⁴ Italian Society of Environmental Medicine (SIMA), Milan, Italy

⁵ Department of Environmental Science and Policy, University of Milan, Milan, Italy

SUPPLEMENTARY

This section shows all other regions graphs not inserted in the main manuscript. For each region, the forecast of new daily cases and active cases are shown. In last page is reported lethality probability

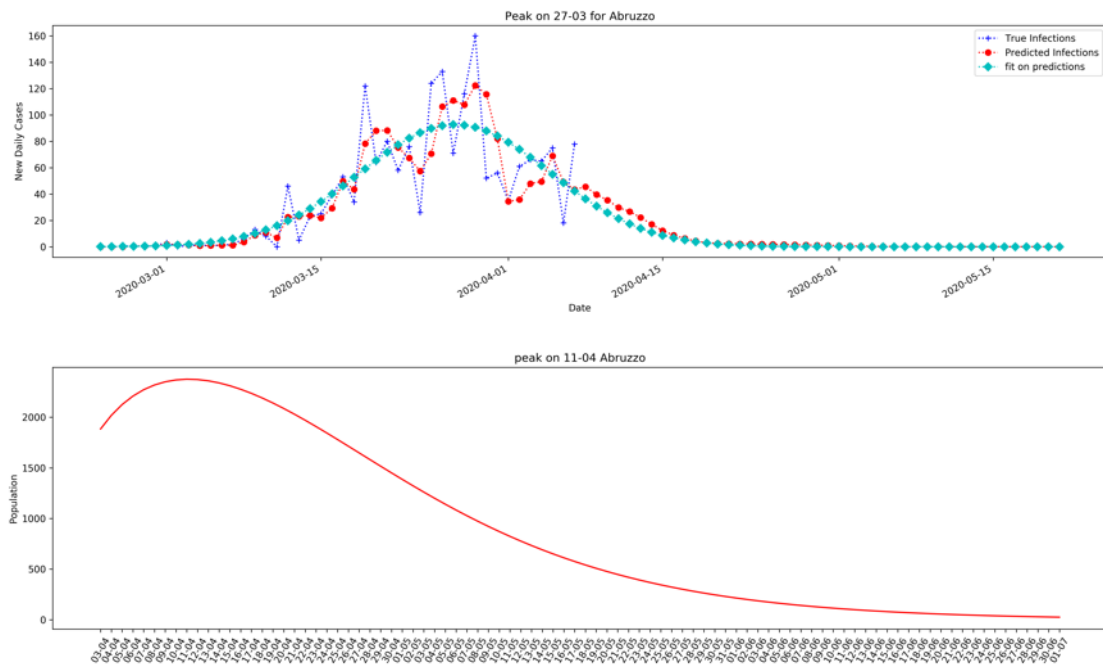

Figure S1 Abruzzo peak predictions (above new daily cases and bottom the active cases)

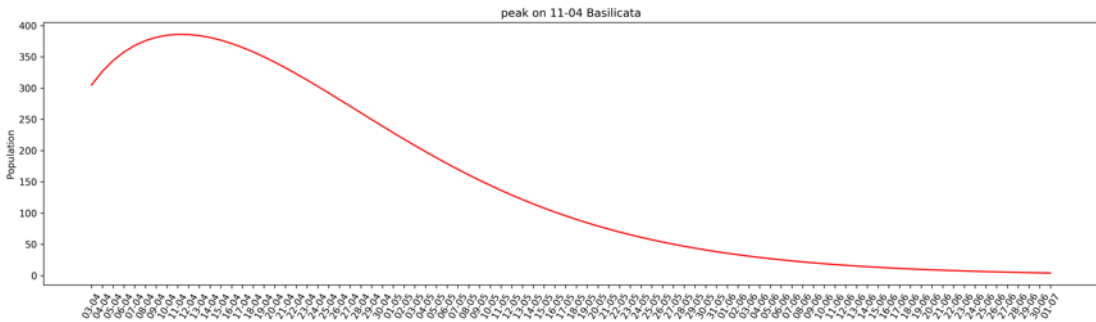

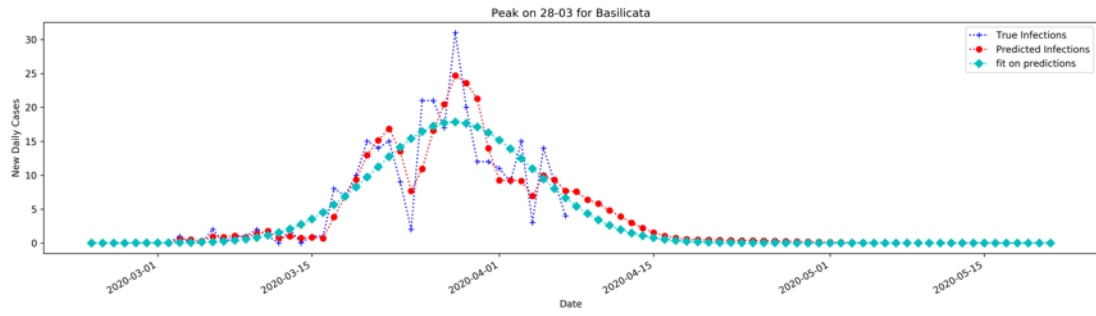

Figure S2 Basilicata peak predictions (above new daily cases and bottom the active cases)

