14. gets excited when something good happens to him/her	Never	Sometimes	Often	Always		
15. is interested in meeting friends	Never	Sometimes	Often	Always		

SCORING

All items marked as part of the 'Motivation and Support' subscale are reverse scored. Subscores are indicated by the shaded boxes to the right of the scale.

Items are scored as follows*:

0 = Never

1 = Sometimes

2 = Often

3 = Always

*For reverse scored items, 3 = Never, 2 = Sometimes, 1 = Often, 0 = Always.

Subscores:

- Motivation and Support Sub-score (9 items):...../27
- Impulsivity and Challenging Behaviours Sub-score (6 items):...../18
- Total score (for clinical purposes only):...../45

Higher scores indicate greater impairment, reflecting increased behavioural change including apathy/impulsivity.
