

Supplemental File 1: Search strategies for MEDLINE, CINAHL, and SCOPUS

Due to the emerging nature of this field, an updated search of the literature was conducted in March 2022. The search for relevant articles was applied in the same three academic databases: MEDLINE, CINAHL, and Scopus. No date limits were applied to the searches and the same search was applied with minor changes, such as the removal of body weight and reduced rank regression.