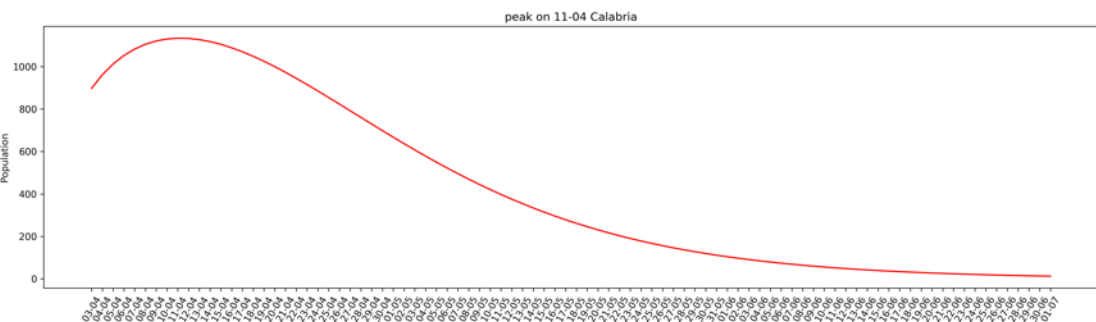

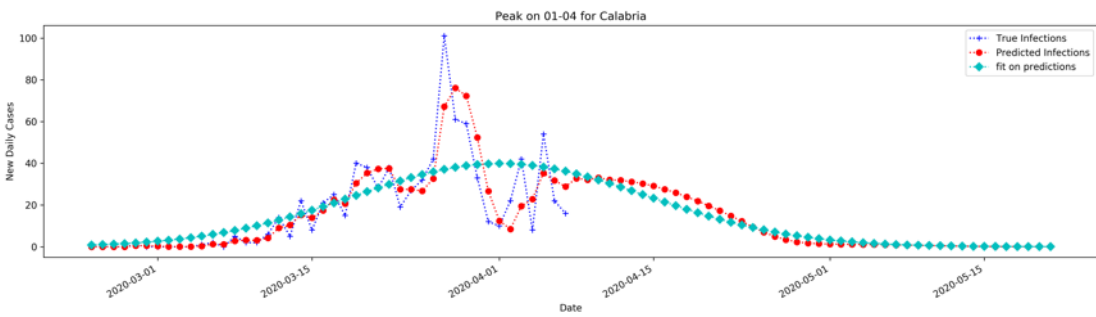

Figure S3 Calabria peak predictions (above new daily cases and bottom the active cases)

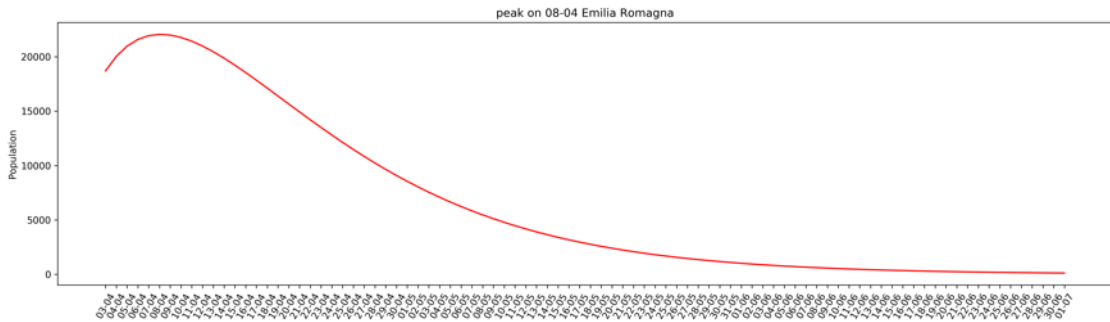

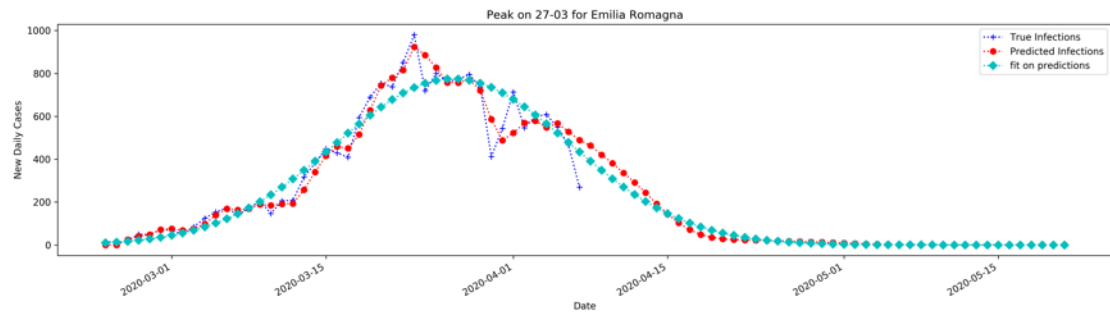

Figure S4 Emilia Romagna peak predictions (above new daily cases and bottom the active cases)

