↑ - increased risk, ↓ - decreased risk, 0 no risk, -- SNP not investigated in study

Gene variants were only added to the list if they appeared in more than one study. Otherwise a description of findings is in the text.

†SNP rs800292 refers to CFH I62V and SNP s1061170 to CFH Y402H

‡C2 and CFB are in linkage disequilibrium. They are shown together or separately in different studies

**Supplementary Table 2. Candidate approach to identify genetic associations with number of (i) reticular pseudodrusen and (ii) drusen.**

	Rs identifier	chr:pos[hg19]	EA/OA (EAF)	Beta (95% CI)	P	Nearest gene	Advanced or early AMD locus

Source	Imaging modalities							Minimal number of RPD required	Late AMD only	Genes explored	Pure RPD	Mean age
	CFP	NIR	SD-OCT	FAF	RF	FA	ICG					
Lin et al., (CATT trials), 2018 <sup>40</sup>	x				x	x		NA	No	AMD partial	0	78
Domalpally et al., 2019 <sup>41</sup>	x			x				5	No	AMD	0	79
Dutheil et al., (Alienor Study), 2020 <sup>42</sup>	x	x	x	x				NA	No	AMD partial	22	81.9
Altay et al. (EUGENDA Study), 2021 <sup>43</sup>		x	x					NA	No	AMD	9	80.7
Thomson et al., 2022 <sup>9</sup>		x	x	x				NA	No	AMD partial	29	81.3

AMD = age-related macular degeneration, CFP = Colour fundus photography, FA = Fluorescein angiography, FAF = Fundus autofluorescence, ICG = Indocyanine green, NIR = Near infrared photography, RF = Red-free, RPD = reticular pseudodrusen, SD-OCT = Spectral domain optical coherence tomography

\* - Median age. Mean age was not provided.

AMD partial = only some of known AMD-associated genetic loci were explored

## Supplementary figures

**Supplementary figure S1. Locus zoom plots for lead variants from the genome-wide association study on number of reticular pseudodrusen.**

**Supplementary figure S2. Manhattan and quantile-quantile plots of continuous GWAS results for mixed RPD with or without drusen) and mixed drusen with or without RPD).**

**Supplementary figure S3. Manhattan and quantile-quantile plots of case-control GWAS results for pure RPD (in the absence of drusen) and pure drusen (in the absence of RPD)**
