S2 Table

S2 Table. List of variables in the data extraction sheet and their description

SN	Data item	Description
1	Year	Year of publication of the article
2	First author	First author of the article
3	Country	Country of the first author
4	Study objective	Objective of the research with a real-world application
5	Study design	Proof of concept/Clinical trial/application
6	Name of blockchain	Hyperledger/Ethereum/Bitcoin/Other
7	Type of blockchain	Private/Consortium/Public
8	Consensus mechanism	Proof of Work/Proof of stake/Other
9	Use of smart contract	Yes/No - with description
10	Data storage	Centralized or decentralized data storage
11	Summary / Conclusion	The summary or conclusion of the proposed solution
12	Research contribution	Our appraisal of the proposed solution

S3 Table

S3 Table. Clinical trial case record form used for Blockchain simulation*

Q.No.	Question	Answer
ENROLEMENT		
1	Do you have the Long COVID symptom of fatigue?	Yes / No (End form)
2	Consent	Yes / No (End form)
BASELINE Data		
3	Participant enrolment number	LC001
4	Group (Allotted by randomization)	A / B
5	Date of Enrolment	DD/MM/YYYY
6	Age in completed years	Integer
7	Sex	Male/Female/Other
8	Highest level of education completed?	Open
9	Do you have history of allergy?	Yes / No
10	Did you receive Covid-19 vaccine?	Yes / No
11	Any diagnosed disease or co-morbidities?	Yes / No
FOLLOW-UP after 1 month		
12	Date of final follow-up	DD/MM/YYYY
13	Number of antihistamine tablets taken:	Integer
14	Do you have the Long COVID symptom of fatigue during the final follow-up?	Yes / No

*Title of the study used for simulation: Antihistamines for treatment of Long COVID fatigue – A placebo controlled double blinded Randomized Controlled Trial