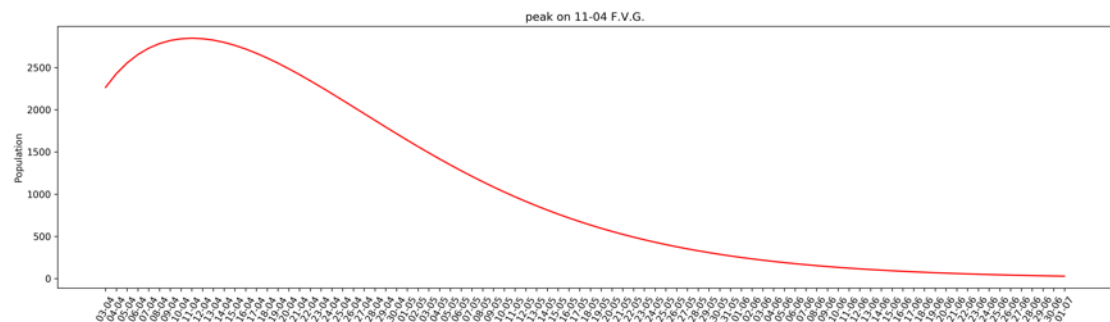

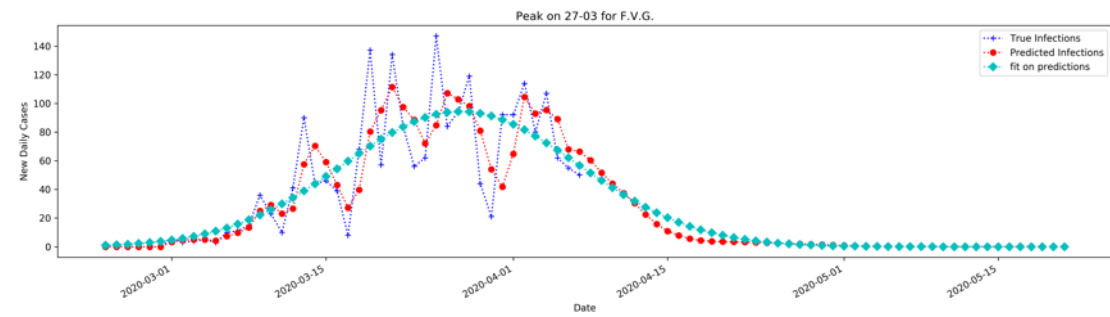

Figure S5 Friuli Venezia Giulia (F.V.G.) peak predictions (above new daily cases and bottom the active cases)

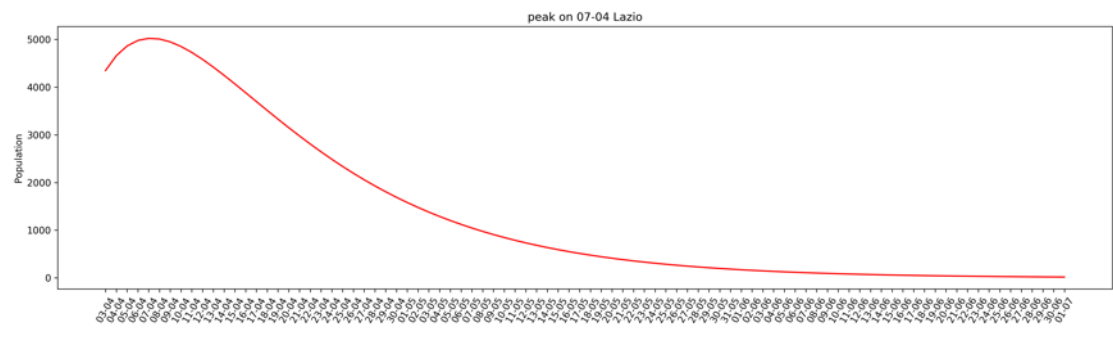

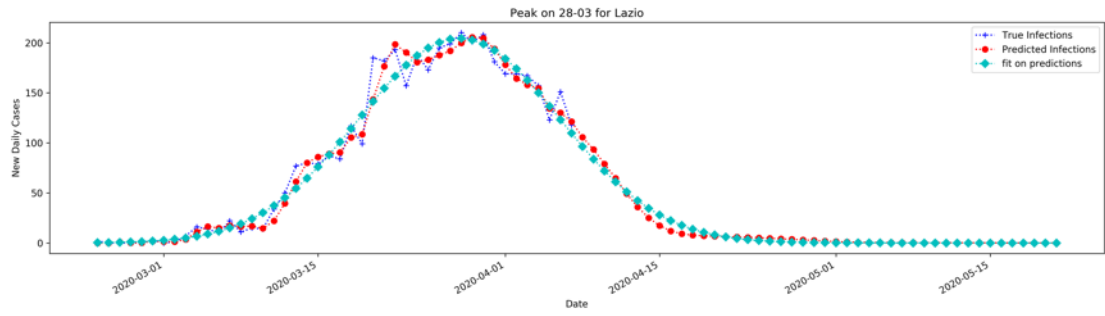

Figure S6 Lazio peak predictions (above new daily cases and bottom the active cases)

