CMR findings are presented as mean ± standard deviation. P-values denotes the independent t-test, p-values marked † denotes the Mann Whitney U test. Abbreviations: CMR = cardiovascular magnetic resonance imaging; RV = right ventricle; RVEDV = right ventricular end-diastolic volume; RVESV = right ventricular end-systolic volume; RVSV = right ventricular stroke volume; RVEF = right ventricular ejection fraction; RV GLS = right ventricular global longitudinal strain; RV AVPD = right ventricle atrioventricular plane displacement; WD = Wilson disease.
