

Appendix 1: Characteristics of included studies (N=28) grouped by HCID type

Study	Study setting, Income classification (79)	Study design	Participants	HCID	Key themes Identified	Risk of bias
Alanezi, F. et al. (2021)(37)	Saudi Arabia (HIC)	Qualitative	Nurses (28.4%), senior physicians (23.5%), assistant physicians (12.7%), consultants or chief physicians or medical students (10.8%), pharmacists or administrators (8.8%), others (n=102).	COVID-19	-Logistics organisational support	High
Chuang, E. et al. (2020)(27)	USA (HIC)	Qualitative	Palliative care focus group: Social workers, physicians (n=14). Critical care focus group: physician fellows, junior attending physicians, senior attending physicians, and intensive care unit leadership (n=25). Nursing focus group (n=4). Respiratory therapist (n=20). Interviews: one academic hospital medical director, directors of emergency medicine, and one respiratory therapist.	COVID-19	-Guidelines characteristics, development, and dissemination -Logistics organisational support -Realities of implementing guidelines	High
Driver, J. A. et al. (2020)(45)	USA (HIC)	Quantitative	Veterans received outpatient monitoring (n=120)	COVID-19	-Logistics organisational support	Moderate
Francisco, M. A. et al. (2020)(40)	USA (HIC)	Quantitative	Nurses (n=78)	COVID-19	-Logistics organisational support -Realities of implementing guidelines	Moderate
Gonzalez, A. M. et al. (2020)(32)	Spain (HIC)	Qualitative	Clinical cases (n=5)	COVID-19	-Guidelines characteristics, development, and dissemination -Logistics organisational support -Realities of implementing guidelines	Moderate
Kurotschka, P. K. et al. (2020)(30)	Italy (HIC)	Qualitative	General practitioners (n=149)	COVID-19	-Guidelines characteristics, development, and dissemination	High
Alqahtani, J. S. et al. (2020)(43)	Based in UK ** (HIC)	Quantitative	Critical care practitioners (n=502)	COVID-19	-Logistics organisational support	Moderate

Ismail, M. et al. (2021). (44)	Qatar (HIC)	Quantitative	Primary care physicians (n=294)	COVID-19	-Guidelines characteristics, development, and dissemination	High
Balkrishnan, P et al. (2019). (38)	India (LMIC)	Quantitative	Patients (pre-intervention phase of six months having 84 patients and post-intervention phase of six months having 50 patients) (n= 134).	Dengue	-Logistics organisational support	Moderate
Handel, A. S. et al. (2016). (41)	Ecuador (Upper-Middle Income)	Quantitative	Healthcare providers (n=76) medical doctors (82 %) Nurses (14 %).	Dengue	-Logistics organisational support	High
Kularatne, S. A. et al. (2003). (42)	Sri-Lanka (LMIC)	Quantitative	Consultant physicians(n=35) Consultant paediatricians (n=15).	Dengue	-Guidelines characteristics, development, and dissemination -Realities of implementing guidelines	Low
Wharton-Smith, A. et al. (2014) (34)	Malaysia (Upper-Middle Income)	Qualitative	Medical officers. Six FGDs: (n= 54). Interviews (n=14).	Dengue	-Guidelines characteristics, development, and dissemination -Logistics organisational support -Realities of implementing guidelines	High
Barniol, J. et al. (2011). (46)	18 countries in four WHO regions	Mixed method	Participants (n=1288) Clinicians, nurses, communicable disease control staff, epidemiologists, management from health care facilities. Chart review total (n=3248).	Dengue	-Logistics organisational support -Realities of implementing guidelines	High
Raffetin, A. et al. (2018). (49)	France (HIC)	Mixed method	Family physician (n=33)	EVD	-Guidelines characteristics, development, and dissemination	Moderate
Christine Loignon et al. (2018). (36)	West Africa	Qualitative	Stakeholders (decision-makers, physicians, nurses). (n=29).	EVD	Logistics organisational support	High
Battista, M. C. et al. (2019). (39)	West Africa	Quantitative	Physicians (n= 24, (83%)), nurses (n= 3, 10%), and project management and coordination (n=2, 7%). Total sample: n= 29.	EVD	-Guidelines characteristics, development, and dissemination -Logistics organisational support	Moderate
Broom, J. et al. (2016). (26)	Australia (HIC)	Qualitative	Consultants (n=8), and nurses (n=13). Total sample: n= 21.	EVD	-Guidelines characteristics, development, and dissemination	High
Erland, E. et al. (2017). (28)	West Africa	Qualitative	Midwives (n=11)	EVD	-Guidelines characteristics, development, and dissemination. -Realities of implementing guidelines	High

Lam, S. et al. (2014), (31)	Hong Kong (HIC)	Qualitative	Emergency nurses (n=12)	Emerging infectious diseases	-Realities of implementing guidelines	High
Nhan, C. et al. (2012), (48)	Canada (HIC)	Mixed method	39% (68/ 173) and 41% (61/147) of AMMIQ and AMSSCQ members, respectively, (n =129).	Influenza (H1N1)	-Guidelines characteristics, development, and dissemination -Logistics organisational support -Realities of implementing guidelines	Moderate
Filice, C. E. et al. (2013), (29)	USA (HIC)	Qualitative	Medical directors (n=15) and designated other EPs in leadership roles in their departments (n=5).	Influenza (H1N1)	-Guidelines characteristics, development, and dissemination -Logistics organisational support -Realities of implementing guidelines	High
Ahankari, A. S et al (2017), (25)	India (LMIC)	Qualitative	General physicians (GPs), specialists in allopathy (n = 16), Ayurveda (n = 3) homeopathy (n = 1). Total practitioners (n=20).	Influenza	-Guidelines characteristics, development, and dissemination	High
Haq, Z et al. (2016), (51)	Mediterranean Region	Opinion piece	Not applicable	Influenza	-Guidelines characteristics, development, and dissemination -Logistics organisational support -Realities of implementing guidelines	*
Gesser-Edelsburg et al. (2014), (35)	Israel (HIC)	Qualitative	Stakeholders (hospital physicians (n=14), hospital nurse (n=21), community physicians (n= 10), community nurse (n=4). Total sample (n=70).	Influenza	-Logistics organisational support -Realities of implementing guidelines	High
Phipps, E. et al. (2019), (33)	England (HIC)	Qualitative	Outbreaks (n=109).	Influenza	-Guidelines characteristics, development, and dissemination	High
Bandara, T. et al (2020), (50)	Canada (HIC)	Opinion piece	Not applicable	Influenza	-Guidelines characteristics, development, and dissemination -Logistics organisational support -Realities of implementing guidelines	*
Omrani, A. S. et al (2015), (52)	Saudi Arabia (HIC)	Opinion piece	Not applicable	MERS-CoV	-Realities of implementing guidelines	*
