adjective
		Happiness	Hedonic component
		Mental wellbeing	Artificial subgroup
		Emotional wellbeing	Artificial subgroup
		Psychological wellbeing	Artificial subgroup
		Physical wellbeing	Artificial subgroup
		Occupational wellbeing	Context adjective
		Professional wellbeing	Context adjective
		Job related wellbeing	Context adjective
		Work related wellbeing	Context adjective
		Physician wellbeing	Methodological adjective (who)
Resident wellbeing	Methodological adjective (who)		
Organisational wellbeing	Methodological adjective (who)		
Unit wellbeing	Methodological adjective (who)		
Life satisfaction	Separate concept to wellbeing, subjective appraisal of how much the person like the life they lead; one of the indicators of quality of life. ^{2,3}	Satisfied with life	Phrasing
Quality of life	Separate concept to wellbeing, subjective appraisal of individuals positioned in life in the context of the culture and value systems in which they live and in relation to their goals, expectations, standards, and concerns. ⁴⁻⁶	Social quality of life	Artificial subgroup
		Environmental quality of life	Artificial subgroup
Wellness		Health behaviours	Component

Unique Concept	Definition	Verbatim Outcomes from the Systematic Review	Reason not unique
	Separate concept to wellbeing, subjective or objective evaluation of active pursuits of behaviours, choices and lifestyles that lead to a state of holistic health. ⁷	Physician wellness	Methodological adjective
Optimism	Hopeful transcendence beyond (rising above) immediate circumstances. ⁸	Spiritual wellbeing	Subgroup of wellbeing Definition of spiritualism the same as optimism, if religion is left out [559]
Health	Subjective or objective evaluation of state of complete physical, mental and social wellbeing, not merely the absence of disease or infirmity (the beneficial effects of green spaces for example). ^{9 10}	Mental health	Artificial subgroup
		Psychological health	Artificial subgroup
		Self-perceived health	Methodological adjective
		Satisfaction with health	Methodological adjective
		General health status	Phrasing
Cognitive function	Objective evaluation of domains such as, but not limited to, Attention, Memory, Processing speed. ^{11 12}	Mental energy	Methodology-self report measure
Self-esteem	Self-acceptance, self-worth, sense of coherence (ability to predict events, belief in ability to manage them, that it is worth the effort, ability to be their true self). ¹³	Confidence	Component
		Professional self esteem	Context adjective
		Global self esteem	Context adjective
Sleep	Subjective or objective evaluation of duration, quality, and sense of feeling rested. ¹⁴	Sleep problems	Methodology - pathogenic
Financial security	Objective ability to pay for satisfactory accommodation, bills, care of dependents, ability to save for retirement, ability to cope with a sudden fall in income, ability to pay unexpected, but necessary expenses. ¹⁵	Household economic wellbeing	Wellbeing subgroup
Positive relationships	Subjective or objective assessment of beneficial human connections. ¹⁶	Satisfaction with family relations	Methodology
		Satisfaction with family support	Methodology
Psychological need satisfaction	Subjective or objective assessment of how autonomy, belonging and competence needs have been supported by colleagues (inclusive, positive culture), managers (adequate workforce to allow development), supporting services (IT, administration, legal, occupational health). ¹⁷	Job demand support control model	Component
Job satisfaction		Occupational choice satisfaction	Methodology

Unique Concept	Definition	Verbatim Outcomes from the Systematic Review	Reason not unique
	Subjective or objective evaluation of how much they like their choice of work profession, specialism, roles. ¹⁸	Work satisfaction	Synonym
		General job satisfaction	Context adjective
		Career satisfaction	Synonym
		Professional satisfaction	Synonym
Morale	Subjective or objective evaluation of feelings about the future ability of an individual, group or organisation to have and meet shared goals/values. ¹⁹	Career morale	Context adjective
		Speciality morale	Context adjective
		Participation	Methodology
		Goal clarity	Component
Engagement	Subjective or objective assessment of involvement and absorption with, commitment to, work. ²⁰	Motivational effort	Methodology
		Employee job intentions	Methodology
Altruism	Subjective or objective evaluation of selfless concern for the wellbeing of others. ²¹	Altruistic behaviour	Methodology
Life work balance	Subjective or objective quantity, quality, and equity of time away from work and at work, the salience/clarity of the roles (the ability to work flexibly). ²²⁻²⁴	Satisfaction with work-life balance	Methodology
		Work rest balance	Phrasing
		Work pressure	Component
		Role behaviour	Methodology
		Salience with life roles	Component
Professional Development	Subjective or objective assessment of ability to participate and engage with learning and teaching knowledge and skills, and to progress. ²⁵	Skills development	Context adjective
		Efficiency	Methodology
Identification with work	Subjective or objective assessment of value and meaning assumed by the individual, or a group, at work. ¹⁸	Psychological identification with work	Artificial subgroup
		Meaning at work	Component
		Meaning in work	Component
Resilience	Subjective or objective individual, or group level, preservation of, or return to, previous function after exposure to trauma. ²⁶	Strain resistant resources	Components
Voice and influence	Subjective or objective assessment of ideas, concerns and expectations expressed informing policy and practice. ²⁷	Influence	Component
Confidence in leadership	Subjective or objective assessment of management competence, transparency and compassion, inclusivity,	Supportive leadership	Component
		Authority	Synonym