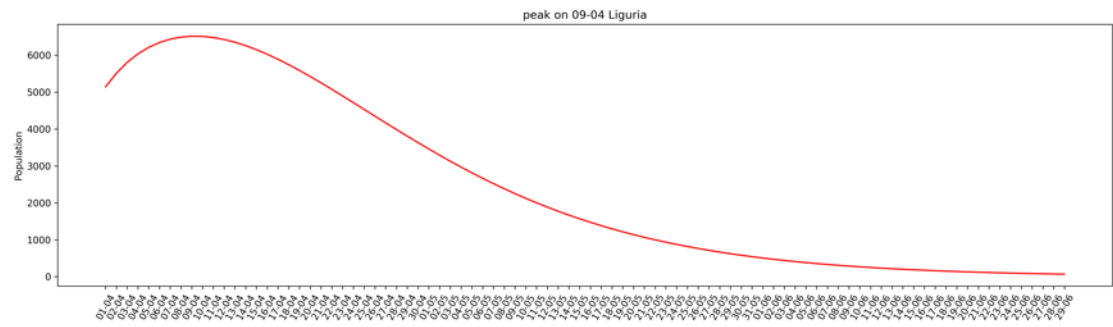

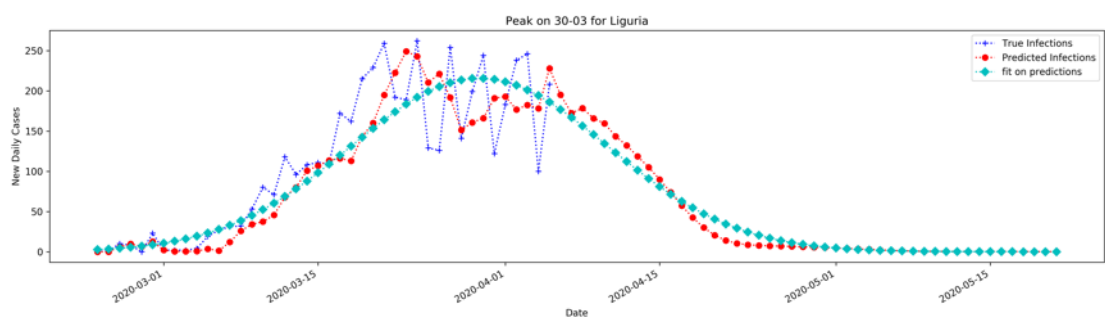

Figure S7 Liguria peak predictions (above new daily cases and bottom the active cases)

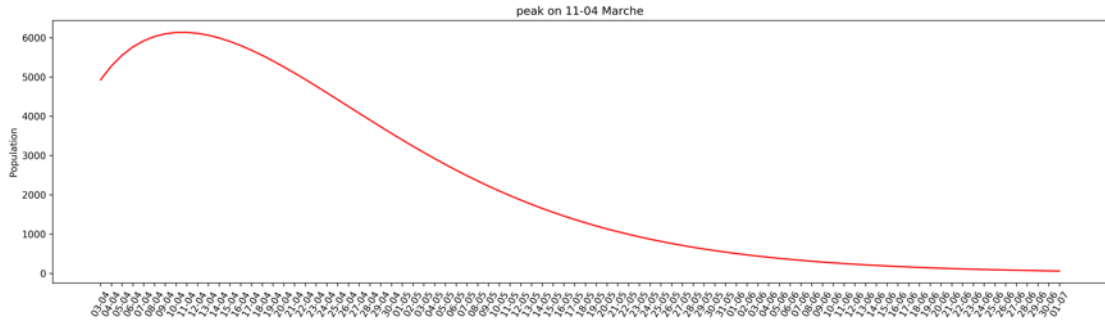

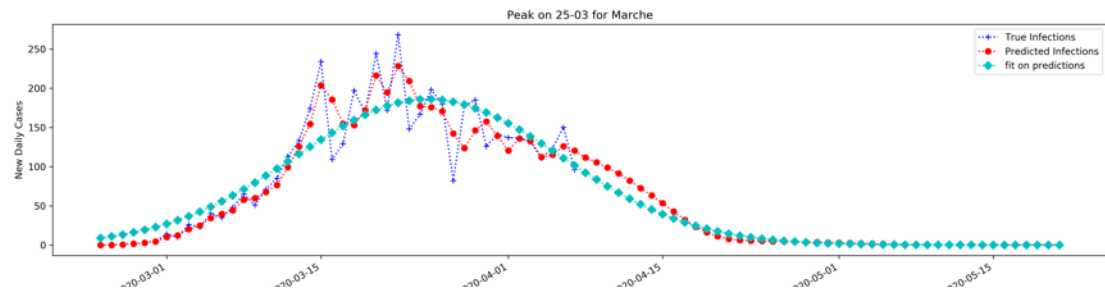

Figure S8 Marche peak predictions (above new daily cases and bottom the active cases)

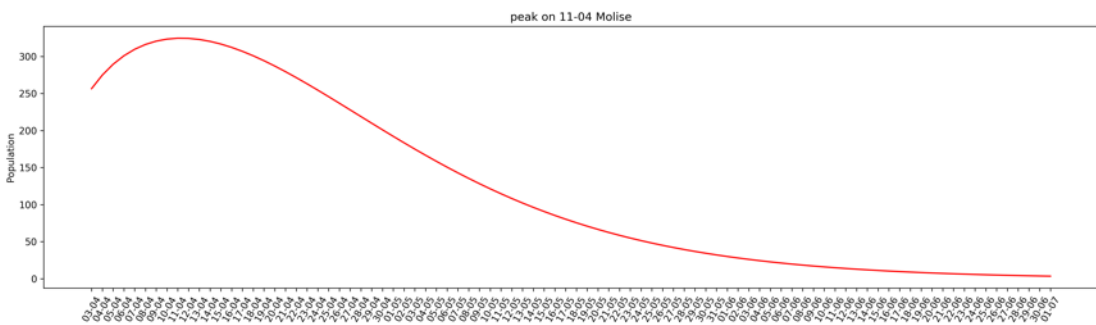

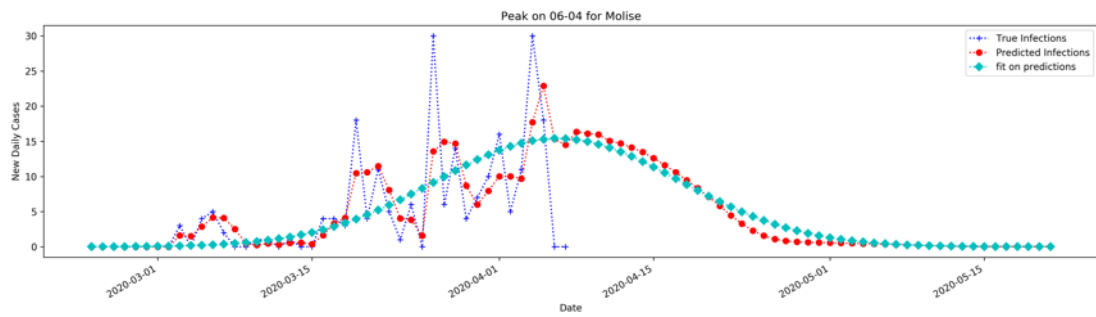

Figure S9 Molise peak predictions (above new daily cases and bottom the active cases)

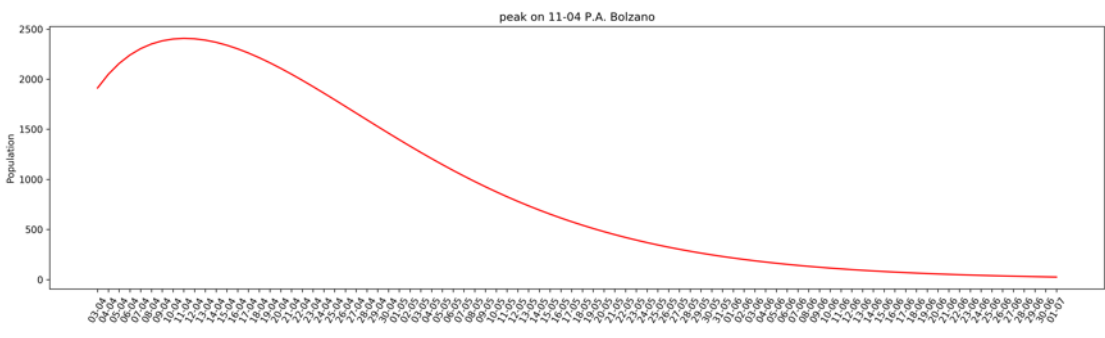

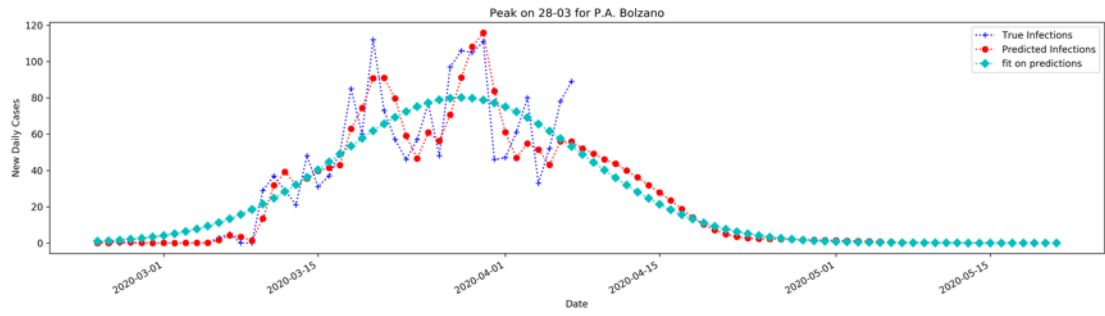

Figure S10 P.A. Bolzano peak predictions (above new daily cases and bottom the active cases)

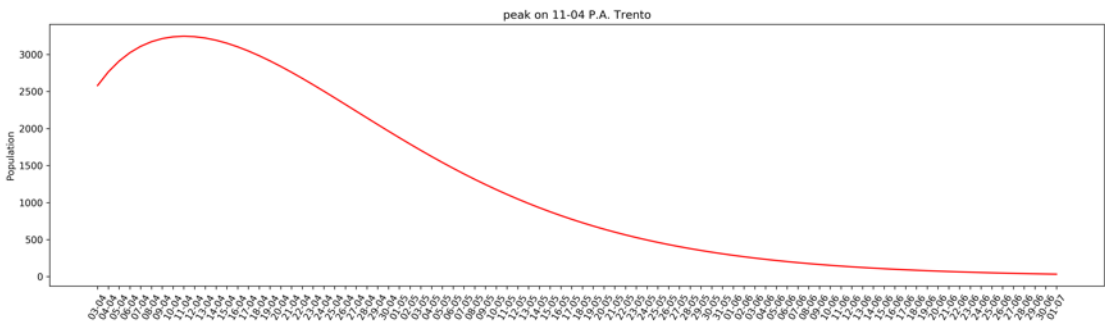

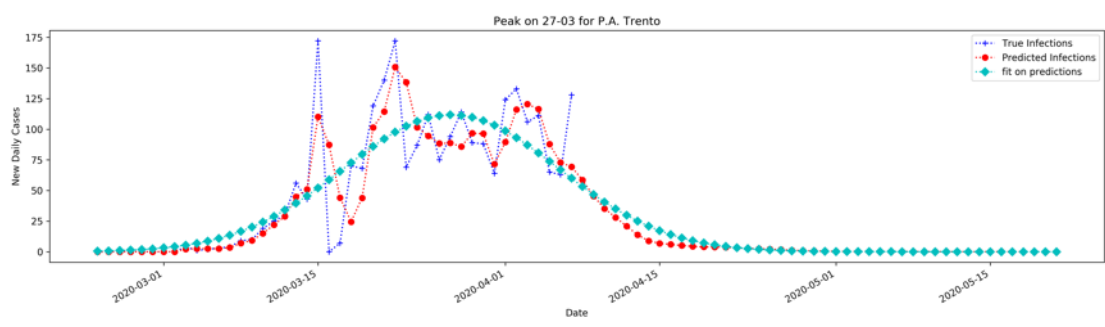

Figure S11 P.A. Trento peak predictions (above new daily cases and bottom the active cases)