Unique Concept	Definition	Verbatim Outcomes from the Systematic Review	Reason not unique
	engagement and empowerment of those they are responsible and accountable for. ²⁷	Perceived organisational support	Context component
Recognition satisfaction	Subjective or objective evaluation of appreciation by colleagues, patients, public, government (civility, ward rounds/appointments attended and on time). ^{28 29}	Feedback	Methodology
Job plan/rota/rotation satisfaction	Subjective or objective evaluation of ability of job plan/rota/rotation to account for the quantity, types, of work (workload), the intensity, duration, of physical, mental and emotional demands and time rest/activities/resources needed to maintain it. ³⁰	Workload	Component
Good clinical practice	Subjective or objective assessment of ability to engage with high-risk cases, follow standards where appropriate not rigidly, use diagnostic tests and treatment when clinically indicated and evidence based, not just in case. ³¹	Self-reported competence	Methodology

Table B. Unique outcomes for which there were no other terms (n=9)

Unique concept	Definition
Sexual wellbeing	Subjective, or objective, assessment of sense of self and body, appreciating feelings of pleasure and desire, developing and maintaining mutually respectful gender equal relationships, safe and pleasurable sexual interactions. ³²
Personality	Observable enduring characteristics/dispositions/tendencies to engage in certain patterns of behaviour. ⁸
Diet	Subjective, or objective, evaluation of the nutritional content, quantity, and timing. ³³
Physical activity	Subjective, or objective, assessment of the ability to participate in physical activity and the quality and quantity of physical exercise. ³⁴
Physiological functioning	Objective (snapshot) of body function i.e., Electroencephalography (EEG), Heart Rate Variability, Electro-dermal activity (temperature, sweating), hypothalamic-pituitary axis hormones. ^{11 35 36}
Workability	Timely, objective assessment of having occupational competence and virtues, the health required for competence in an appropriate work environment by appropriate occupational health professionals. ³⁷
Compassion Satisfaction	Subjective evaluation of ability to receive gratification from caregiving to patients, patients' families, colleagues (satisfaction with non-financial rewards of the work). ³⁸

Psychological safety	Subjective or objective evaluation of the consequences of taking an interpersonal risk at work (trust, information sharing). ³⁹
Satisfaction with patient care	Subjective, or objective assessment of quality of health and social care their patients receive.

Table C. List of unique outcomes identified from other sources (n=9)

Unique concept	Definition	Sources
Meaning in life	Separate concept to wellbeing, subjective sense of purpose, engagement with a philosophy of life or life-goals, fulfilment. ^{40 41}	WHOQOL SRPB ⁴² European Social Survey wellbeing module ⁴³
Vitality	Relaxed possession of energy (physical, mental and emotional) and vigour, it is not actively strived for. ⁴⁴	European Social Survey wellbeing module ⁴³ Wilson and Cleary framework (1995) ^{5 45} WHO ICF ⁴⁶
Novelty	Subjective or objective, growth through new experiences, learning. ⁴⁷	European Social Survey wellbeing module ⁴³ [from Doctor Engagement Event]
Recreational activity	Subjective, or objective, evaluation of the ability to participate and participation in non-work/leisure activities and the qualities of those chosen activities. ⁴⁸	Diener et al (1999) ⁴⁵
Engagement with preventative medicine	Subjective, or objective, assessment of participation in screening programmes they are eligible for and vaccine, timely treatment.	Outcomes for Graduates ⁴⁹ NHS People Plan ²⁷
Financial reward satisfaction	Subjective, or objective, evaluation of ability to receive gratification from financial reward for effort. ^{50 51}	Contract and pension disputes ^{52 53}
Personal safety	Subjective, or objective, ability to go about work, and get to and from work, free from threat and safe from physical or psychological harm (infection, radiation, bullying, harassment, theft, assault).	NHS People Plan ²⁷
Self-Care	Subjective, or objective, assessment of behaviours to look after own health and wellbeing at work (taking breaks, time off work for sickness), accessing appropriate support services, adequate resources (estates, workforce, rapid-access self-referral services) to support this.	Outcomes for Graduates ⁴⁹
Emotional Intelligence	Subjective, or objective, self-awareness, self-management, social-awareness, and relationship management. ^{54 55}	Building and strengthening leadership ⁵⁶