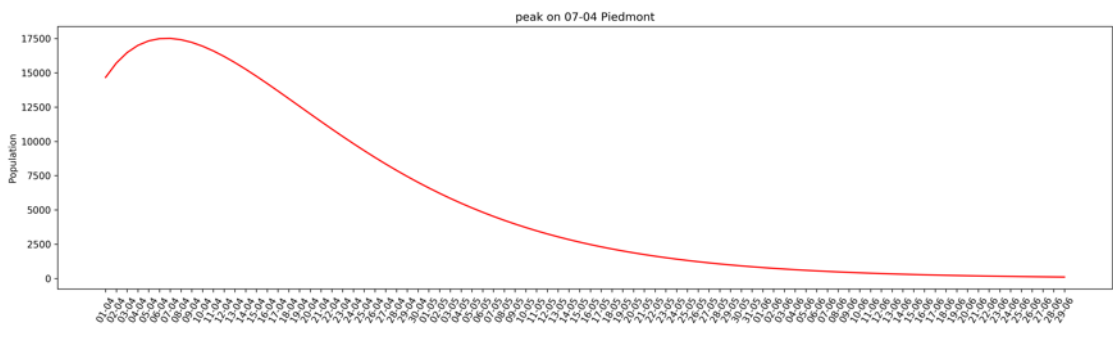

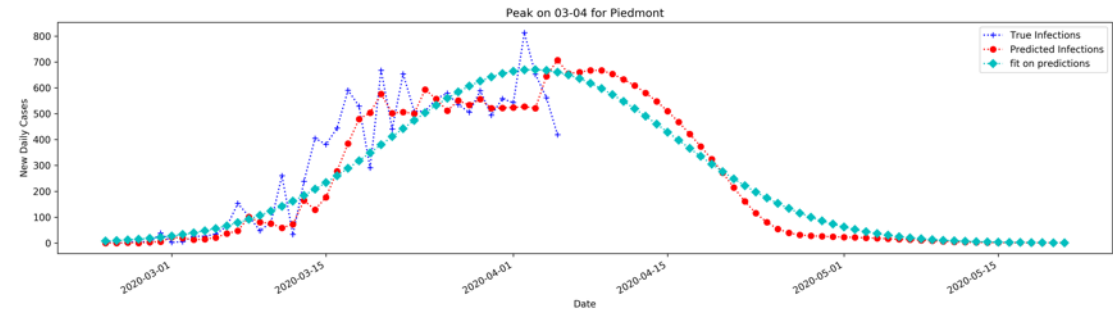

Figure S12 Piedmont peak predictions (above new daily cases and bottom the active cases)

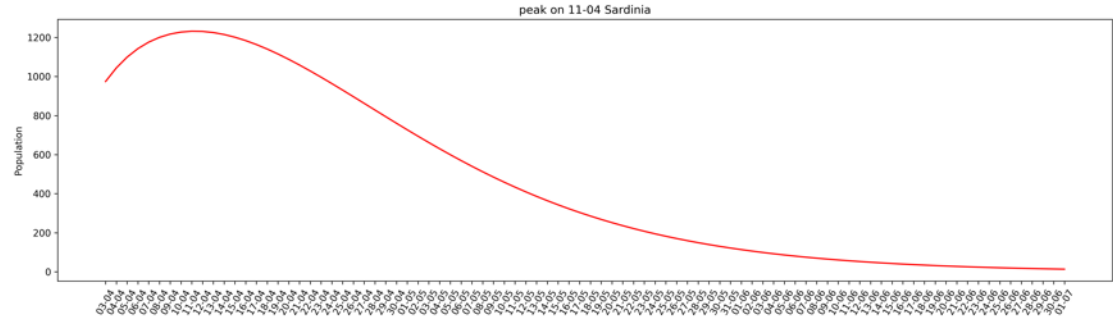

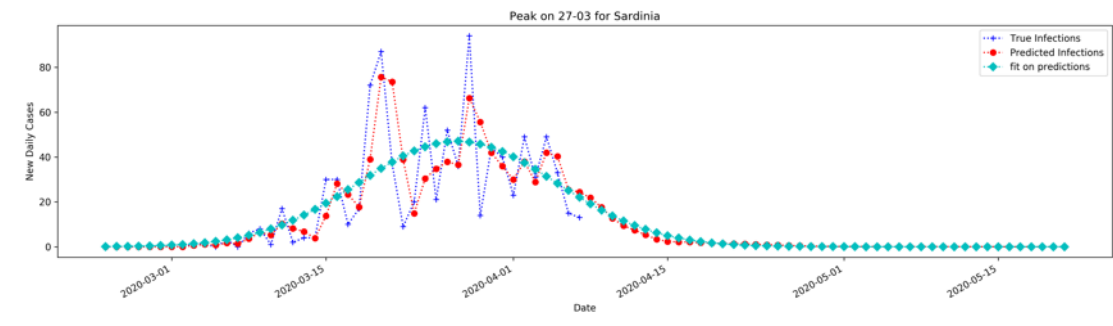

Figure S13 Sardinia peak predictions (above new daily cases and bottom the active cases)

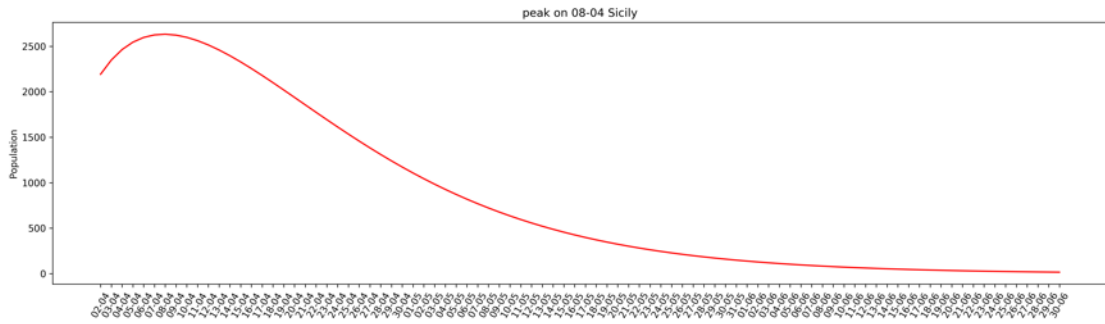

Figure S14 Sicily peak prediction of the active cases. In main manuscript is reported the new daily cases prediction peak

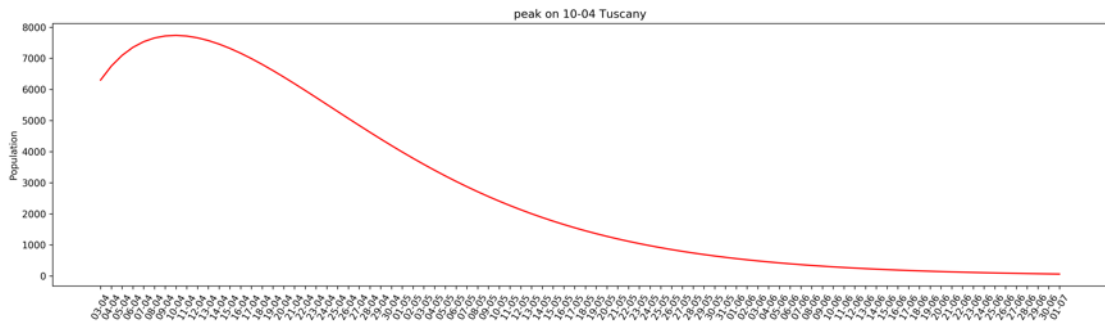

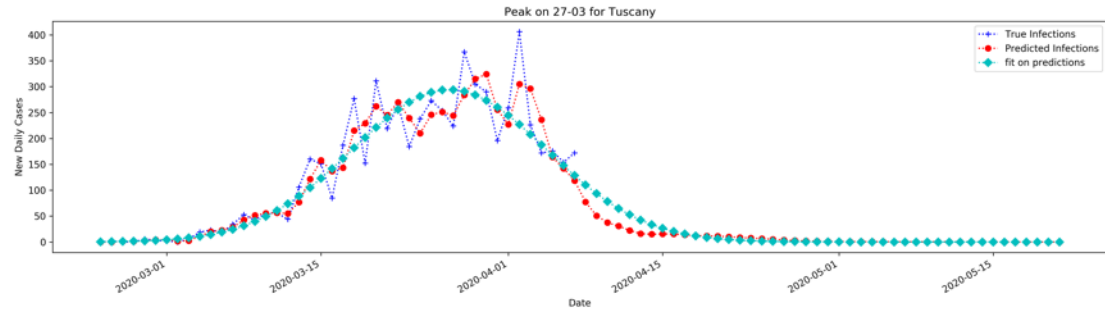

Figure S15 Tuscany peak predictions (above new daily cases and bottom the active cases)

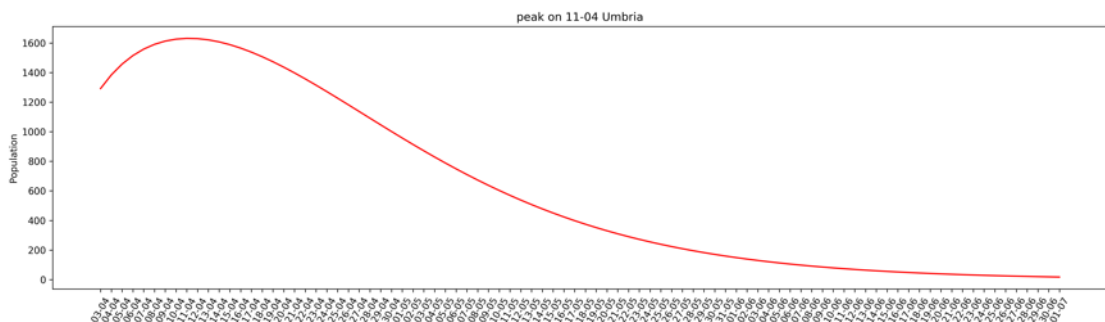

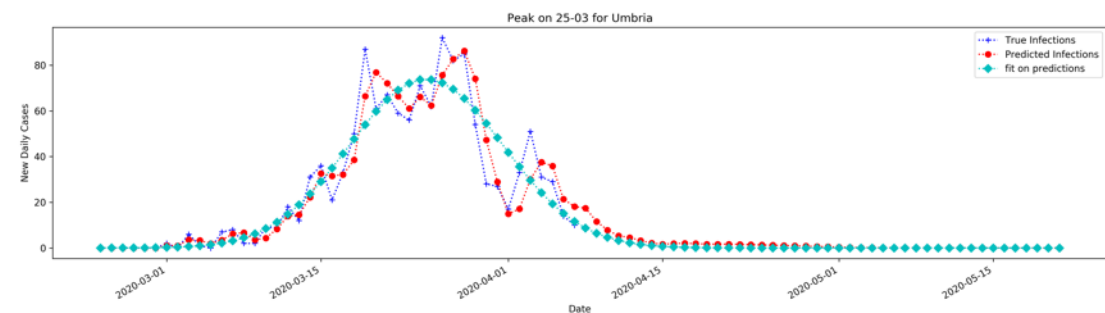

Figure S16 Umbria peak predictions (above new daily cases and bottom the active cases)

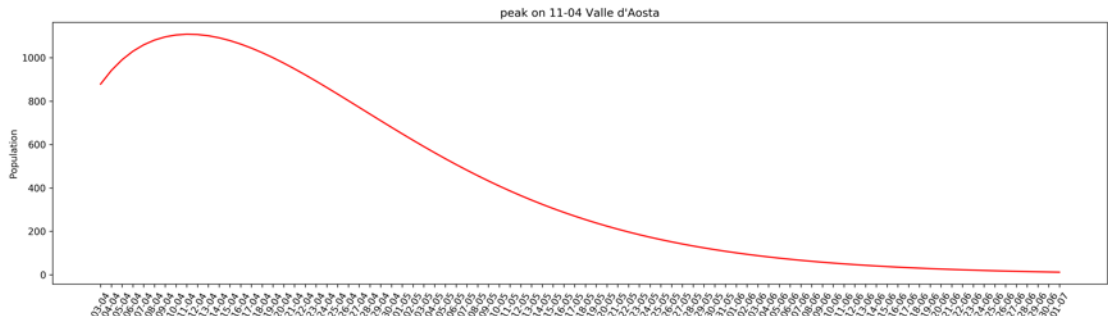

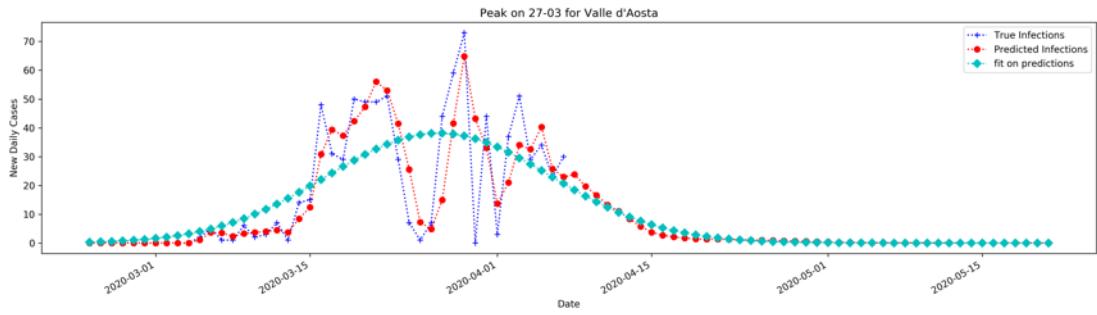

Figure S17 Valle d'Aosta peak predictions (above new daily cases and bottom the active cases)

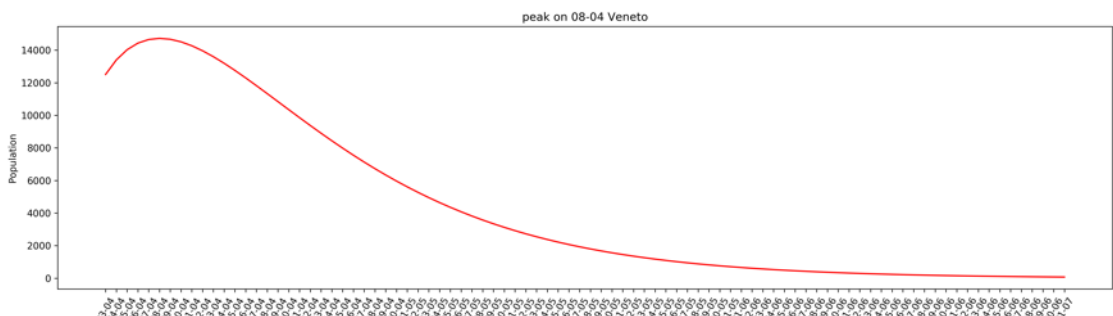

Figure S18 Veneto active cases peak prediction. The new daily cases is shown in main manuscript

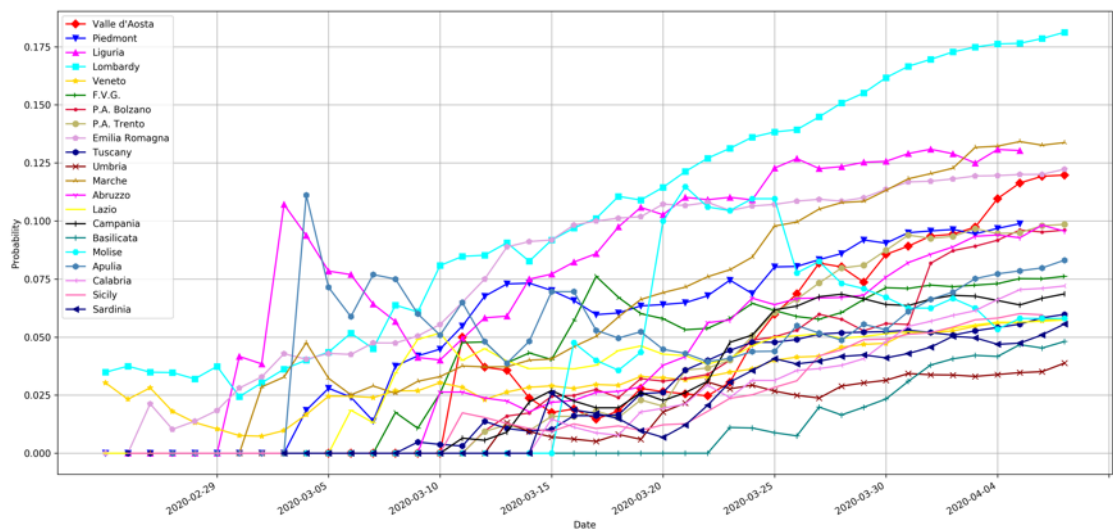

Figure S19 Lethality rate. Here the probability is related to number of deaths over the number of total cases. In main manuscript the mortality is reported in figure 1 which is normalized by the regional population.
